"""Report: Chinese ship sinks off Philippines
02/17/08 09:07 PM, EST
A Chinese vessel sank in the northern Philippines, and 28 crew members were
reported missing, a coast guard spokesman said Monday. """

I am only 100 miles or so away but I had gone to bed.

I monitor 2182,2670 and 500 plus the Japanese's, Chinese and Philippine
Coast Guard.

4325. Re: The RRS no-spin clueless factor report

Newsgroup: rec.radio.shortwave
Date: 2008-02-18 06:01:47 UTC
From: Telamon <telamon_spamshield@pacbell.net.is.invalid>
Message-ID: <telamon_spamshield-654F1E.22014717022008@newsclstr03.news.prodigy.net>
Source record: 137193

It's 10:00PM PT. Do you know where your news group Trolls are?
Unfortunately, I do and they are listed below.

First the breaking news.
M II got a clue this week and actually steered an off topic political rant by someone else to a relevant on topic subject so he is off the list.

David Eduardo only had 35 posts this week and most were not about defending his good name so he is off the list. I'm sure that DxAce taking a siesta from the news group yesterday had something to do with it.

David <nothere@nowhere.org> either changed his pipe mixture or decided to only post while sober this week so he is off the list.

Added to the list this week is mohawk for his out of the blue long political rants. He could go find an appropriate news group but that would require having a clue.

Off the list:
m II <c@in.the.hat> - Got a clue.
David <nothere@nowhere.org> - Calmed down quite a bit.
David Eduardo - Took a chill pill.

Here are this weeks clueless self vote totals:
Mike <mwbryant@aol.com> - 3
Billy Burpelson - 8
mohawk@mailpanda.com - 8
cuhulin@webtv.net - 95
RHF - 205

This weeks winner is RHF. Noted this week are his Trolling abilities to direct on topic discussions to yahoo groups at the detriment of this news group and changing the subject line for threads. When you look at his posting volume the other Trolls don't even come close.

Congratulations to RHF for being this weeks clueless poster boy of the week for the 3rd week in a row.

RHF is to RRS like IBOC is to AMBCB.

This has been another installment of the RRS no-spin clueless factor report. Good night and good listening.

Steve your Link was "HD Radio Sales Restated"
http://digital-am-fm.com/2008/02/hd_radio_sales_restated.html
Industry Analyst says HD Radio Sales were far Lower
than previously Stated and Projected

Steve - So the revised Numbers using your Link are :

2006 ~ 40 K Units Sold
[2006 being the Baseline Year]

2007 ~ 330 K Units Sold {Mostly in Cars Year # 1}
[725% Increase over the Baseline Year]

2008 ~ 500 K Units 'Estimated' Sales {Mostly in Cars Year # 2}
{ 52% Increase over the Prior Year }
[1150% Increase over the Baseline Year]
Note - That is still less-than a Million Total Units Sold.

BAD NEWS - "HD" Radios in Automobiles : Which was
one of the main Backdoors for the Introduction and the
beginning of the Public Acceptance of FM Radio in the
1950s, 1960s and 1970s. {Spread Over Three Decades}

Remember that One (1) Rental Car Puts "HD" Radio
into the Ears of at least 50 Radio Listeners each Year.

Now Looking Forward to the Year 2020 {~15 Years}

2009 ~ 750 K Units 'Estimated' Sales {Mostly in Cars Year # 3}
{ Assuming the same 50% Increase over the Prior Year }
That is about 1.6 Million Total Units Sold.

2010 ~ 1,125 K Units 'Estimated' Sales {Mostly in Cars Year # 4}
{ Assuming the same 50% Increase over the Prior Year }
That is about 2.7 Million Total Units Sold.

2011 ~ 1,688 K Units 'Estimated' Sales {Mostly in Cars Year # 5}
{ Assuming the same 50% Increase over the Prior Year }
That is about 4.4 Million Total Units Sold.

2012 ~ 3.4 M Units 'Estimated' Sales
{After 5 Years of mostly Selling "HD" Radios in Cars
the Number of "HD" Radios being sold for In-Home and
Office Use Equals or Exceeds the Number being Sold
in Cars}
{ Assumption Changes - Now assuming a 100% Increase
over the Prior Year due to expanded in Non-Auto Sales. }
That is about 7.8 Million Total Units Sold.

-ps- This is "HD" Radio's Tipping-Point toward Acceptance.

2012 ~ 3.4 M Units 'Estimated' Sales
{ Now assuming a 100% Increase over the Prior Year}
That is about 7.8 Million Total Units Sold.

2013 ~ 6.8 M Units 'Estimated' Sales
{ Now assuming a 100% Increase over the Prior Year}
That is about 14.6 Million Total Units Sold.

2014 ~ 13.5 M Units 'Estimated' Sales
{ Now assuming a 100% Increase over the Prior Year}
That is about 28.0 Million Total Units Sold.

2015 ~ 27.0 M Units 'Estimated' Sales
{ Now assuming a 100% Increase over the Prior Year}
That is about 55.1 Million Total Units Sold.

2016 ~ 54 M Units 'Estimated' Sales
{ Now assuming a 100% Increase over the Prior Year}
That is about 109 Million Total Units Sold.

2017 ~ 108 M Units 'Estimated' Sales
{ Now assuming a 100% Increase over the Prior Year}
That is about 217 Million Total Units Sold.

2018 ~ 216 M Units 'Estimated' Sales
{ Now assuming a 100% Increase over the Prior Year}
That is about 433 Million Total Units Sold.

2019 ~ 432 M Units 'Estimated' Sales
{ Now assuming a 100% Increase over the Prior Year}
That is about 865 Million Total Units Sold.

2020 ~ 864 M Units 'Estimated' Sales
{ Now assuming a 100% Increase over the Prior Year}
That is about 1,729 Million Total Units Sold.

By the Year 2020 "HD" Radio Use reaches Saturation
with roughly an "HD" in every Home and in every Car.

Steve - I don't have to be For -or- Against Something
to Honestly Evaluate It. Wishing that IBOC and "HD"
Radio will Fail : Ain't Gona Make It Fail.

IBOCcrock presented some 'numbers' and claimed
that those 'numbers' met that IBOC "HD" Radio is
Doomed to Failure : Those same Numbers can Mean
a Slow and Steady Growth for IBOC "HD" Radio for a
Decade of more. -ps- You don't have to like the Numbers
to give them an Honest Look.

As I have said before IBOC "HD" Radio will Succeed
or Fail with it's Public Acceptance of FM "HD" Radio
and AM/MW "HD" Radio will simply be dragged along
with FM "HD" Radio.

FM "HD" Radio is not about better Audio Sound :
Is is about a Second 'Sellable" Audio Stream [HD-2]
for the Radio Station to Market to Consumers and
Sell to Advertisers.

What FM "HD" Radio needs is a Killer Application to
make the HD-2 Radio Audio Stream "That Something"
that Radio Listeners {Audio Consumers} both
WANT and NEED !

Presently there is Only One Audio Product that
America's Listening Consumers Want-and-Need
more than Radio :
It Ain't Talk Radio.
It Ain't Music Radio.
It's More Common Then Both -and- American's
Listening Consumers Listen to "IT" more than
all types and kinds of Radio combined.

It Is _____ [.]

it's a 'vision' thing and these forward looking statements
are based on sheer conjecture on my part ~ RHF
.
CAUTION : This Post Has Not Been "Approved"

Will Anyone Notice My Replica Handbag?(inspired handbags)

When you buy a replica handbag(replica Wallets)(designer purses), you're not just looking at the price? you want to know if anyone is going to notice your new bag. And the answer is yes(replica hermes

handbags). There are many reasons why people are going to stop to take notice of your bag(knockoff handbags)? especially when it's a brand they recognize and want for themselves.(inspired purses) Here are some of the many reasons why you can't help but get noticed with your replica handbag(designer handbags).(replica purses) (replica Wallets)

The Quality is High Designers Handbags!

If you're choosing a replica handbag, Purses, Wallets from sales-luxury.org, you're not only going to find the latest styles, but you're also going to find the highest quality. (louis vuitton purses)With high grade materials which look and smell like the real thing, others are going to be hard pressed to determine whether or not you have the 'real' thing(replica hermes handbags).(inspired purses) The stitching is tight, (designer handbags)the seams are aligned, and the details emulate the designer's actual bags.(purse replica) (designer purses) No detail is left out in order to preserve not only the quality of the bag itself, but also the quality of the style.

The Styles are Current(replica coach bags)

With everything from Miu Miu to Hermes, Chanel to Gucci,(Louis Vuitton handbags)(lv bags) you will be able to get the latest styles when you shop for a Designer replica handbag.(purse replica) These bags will help to showcase your affinity for style as well as your knowledge. By going to the latest gossip magazines, you will find pictures of celebrities with their designer handbags(replica hermes handbags)? and then be able to get a replica of these bags for yourself(knockoff handbags), instantly. With the ever changing styles, replica designer handbags (replica purses)are always changing too, helping to show off your style sense.(louis vuitton Wallets)(designer lv denim)

You Can Afford More Than One(inspired handbags)

Though some of us could probably afford to buy one 'real' designer purse(purse replica), why buy one when you could have a whole set of Cartier replica purses? With the low prices of replica purses, you will be able to show off that you have multiple designer handbags, which will certainly get you noticed. (lv bags)Your friends will wonder how you could afford all of those high quality bags(knockoff handbags)? and be jealous of your fashionable replica purses.(replica coach bags)Whether you buy one or many designer handbags, it's going to be hard for you to not get noticed. Since you're going to have the latest high priced fashion on your arms, everyone will wonder what your secret is,(inspired purses) creating a stir wherever you go. Be ready for people to come up to you and ask about your purse.(purse replica)

On Feb 17, 8:09 pm, Steve <sdanie...@speakeasy.net> wrote:

- S N I P -

- RHF, you are rooting for HD?

-r- NO [.]

- I almost can't believe my eyes.

-r- Open Your Eyes to the Reality that "HD" Radio Ain't
Going Away Soon -and- Very Well May Be Here Forever.

- It's like hearing Greenpeace root for increased use of fossil
fuels.

GreenPeace might Work Harder to Save a Living Fossil :
Then to Protect a Dead One. {In Life There Are Choices.}

Steve - Understand that the Radio Industry is "COMMITTED"
Big Time to the IBOC Scheme by iBiquity that is commonly
called "HD" Radio; and has put it's Money and Resources
behind it with a Transition Plan that goes on for Years.

1 - When FM Radio came about the AM/MW Radio Stations
Opposed It : Not So with "HD" Radio - Corporate AM/MW
Radio is On-Board the "HD" Radio Band-Wagon.

2 - When FM-Stereo Radio came along AM/MW Radio
Stations tried a few different AM-Stereo 'schemes' but
with NO Industry Standard AM-Stereo Failed due to
FCC and Industry Mismanagement : Not So with "HD"
Radio, both the AM/MW Industry and the FCC are
behind IBOC as a Standard for both AM/MW and FM
"HD" Radio Broadcasting. {They Both Learned from the
AM-Stereo Fiasco.}

3 - They is Solid Radio Broadcast Corporate 'Commitment'
to the IBOC Scheme for both AM/MW and FM "HD" Radio.
Perhaps 100 Times the Amount 'committed' to early FM
Radio Broadcasting. Perhaps 10 Times the Amount that
was 'committed' to early FM-Stereo and AM-Stereo Radio
Broadcasting. {Inflation Adjusted Dollars} IBOC "HD"
Radio has the Financial Backing to be Successful and
the Long Term Commitment to simply let it succeed
over many years.

4 - As I have said before IBOC "HD" Radio will Succeed
or Fail with it's Public Acceptance of FM "HD" Radio
and AM/MW "HD" Radio will simply be dragged along
with FM "HD" Radio.

5 - FM "HD" Radio is not about better Audio Sound :
Is is about a Second 'Sellable" Audio Stream [HD-2]
for the Radio Station to Market to Consumers and
Sell to Advertisers. {Radio It's About Business.}

6 - What FM "HD" Radio needs is a Killer Application to
make the HD-2 Radio Audio Stream "That Something"
that Radio Listeners {Audio Consumers} both WANT
and NEED !

reality may indeed 'suck' {reality sucks}
-but- just because something 'sucks'
don't mean that it will fail ~ RHF

EXAMPLE : MicroSoft Sucks. -v- Apple is Super.
But MicroSoft is # 1 in a Two Horse Race where
Apple is a Distant # 3 in Market Share and Sales
Volume.

Good catch Burr, I started monitoring it on my modded out DX394 then switched to my Hammarlund 129X with Heathkit Q-Multiplier piped into a couple nice stacks- I got the heads up from of buddy. Pretty exciting IMO- those are the types of monitoring sessions that everyone IMO thinks about and when they go down it's pretty cool.

I remember three or four years ago monitoring a fishing vessel that was going down calling mayday in the Caspian sea then read about it seven days later, I wondered why it took sevens days for the print media to hit on it. Some of the things that make you go "Hmmmmmm".

4338. Radio Aztec (Pirate question)

Newsgroup: rec.radio.shortwave
Date: 2008-02-18 09:35:05 UTC
From: BCBlazysusan <gkotr@earthlink.net>
Message-ID: <eaa4974e-76dc-405e-8f2f-f541bc76c0d8@62g2000hsn.googlegroups.com>
Source record: 137206

I was listening to the show with Radio Cumbre (sp?) and he gave an address for the two set CD of Radio Aztec. I have have monitored that show quite a bit but apparently missed the info to get this 2 set cd.

If someone knows the address and if I got any of what I think I wrote down properly wrong feel free to correct me.

I got PO Box 146
Stoneham,Mass.
02180
**is this much correct? I missed the name of the fella at the top of the addy.
Any help? I would appreciate it.

RHF:

Unless the radio stations can improve content and sound quality. More
and more people will switch to Sirius or XM or just use the CD or I
POD/MP3 connections included with most new car sound systems.
I am going to be one of them.
I wasted over $175 on the Sangean receiver to discover not only the
sound causes me to shut it off after a half hour, but the secondary
content is throw away on most of the stations except public radio
offerings.
I have several co-workers who have and love their sat. receivers and
the sound is much improved over so called HD-sound. I can enjoy
listening to Sirius's offerings.
I used to listen to a AM-stereo station that to my ears almost matched
the fidelity of the FM stations. Now that it switched to the HD
broadcast it sounds like listening to the MUSZAC offerings while being

put on hold on the telephone on my analog receiver. The Sangean cannot decode the HD content at all and the analog portion is also much like my previous description of auto receiver.
There is nothing currently on local radio especially HD to me spring for a new HD receiver.
Ken I.

Most of these apps work under linux with wine, I suppose?? (the only things I'm not 100% sure is serial connections and such). You'll be able to use the progs without windows (licence). see winehq.com and eg http://frankscorner.org/

And there are other apps, for free, like here, this is a list (not complete):
http://users.fulladsl.be/spb13810/linux/radio.txt

--
--
Shortwave transmissions in English, Francais, Nederlands, Deutsch, Suid-Afrikaans, Chinese, Dansk, Urdu, Cantonese, Greek, Spanish, Portuguese, ...

Oddly, these posts have no OT flag.

We don't call it "pipe mixture". We call it "Daddy's medicine".

XM and Sirius sound terrible; easily worse than HD, which also sounds weird. Since I have no clean FM at the house and lots of really good FM radios I have obtained a low Wattage PC for streaming web radio, which I then transmit using the Whole House FM Gold stereo transmitter. I use a Behringer COM800 audio processor to make it sound just like real radio (which it is).

A big public company's only interest in owning a radio station will be either to push shitty music or to push shitty ideas. They have squoze the life out of the medium and they will move on. They chased moderately affluent people with brains away a long time ago with their moronically tight playlists and music sets that have absolutely no coherence. The MP-3 player put the nail in.

(I still listen to Sirius in the car).

If you have to run something like Butel, it works fine under anything
from 98 to XP, so just get an old laptop and dedicate it to radio
control. I have an old HP at work that runs my EPROM burner, my
intermod programs, a Winradio, my 8200MK3B, and a few Sennheiser and
Shure utilities. All were written in very simple language and run just
fine.

4351. HRO-500 manuals

Newsgroup: rec.radio.shortwave

Have a few more days left for our auction of HRO-500 mint manuals
(original!).
See "jerrymyr" auctions on eBay.
Thank you!

Will be listing mint, never used HRO-500 parts soon.

Thanks

Jerry

No, but I get the sense that you are wanting to promote HD radio
simply because you're posting about it here, on a shortwave group.
That's your prerogative, but I personally don't get it.

> to give them an Honest Look.

Giving the numbers an honest look means looking at more than the
numbers themselves. It means looking at the development of Wimax and
the fate (good or bad) of satellite radio. It means looking at the
fact that HD doesn't address any of the real (i.e., programming)
problems that explain the current sad state of much commercial
broadcast radio.

If broadcasters had vision, we wouldn't even need to be talking about
HD.

I understand this, but you must understand that the current problems
facing broadcasters, which are in no way addressed by HD radio, are
also deeply entrenched. An HD bandaid isn't going to solve the
industry's problems.

And the public's acceptance of HD radio will be a function of its
acceptance of other forms of radio, which have sound business models
and superior programming.

>
> 5 - FM "HD" Radio is not about better Audio Sound :
> Is is about a Second 'Sellable" Audio Stream [HD-2]

The idea of a "second audio stream" is absolutely quaint at this
stage. Surely no one is resting their hopes on this.

>
> 6 - What FM "HD" Radio needs is a Killer Application to

No, but the fact that it doesn't address problems that are genuinely
pressing for the industry suggests that it will either fail or few
people will notice one way or the other.

Satellite Radio did 5 million units the first year that both companies
were on line. By that measure HD is a total flop. Sirius still sells
more radios in 3 months than HD has since its inception.

Hey fuckhead, what does this look like to you:

"HD Radio spinners claim a breakthrough year: Pulling a fast one"

"According to a press release from the Alliance 330,000 HD receivers were sold last year. This is a 725 per cent increase from the 40,000 sets purchased a year earlier and therefore 2007 was a 'breakthrough year' for the technology. In 2008 they will sell a million of the things."

http://www.theinquirer.net/gb/inquirer/news/2008/02/08/hd-radio-spinners-attempt-fast

"RAIN: Consumers, Wall Street Not Buying HD"

"So what's the play here? There doesn't seem to be one. The Radio industry is correct to conclude that they need to make some changes to start growing again, but they seem to have made a bad bet with HD, and there doesn't seem to be much percentage in staying the course."

http://tinyurl.com/3cqnyq

"DEAD AIR: Radio's great leap forward stalling in the Valley"

"Retailers say no one is buying HD radios in South Texas despite scattered attempts by broadcasters to promote the digital signal technology..."

http://www.themonitor.com/news/radio_7098___article.html/digital_new.html

"HD Radio Has Yet To Take Off"

"But the technology hasn't taken off as expected. NBC 5 could not find one person who owns a hi-def radio and neither could KISS FM's program director. I don't know anybody that has one yet, Davis said."

http://www.nbc5i.com/technology/14878368/detail.html

"High-def radio is here, but is anyone listening?"

"But 19 Utah stations are broadcasting 31 high-definition radio channels with six more coming soon... It seems the stations are investing in technology the public isn't quite ready to embrace.... Some have heard it referred to but never had cause to get one. Unless you are a gadget person, few of these radios have sold."

http://www.sltrib.com/technology/ci_7852904

"HD's here. Who's listening?"

"But consumers haven't exactly been stampeding to electronics stores for the new HD Radio sets that are required to tune in the digital signals."

http://www.twincities.com/business/ci_7991990?nclick_check=1#recent_comm

"Don't touch that dial: Digital radio lags behind"

"Digital radio -- now synonymous with the HD Radio brand name --
apparently has yet to catch on with listeners in this area..."

I am not aware of any shortwave broadcasting out of Kosovo. The WRTH
lists a 1000kW AM station under construction at Drenas. It also lists
two web links: www.radio-kosova.com and www.blueskylive.com
As far as the odds on liking Americans, you would be surprised. You
won't see it or hear it in our media, but we are very much liked by
peoples of countries that are either suffering or have suffered under
dictatorial regimes that our goverment has opposed or is still
opposing (Eastern Europe, Cuba, Iran, Lybia). We are also very much
liked in most of Africa. At the risk of maybe sounding too corny, the
ideals of the United States are the ideals of the great majority of
the people in the world, and as the perceived bearers of such ideals
(the current policies or politics of any US government
notwithstanding) we are much liked. I am definetely not surprised by
the "adulation" (harm intended by the writer) expressed by the people

of Kosovo.

Message from Chris Lobdell:
Thanks to the help of Bram Stoker who lent me the studio tapes, I am
pleased
to present:

Radio Azteca-The Collection
"All That's Gross But Tasteful"

Radio Azteca hit the pirate airwaves in September of 1992 featuring
the
biting wit and bodily function humor of Bram Stoker that featured
bumper
music from the Rocky and Bullwinkle cartoon TV show. During the
period from
September of 1992 until September of 2002 Bram Stoker produced 40
shows as
well as five Kulpsville Especials and three Music and ID programs.
Radio
Azteca was the most popular studio pirate of all time, being broadcast
by
over 12 different pirates over the years.

This two CD mp3 audio set has all programs ever produced by Bram for
Radio
Azteca from the home office in Slipup, Kentucky. Relive all those
great
segments such as Animal Stories, Story Time, The Top Ten Lists, Actual
Stuff, The ³Mail Scrotum² Mailbag and that all time favorite, Ask Dr.
Radio!
Hear about Bram¹s favorite characters Emilano Zamboni, Monique The

Mailwoman, Reverend Billy Bob Chilipecker and Jean Guy Pepsi.

Cost: $10.00 Cash in North America
$12.00 to Canada; $15,00 US to the rest of the world.
Cash only in US $$

Mail orders to:

4363. Ask The Right Questions Before You Book Your Wedding Reception

Newsgroup: rec.radio.shortwave
Date: 2008-02-18 17:25:12 UTC
From: xikom01@yeah.net
Message-ID: <502638a2-5cd9-4236-831c-3502b1396184@i12g2000prf.googlegroups.com>
Source record: 137231

Think saying "I do" is going to be the most emotional moment in your wedding? Probably so, but putting down a deposit on your wedding venue could be a close runner-up.

Reception costs consume almost half the budget for the wedding, which these days means you can expect to lay out almost $13,000, including food. And the venue you select can not only limit your choice of caterers or bakers, it's sure to affect how much you spend to "cover up" its weak spots or accent its highlights. Most stressful of all, the popular venues book far in advance, forcing brides to make the big decision almost as soon as they set the date.

For that reason, the savvy venue-hunter wants to know what questions to ask before she walks in the door, much less signs the contract. Here are a few ideas:

Do you have a pre-set list of caterers I can use, or can I choose my own?

Some venues -- high-end ones with their own catering staff, or small-town ones with little competition -- require you to use the in-house caterers or choose from a small list of "approved" vendors. It can be difficult to get taste-tests or otherwise put this type of vendor through its paces. If you're stuck with such a list, search high and low for brides who have "been there, done that" and can give you their honest opinions.

Any restrictions on decorations?

Many venues have them, but rules vary widely from place to place. Common restrictions include: no open flame (or no flame whatsoever), no tape or tacks on the walls, or no confetti. When linens are provided, some halls will prohibit the use of pins. Ask if the hall can provide any decorations themselves, especially around holidays. Useful centerpiece items such as hurricane lamps or Eiffel vases are not uncommon.

Can we bring our own liquor, is there a "corkage" fee, and do we need a license?

If the liquor's to flow freely at your wedding, you'll save an immense amount of moolah by bringing your own. But some venues prohibit this and require you to buy from them. Even worse is the venue that says "yes" to bringing your own alcohol, but charges you a mandatory "corkage

4364. Finding pirates

Newsgroup: rec.radio.shortwave
Date: 2008-02-18 17:34:17 UTC
From: cadillac_eldorado <jfboyd@gmail.com>
Message-ID: <0547a874-a284-442e-82f4-84427498964f@i7g2000prf.googlegroups.com>
Source record: 137232

Finally found a good place in my abode where I'm getting good signal, and tuned in all the heavy hitters last night, including Radio China, Radio Taiwan and Radio Havana--and of course Radio Nederlands.

And now that I'm feeling flush with success, I'm curious about finding pirate stations. I've read a fair amount about them in books, but I haven't seen anything that explains exactly how to find these stations (actually, I want to read Andy Yoder's book on pirate radio, but my library does not loan out its copy :( ). I know sometimes they broadcast their frequencies on WWV, but I haven't heard anything yet.

Are there some good pirate signals out there right now?

Thanks for that heads up RFI - I always enjoy your posts and find your leads invaluable, as often my Google searches are not as comprehensive as yours = keep up the good work.

I have owned the Kiwa MW Loop for years and have nothing but the highest praise for it. But mine is so battered by many, many DXpeditions I doubt if I could sell it, even though it still works superbly. See:

4368. New kid on the block

Newsgroup: rec.radio.shortwave
Date: 2008-02-18 18:55:39 UTC
From: plimmer@telkomsa.net
Message-ID: <0b443d99-1c6f-46d6-aef3-6f36bee9eecf@d4g2000prg.googlegroups.com>
Source record: 137286

There's a new kid on the block with the most amazing high end specs
and
rave reviews from new owners on eHam
It's the new Elecraft K3, see
http://www.elecraft.com/news.htm
http://www.elecraft.com/K3/K3_specs.htm
http://www.eham.net/reviews/detail/6673

The most amazing spec of this modestly priced radio (about US$1,850
with
extra filters) is its superb narrow spaced dynamic range. This spec is
supposed to make it a lot easier when you have our 9/10 khz MW splits,
when
say you are trying to get 1520 khz WWKB Buffalo N.Y. and 1521 khz
Saudi
Arabia is booming in next door. I can say from my own experience that
DXing
with my Icom IC-756PROIII is a hellava lot more convenient and easier
than
when I used to DX with my old Drake R8B.

Of course my top DX mate Gary Deacon puts the lie to that by DXing
with his
FRG7
and Icom R71 and getting the most amazing results and recordings, but
he has
immense skill and years of experience, whereas even a yobo like me can
pick
up a top end radio and get good results much more easily with one of
these
top spec jobs.

The K3 has other nice features like twin 32 bit DSP, only 1 amp drain
on 12v
DC and weighs in at only about 4 kgs/8 lbs, ideal for DXing at
Seefontein or
from your car.
It can also have various filter options and can be assembled yourself
at a
cheaper price if you want to. This saves about $200 and requires no
soldering, just component assembly that some do in 4 hours.

The only drawbacks I can see is that it doesn't have the marvellous
spectrascope of the top end Icoms and coverage starts on receive only
at 500

Khz, so LW DXing is out = pity!

Receiver test data 080215
from
S = Sherwood http://www.sherweng.com/table.html
P = Passport
Q = ARRL QST mag

2/5 KHZ DYNAMIC RANGE NARROW SPACED

dB
101S Elecraft K3 (with 200 Hz roofing filter)
100P/85S Icom IC-R9500 (100P is at 5 khz and 85S is at 2 khz
spacing)
96S Flexradio SDR 5000
93Q Flexradio SDR-1000
82S AOR7030
80S Icom R7800
78S Icom R781
78Q/75S Icom IC-R756 PRO III
77Q/75S Icom 756 PRO II
77P Drake R8A/B
77S NRD 515
75S Drake R7
75S WJ-1000
74P WJ-8711
71S Icom 756 PRO
71S Drake R8
68S/66P NRD545
67S Icom R75
67S Drake SW8
64S Yaesu 7700 (similar to FRG7)
63S Yaesu FT2000
62S Icom R70/R71
55P Eton E1 portable
46S Ten Tec 340
43P WinRadio 313i

Why these specs are of interest to listeners is that the number of top
end
receivers is fading fast, so the only alternative is to look for a
value for
money transceiver that will provide all the best that modern radio
technology can offer.

Have fun and good DX

John Plimmer, Montagu, Western Cape Province, South Africa

"HD" Radios ! - The Un-Qualified Comments by a
Simple Consumer of 'Free' Over-the-Air AM & FM Radio
http://groups.google.com/group/hd-radio/msg/04065b770e048027

On Feb 18, 3:50 am, Kenneth Isham <kis...@attglobal.net> wrote:
Point-of-Fact : Consumers Are Buying "HD" Radios !
- How Is This Bad News For "HD" Radio ?
http://groups.google.com/group/rec.radio.shortwave/msg/5b6895e5674967b4

= = = S N I P = = =

- Unless the radio stations can improve content and sound quality.

Radio Sound - See # 5
5 - FM "HD" Radio is not about better Audio Sound :
It is about a Second 'Sellable" Audio Stream [HD-2]
for the Radio Station to Market to Consumers and
Sell to Advertisers. {Radio It's About Business.}

IMHO - "HD" Radios sound quality is 'good enough' for
the vast majority of Radio Listeners. How much better
can a Radio sound in most moving Cars and Truck;
and in the average Room in a Home.

Reality Sucks - Radio Listeners are Lazy Audio Content
Consumers. It can't get much eaiser than Radio. Buy
a Radio and plug it in. Turn-It-On and Tune-it-In and
Just Listen. Now Extra Costs and Not Extra Work.

Radio Content - See # 6
6 - What FM "HD" Radio needs is a Killer Application to make
the HD-2 Radio Audio Stream "That Something" that Radio
Listeners {Audio Consumers} both WANT and NEED !

IMHO - "HD" Radio {Digital FM Radio} needs new HD-2
Audio Content that is marketable to Radio Listeners and
Sellable to to Advertisers. To first Maintain and then to
Grow their Market Share in the Age of New Media.

- More and more people will switch to Sirius or XM or just
- use the CD or I POD/MP3 connections included with
- most new car sound systems.

Sirius and XM Satellite Radio require Extra Cost and some
Specialized Equipment.

BONUS - Your Homes [Hidden] Source of Digital Audio :
Most American Consumers already have a Second Audio
Source within their Homes that is Commercial Free Audio
and it comes to them in the form of Cable TV or Satellite
TV "Digital" {Can We All Say "HD"} Sound. Usually 40 or
More Digital {TV} Audio Channels to 'choose' from; which
is on the Average more than most Metro Area Radio 'choice'
options available to Free Over-the-Air Radio Listeners.
Presently these Digital {TV} Audio Channels are limited to
Music; but if they Added the Big-5 Talk Radio Networks to
their Line-Up It could attract many more Radio Listeners to
the Digital {TV} Audio Channels. Note - The Big-5 Talk Radio
Network Audio Streams would NOT be Commerical Free.

- I am going to be one of them.

Good - That is Your 'Choice' that you have to make for yourself.

- I wasted over $175 on the Sangean receiver to discover not
- only the sound causes me to shut it off after a half hour,
- but the secondary content is throw away on most of the
- stations except public radio offerings.

Tell Me About It - I Live Beyond the AM/MW "HD" Radio
10 mv/m Contour and FM "HD" Radio 64 dbu Contour.
How Do You Spell "HD" Radio Out Here : NO SIGNAL !
and DROP-OUTS ! - {The Blinking Blue Light}

YES - Presently FM "HD" Radio has not 'found' a KILLER APP
for their HD-2 Digital Audio Streams.

- I have several co-workers who have and love their sat.
- receivers and the sound is much improved over so called
- HD-sound. I can enjoy listening to Sirius's offerings.

-IF- XM and SIRIUS Satellite Radio is Your Thing - Enjoy It !

- I used to listen to a AM-stereo station that to my ears
- almost matched the fidelity of the FM stations. Now that
- it switched to the HD broadcast it sounds like listening to
- the MUSZAC offerings while being put on hold on the
- telephone on my analog receiver.

Yes - AM "HD" Radio presently has both Audio Processing
{Sound Quality just Does Not Sound Right} Problems which
can be Fixed and Co-Channel Interference Problems which
Only will be Fixed {Masked} by Consumers Using new "HD"
Radios versus older Analog Radios; at least in Metro Areas
where the "HD" Radio Signals are Strong and the vast majority
of Radio Listeners are listening to 'Local' Radio Stations.

Once Again Reality Sucks : The Technical Solution to the
Interference heard by most AM/MW Analog Radio Listeners
is a 'New' "HD" {IBOC" Radio. It's Digital Technology functions

in a manner that allows for a 'cleaner' Digital Signal to be
Heard then the 'dirty' Analog Signal that IBOC Creates.

OOPS ! - Another one of "HD" Radios 'dirty' Little Secrets :
As more AM/MW & FM Radio Listeners {Audio Consumers}
start to experience IBOC Interference on their old Analog
AM/FM Radios : They will be told to Up-Grade to newer
"HD" Radios and that will solve their Problems : And It Will
-if- They Live in Metro Areas with Good Local Reception
-and- They Only Listening to 'Local' Radio Stations in their
Area.

These Local Area AM/FM Radio Listeners : Who Do In-Fact
Simply Listen To Local AM/FM Radio are the Vast Majority
of Radio's Audio Consumers and most likely add-up-to 95.5%
of all Radio Listeners Nation-Wide in the USA. Even -if-
the number was 68.3% that would mean that 2-out-of-3 of
American Radio's Audio Consumers would be better served
by "HD" Radio. {At Least on Paper} This is what the Radio
Broadcast Industry {Corporate Media} is Selling and the FCC
is Buying into with iBiquity IBOC Scheme.

- The Sangean cannot decode the HD content at all and the
- analog portion is also much like my previous description
- of auto receiver.

I don't have an Answer for either.

- There is nothing currently on local radio especially HD
- to me spring for a new HD receiver.

IMHO - That would be a Good Short Term (1~3 Year) Decision;
and during that time frame XM or SIRIUS Satellite Radio may
be your easier Audio Consumer 'Choice'.

Ken I.

John, pardon the top post here. glad i'm not the only one watching this receiver. it sounds and reads terrific. but, i'm waiting for someone else to try it first, before i make my move on one. i'm also watching and waiting for the new AOR replacement for the 7030. Mr Thorpe and friends are working their magic in the UK again. so, i just may hold out for the new receiver from AOR-UK. BTW, the last time i heard the term "yobo", was about 20 years ago way north of you.

Drifter...

I have one-- the no tuning knob is a downside. But everything else is
just about perfect. Too bad we can't add a tuning knob!

Sorry, should have been more clear--they're not broadcasting *on* WWV,
but *over* WWV's frequency. :D

Is that not true? I think I read that somewhere, but perhaps I just
imagined that.

4376. IBOC : The Present Day Media Corporations that Focus Solely on Radio Broadcasting may be Dinosaurs in the Making

Point-of-Fact : Consumers Are Buying "HD" Radios !
- How Is This Bad News For "HD" Radio ?
http://groups.google.com/group/rec.radio.shortwave/msg/39dabdf90232868d

- S N I P -

- I understand this, but you must understand that the current
- problems facing broadcasters, which are in no way addressed
- by HD radio, are also deeply entrenched.

Steve - That is True.

- An HD bandaid isn't going to solve the industry's problems.

Steve - That is Equally True.

- And the public's acceptance of HD radio will be a function
- of its acceptance of other forms of radio, which have sound
- business models and superior programming.

I do not know of any New Media Business Models that
actually produce the Income Streams that present day
AM & FM Radio do - Enlighten Me Please !

- The idea of a "second audio stream" is absolutely quaint
- at this stage. Surely no one is resting their hopes on this.

Takes and Existing Franchise (Radio Station) and creates
a new Income Stream with greatly reduced Capital Cost :

Potentially Expands the Income and Inceases Profits.

- No, but the fact that it doesn't address problems that
- are genuinely pressing for the industry suggests that
- it will either fail or few people will notice one way or the
- other.

Actually -imho- It is hard for IBOC "HD" Radio not to succeed
as part of the declining Media which is AM & FM Radio.

"HD" Radio may simply keep the Patient Alive Longer
-and- At-the-Same-Time allow the present AM & FM Radio
Broadcasts {Media Corporations} to Expand into 'New'
Media themselves.

The present day Media Corporations that Focus Solely
on Radio Broadcasting may be Dinosaurs in the making.
* They now have to begin [ASAP] to View Themselves
as Pan-Media {All Forms of Media} Corporations; and not
simply as Radio Broadcasters {Radio Station Owners}.
* They have the Financial Where-with-All and Expertise
to Transistion and Transformer themselves into what they
need to be : To Be in Business for the next 50~75 Years.

Examples of Dinosaur Business Thinking :
* Railroads did not think of themselves as a Transportation
Business and naturally expand into the Airline Industry.
* Kodak though of itself as a Photo Company and naturally
not expand into the Imaging {Zerox} Industry.
* Silicon Valley was born because AT&T and IBM thought
that their business was their business and they both lost
business and market share as a result of that thinking.

Well, we have no way of knowing what you read, but, although -anything-
is possible, it seems unlikely for the following two reasons.

First, why would they (the pirates) transmit on a frequency that is
already occupied by multi-kilowatt transmitters 24/7 (WWV)?

Finally, the government takes a dim view of pirates already; why would
the pirates -really- try to incur the wrath of the government by jamming
a government service?

But again, anything is possible, I suppose...

4379. IBOC : Wishing That IBOC Will Fail : Ain't Going to Make IBOC Fail

- - On Feb 18, 2:08 am, RHF <rhf-newsgro...@pacbell.net> wrote:

- S N I P -

- - Steve - I don't have to be For -or- Against Something
- - to Honestly Evaluate It. Wishing that IBOC and "HD"
- - Radio will Fail : Ain't Gona Make It Fail.

- No, but I get the sense that you are wanting to promote
- HD radio simply because you're posting about it here,
- on a shortwave group.

Actually from a Google perspective this Message Thread
begain with the Post by IBOCcrock :
"Consumers, Wall Street Not Buying HD!"
http://groups.google.com/group/rec.radio.shortwave/msg/245cef54a0f5da19

IBOCcrock has Posted around 750+ Messages related
to IBOC, and may be about 250 of those Messages that
He has Originated were about IBOC with an Anti-IBOC
Theme / Slant.

BUT ONE DARES TO CRITICIZE HIM FOR DOING SO
-because- Even though IBOC Ain't Shortwave Radio almost
Everyone here on Rec.Radio.Shortwave Newsgroup just
Loves-to-Hate IBOC "HD" Radio -because- It Does Destroy
Much of What is Left of AM/MW Radio DXing.

=But= Wishing that IBOC will Fail* : Ain't Going to Make
IBOC Fail +plus+ As others here have stated the is
Significant Radio Broadcaster $upport at the Corporate
Media Level for IBOC and the FCC $upports IBOC too.
* Hard to Fail when both Corporate Dollar$ and the US
Government Dollar$ are behind IBOC "HD" Radio.

- That's your prerogative, but I personally don't get it.

I Don't Have To Like It {Yes IMHO IBOC $ucks} :
To-Get-It ! {IBOC Most Likely Is Here To $tay}

- - IBOCcrock presented some 'numbers' and claimed
- - that those 'numbers' met that IBOC "HD" Radio is
- - Doomed to Failure : Those same Numbers can Mean
- - a Slow and Steady Growth for IBOC "HD" Radio for a
- - Decade of more. -ps- You don't have to like the Numbers
- - to give them an Honest Look.

- Giving the numbers an honest look means looking at more
- than the numbers themselves. It means looking at the
- development of Wimax and the fate (good or bad) of satellite
- radio. It means looking at the fact that HD doesn't address
- any of the real (i.e., programming) problems that explain the
- current sad state of much commercial broadcast radio.

I simply presented a Set-of-Numbers {a possibility} that
-if- they occured could show a slow progressive time-line
to the Public Acceptance of IBOC "HD" Radio as a
Transitional Evolution from Analog Broadcastion to Digital
Broadcasting in the same sort of disorderly process that
marked the change of from AM {Only} Radios to AM/FM
Radios and the follow-on change from AM/FM Radios to
AM/FM-Stereo Radios and the Oops of AM-Stereo Radio.
[Things Happen -and- Not Necessarily for Good Reasons.]

-ps- History Often Repeats Itself and this Time Radio
Broadcasters at the Corporate Media Level and the FCC
at the Federal Government Level are Helping IBOC "HD"
Radio along like they never did for : FM Radio; FM-Stereo
Radio; and they seem to have learned the Lesson of the
Failed AM-Stereo Radio.

- If broadcasters had vision, we wouldn't even need to be
- talking about HD.

What they may lack in "The Vision Thing" (1) they make up for in
the Economic Interest (2) and Public Image Making Thing (3)
along with Capital Resources (4) and their Political Muscle (5).
[Four-out-of-Five Ain't Bad = $U¢¢E$$]

That (SP3) is ONLY for Current Boxes with XP on them;

If , down the road a bit, you want to get a PENRYN or NEHALEM Powered
PC, your (Currently) stuck with Vista

(More below)
~~~~~~~~~~~~~~~~~~

Posted by: tuxinator at February 17, 2008 05:56 AM

I've used all windows variants from 2.0, and with only a few
exceptions haven't had major issues with any

of them. And I've NEVER written anything about software good or bad
anywhere until now. This is my first

ever post anywhere on the 'Net. Neither have I used Vista, but have
fixed about 8 PCs with Vista installed

ex-shop. All have complained about slowness - bootup, software loading
and general use:

even on one high-end Core Duo 2.0gHz machine.

I'm planning to stay with XP until it falls over from old age. Mine's
a P4 2.8, 1.5gb RAM, 180GB

SATA HDD, etc etc. Was latest tech when I bought it about 2.5 years
ago, so I think it'll last for a

while yet. (Proviso being part availability.)
~~~~~~~~~~~~~~~~~~

If there's not something less of a HOG than Vista around at the time
I'll seriously look at an

Open Source alternative, even though I haven't got a clue on
installing and configuring

it at the moment. HOG used to mean "Harley Owners' Group", but now
seems to have been overshadowed

by Vista.

Why oh why did Microsoft release such a load of rubbish - I know it's
money, shareholders demand ROI,

but MS is operating like it believes no other person's opinion matters
except its own.

Point-of-Fact : Consumers Are Buying "HD" Radios !
- How Is This Bad News For "HD" Radio ?
http://groups.google.com/group/rec.radio.shortwave/msg/747fe103c031959d

- Satellite Radio did 5 million units the first year
- that both companies were on line.

David,

Direct Satellite Radio Broadcasting is New and Exciting and
had no established User Base of One Billion AM/FM Radios.

Reality Sucks - AM/FM Radio is Boring and something that
Audio Consumers consider as being just there for free.

- By that measure HD is a total flop.

David - That would be True and may be True
-but- Wishing It True -doesn't- Make It True :
Within another 3~5 Years everyone should know with
some degree of certainty whether IBOC "HD" Radio

will gradually be accepted as the 'standard' AM/FM
Radio -or- We will Know that "HD" Radio spells F-L-O-P !

- Sirius still sells more radios in 3 months
- than HD has since its inception.

IBOC -aka- "HD" Radio could take a few Pages from
both XM and SIRIUS Satellite Radio's Play Books.
{Marketing Plans for a New Generation of Audio
Consumers.}

As a Matter of Fact : IBOC -aka- "HD" Radio should be
looking at all New Media to see what Lessions there are
To-Be-Learned in the 21st Century to Market IBOC "HD"
Radio to the Next Generation of Audio Consumers.

This is a Dynamic Change {Paradigm Shift} in the
American Listening Audience : For Years with Radio
as our Primary {Only} Audio Enterainment Option :
We could be rightfully called "Radio Listeners" :
Today with Many Diverse Audio Enterainment Options :
We should be rightfully called "Audio Consumers".

IBOC "HD" Radio must compete for the Ears of
America's Audio Consumers and this is especially
true of these younger {newer} Audio Consumers
who did not grow-up with Radio as their Primary
{Only} Audio Enterainment Option; as many of
"US" old-time Radio Listeners did; back in the day.

4386. FS: ICOM IC-R75 Communications Receiver **PRICE REDUCED**

Newsgroup: rec.radio.shortwave
Date: 2008-02-19 01:39:47 UTC
From: Blair M <blairm@aci.on.ca>
Message-ID: <45mdneH5QuLGrifanZ2dnUVZ_r-vnZ2d@aci.on.ca>
Source record: 137304

Hi folks. I must say farewell to the following almost brand-new unit. It would seem that I may have been asking a little too much the first go-round. Please see the link for more information:

Toronto, Ontario - $500 Canadian (OBO)

http://toronto.craigslist.ca/tor/ele/569227097.html

This receiver was purchased new in October 2007 from RadioWorld in Toronto, is in perfect condition and has never left my home. The 1 year warranty is still valid, and has 8 months remaining.

"The IC-R75 covers a frequency range that's wider than other HF receivers; 0.03-60.000000 MHz. This wide frequency coverage allows you to listen to a variety of communications including marine communications, amateur radio, short wave radio broadcasts and more".

The advertized specs are as follows:

. Ships with the UT-106 DSP unit installed.
. Coverage: 0.03 - 60 MHz*
. Modes: AM, S-AM, FM, USB, LSB, CW, RTTY
. Pull out the weak signals: The IC-R75 sports cutting edge technology for today's serious DX'er, yet it is easy and affordable enough for casual listener use.
. PC programmable: Get PC control of the IC-R75 with optional RS-R75 software on CD ROM. Runs on Windows 95; or Windows 98 and comes with the necessary connection cable.
. DSP (Digital Signal Processing): This IC-R75 has the optional UT-106 DSP plug-in module allowing AF-DSP. It offers noise reduction, and auto notch filter capabilities.
. Multiple scan modes: 5 Scan Modes are available: program scan, memory scan, select memory scan, priority scan and auto memory write scan.
. Optional filter slots: Two optional filter slots are available - one each for 1st IF (9 MHz stage) and 2nd IF (455 kHz stage).
. Superior receive: With its superior dynamic range of >104 dB, twin passband tuning (PBT) controls, and a large front mounted speaker, the IC-R75 offers unparalleled receive quality.
. Easy to use: IC-R75's large, backlit, 8 character alphanumeric LCD display is easily readable in low light conditions, and at all viewing angles. The numeric keypad offers direct frequency or memory channel input.

Additional features:

. Selectable RF gain/squelch control
. Attenuator
. 1 Hz tuning resolution

. 2 level preamp
. Selectable AGC
. Three timer functions: sleep, power OFF, power ON
. Noise blanker
. Single touch controls
. 12 V DC Power (120 V AC adapter included)
. Voice synthesizer (optional)
. 99 memory channels plus 2 scan edges
. Triple conversion superheterodyne receiver

Gosh how noble of you! Unfortunately it is too late to undo the staggering amount of damage you've done to this newsgroup. Your megalomania long ago drove away most serious shortwave enthusiasts whose top notch contributions made this group such a valuable resource for the hobby.

But what else could be expected from a retired government bureaucrat - more ot the parasite killing the host.

My Collins dictionary says "yob" is boy spelt backwards and refers to
"an aggressive and sultry youth" Although my youth has long since
departed me it also refers here to a drunken roustabout whose brain is
about the size of a pea. From my ten years as a pick and shovel miner
(still have my blasting license from 1955).

Ya Drifter - if Mr. Thorpe works his magic again that will be great,
but I may not be around long enough for that great day.

cuhulin the K3 works just fine in my model T, just have to have a 12v
battery.

What's the point? This has nothing to do with the minor costs of HD. In fact, Clear cleared it's last hurdle by getting DoJ approval of its LBO.

Oh..the Humanity!

In reality, RHF merely wants to be helpful. It's the fact that he has
too much time on his hands is what makes it somewhat irritating.

Now, having said that, he's quite pleasant in comparison to a few others
in these here parts.

A slight irritation is nothing compared to massive abuse.

I think you possess a high enough level of intelligence to understand
the situation if you try hard enough. It is not what you described above.

If other's need to have this pointed out I wonder if they are ready
for enlightenment. As far as 'helping the newbies' goes; a short
paragraph or two of what to and what not to expect and a link to the
SPPEDX site http://users.tellurian.com/slapshot/speedx.html will go
far in helping them learn about the hobby and allow them to grow and
positively participate in this newgroup and allow greater reward from
the hobby.

Okay, I'm stepping down from my soapbox now.

Okay, I'll give you the first point but disagree on the second one.
To me, his writing style is too darned hard to sift through and he
overly pads his links sections with links to his Yahoo group - which
has been dismal in terms of info everytime I've visited it. My new
offering to those who are new is one link:
http://users.tellurian.com/slapshot/speedx.html
This site has a wealth of info, via links that are listed according to
topic.

>Now, having said that, he's quite pleasant in comparison to a few others
>in these here parts.

Being pleasant and being helpful are two different things.

>A slight irritation is nothing compared to massive abuse.

What's worse, one quick slice of the knife or a thousand small gashes?
Still working on the answer to that one myself, though I think the
analogy has relevence.

Question for you: With DXAce gone and Tracy whose last name I forget
not regulars here anymore with whom shall you cross swords?

If "succeed" simply means destroying analog AM and despoiling a big chunk of spectrum, sure. However, if it means surviving and flourishing as a business, it has no chance and does not even appear to have been intended for success.

>
> "HD" Radio may simply keep the Patient Alive Longer

Well, you can extend the series still further and eventually you'll
have more HD radios being sold each year than can fit within the
confines of the earth and its atmosphere; but I just don't think it's
gonna happen.

> -ps- History Often Repeats Itself and this Time Radio

If success here means a quick, short term profit for the parties whose
necks are most on the line, then sure. If it means anything more than
that, no way. And I guess this is frequently what results when vision
is lacking.

What's going to be interesting is to see where the "vision" is with other, alternative media. Long after people have ceased thinking about or even remembering HD radio, what will pique their interest and capture their imaginations? Darn, where did I put that crystal ball?

4417. Re: LW/MW preselector update

Newsgroup: rec.radio.shortwave
Date: 2008-02-19 07:56:10 UTC
From: Pete KE9OA <p.gianako@comcast.net>
Message-ID: <MsOdnexYyqoSFifanZ2dnUVZ_uGknZ2d@comcast.com>
Source record: 137335
Body handling: HTML body converted to readable text

I just wired up the new unit with the wide range tuning capacitor. It measures from 14pf to 1600pF. The tuning is a little bit skewed towards the low end, so I am going to wind a MW loopstick and see how low I can tune with it. In my original prototype, I used a high Q tuning cap that had ceramic standoffs for the stator plates. The new cap has a much higher Q, as evidenced by the 10dB increase in RF output. The final version may need a Q spoiling control. A vernier drive will definitely be required for tuning. Still a bit of work to do.....I think the enclosure for the RF unit will be fine, but the enclosure for the loopstick will need to be an injection molded structure and will consist of a clamshell affair that can be screwed together. This will make it more manufacturable. I am using PVC pipe for the prototype units. Last night, I wound a loopstick for the 1.6 to 5.4MHz range. It was nice to be able to null out that interference on 60 Meters. Oh well.....time to go to sleep!

Pete

- listening public.

Today is all I have - Who Truly Knows . . .
What The Future May Bring.

- Other media offer thousands of audio streams.

But 'Free' Over-the-Air AM/FM Radio is so easy to acces
and Listen to;and for me it is a technology that I 'feel'
comfortable with. Maybe a younger Consumer of Audio
will find and use all those thousand of Audio Streams
-but- Not 'i' in the Digital Here-and-Now.

- - Actually -imho- It is hard for IBOC "HD" Radio not to succeed
- - as part of the declining Media which is AM & FM Radio.

- If "succeed" simply means destroying analog AM and
- despoiling a big chunk of spectrum, sure.

For the Media Corporations who own "The Franchise"
{AM & FM {Radio Stations} and for the AM & FM Radio
Listening Public who simply Listen to their Local Radio
Broadcasting : Your Statement Has No Value.
* The "HD" Radio Stations will have a Sellable Product

that they believe is better than old Analog.
* The "HD" Radio Listeners will have an Audio Product
that they believe is better that the old Analog.
+ To Both Groups Destroying 'old' Analog AM Radio will
be a Good Thing "In The Name of Digital Progress"
- A Big Chuck of Spectrum is something that Your
Basic Radio Listener does not understand :
They Know the AM and FM Radio Bands and the
Value that they place on them is the : 2, 3, 4, 5 or
maybe 6 Local Radio Stations that : "They Call Their Own".
Radio Listening : It's About 'Choice' : It's About "Me"
It's Can Be A Selfish Act -especially- When the Radio
Listener puts on a Pair of Headphones and Isolates
Themselves {IN} Their Own Little World {Audio Cocoon}.

- However, if it means surviving and flourishing as a
- business, it has no chance and does not even appear
- to have been intended for success.

That is clearly not My View of the Future of "Free"
Over-the-Air AM & FM Radio : I Believe [Have Faith]
that "Free" Over-the-Air AM & FM Radio will be around
for many more Years; and that a Significant Number
{Large Percentage} of Audio Consumers in the Future
will 'choose' "Free" Over-the-Air AM & FM Radio as
one of their major {if not their primary} sources of
Audio Entertainment.

- - "HD" Radio may simply keep the Patient Alive Longer
- - -and- At-the-Same-Time allow the present AM & FM
- - Radio Broadcasts {Media Corporations} to Expand
- - into 'New' Media themselves.

- My guess is that HD radio will be a form of euthanasia.
- It will quicken the overall decline.

That would not be "My Guess" -but- That is just a 'guess'
for I am only a Simple Consumer of "Free" Over-the-Air
AM & FM Radio.

- - Examples of Dinosaur Business Thinking :
- - * Railroads did not think of themselves as a Transportation
- - Business and naturally expand into the Airline Industry.
- - * Kodak though of itself as a Photo Company and naturally
- - not expand into the Imaging {Zerox} Industry.
- - * Silicon Valley was born because AT&T and IBM thought
- - that their business was their business and they both lost
- - business and market share as a result of that thinking.

- I would add HD radio to the list.

- Well, you can extend the series still further and eventually
- you'll have more HD radios being sold each year than can
- fit within the confines of the earth and its atmosphere; but
- I just don't think it's gonna happen.

Dang you read my Play Book -and- As a Matter-of-Fact :
The Earth Itself will be make entirely of "HD" Radios.

- If success here means a quick, short term profit for the
- parties whose necks are most on the line, then sure.

Like Tomorrow - Future Profits are Promised To No One.

- If it means anything more than that, no way.

time will tell - Yes Only Time Will Tell !

- And I guess this is frequently what results
- when vision is lacking.

I Trust that the Radio People : Know the Radio Business.
Some Do It Well and naturally some do it poorly.

Their Challenge is to Leverage their current Media
Market Position and Capital Investment -into- a
Future diversified Pan-Media Market Position and
secure their Capital Investment across a broader
array of Media Ventures {Stay In Business}.

- What's going to be interesting is to see where the
- "vision" is with other, alternative media.

That is something that I do not focus on.

- Long after people have ceased thinking about or
- even remembering HD radio, what will pique their
- interest and capture their imaginations?

Ah - You have 'interests' beyond mine. - Alas I am
simply a Consumer of "Free" Over-the-Air AM & FM
Radio and nothing more.

- Darn, where did I put that crystal ball?

We're not talking about what the precise temperature will be in
Sacramento on Aug 3, 2056. It's more akin to whether the earth will
still be revolving around the sun in 2056, or whether helium atoms
will still contain the same number of protons.

Again, this is true today but in the not-too-distant future the
landscape could look very different. And with HD your access might not
be as easy as you think unless you live a block away from the station.

They don't believe that it is better than analog, unless "better" =
"more likely to make them lots of money in a hurry"

> * The "HD" Radio Listeners will have an Audio Product
> that they believe is better that the old Analog.

There may be a handful of people who believe this, but that's it.

Anyone know where I can buy a Sony ANLP-1 antenna? Apparently like a
lot of Sony SW stuff, it's no longer being made. But perhaps it's
available from some small retailer somewhere.
Thanks

4424. The Death of the Ubiquitous Cheap Radio

If any of you doubt that the FCC wants to kill free radio, read on:

"Analyst: XM+Sirius+HD is likely.
Stifel Nicolaus analyst Blair Levin thinks it's likely the FCC will require such a mandate as part of its approval of the deal, as well as a requirement that any new receivers include terrestrial HD capabilities. Meanwhile, U.S. Electronics is pushing the FCC to hold a summit among a number of parties citing a "newly emerged consensus" that a combined XM-Sirius be required to make their receiver technology "open" allowing more choices for consumers. Among those backing the requirement are iBiquity and the HD Digital Radio Alliance."

12 Watts is more like it. If that ICOM spectrum scope uses 150 Watts it
needs to be rethought. Does the KW have an IF output?

The ANLP-1 doesn't use 'mounting brackets' -- it's the round pop-open
portable unit. There is someone on ebay selling new ones continuously.

A few years ago, there were reports of somebody who would periodically shout
"Hola!Hola!Hola!" over one of the WWV frequencies. I never heard Hola Man
but I never tried searching him out, either.

And, if Hola Man was transmitting outside the US, he didn't have to worry
about the FCC.

"Regarding the Technical Aspects of the SDARS Providers XM and Sirius"

"There are significant differences in certain technical aspects of the
two SDARS systems as deployed by XM and Sirius. The systems as
currently deployed are not interoperable. That is to say, an XM
receiver cannot receive the Sirius signal and vice versa. Thus, as is
true today, if the proposed merger of XM and Sirius were consummated,
consumers would still need to purchase a new interoperable receiver in
order to receive the signals of both providers. These differences in
system operation, function, and structure make the design and
implementation of a single unified and interoperable receiver both
complex and expensive. In fact, both XM and Sirius have been working
in a joint venture to develop an interoperable radio since 2000. At
this time, no interoperable radios have been introduced into
commercial production."

It should be on the market soon.....as many of you have guessed, Palstar is going to be putting it into production. I was hoping that I would be able to cover longwave and medium wave with one loopstick, but it looks like it will take two of them to cover the range.
I tested the longwave loopstick this morning, and it covers 85kHz to 500kHz in one band. The Loran station on 100kHz was coming in at S9 +20dB. Now that the prototype is completed, I will be doing a board layout that will use the MW550P enclosure. This way, the same mounting hole pattern, switch placement, etc, can be used. This thing has so much gain that it will be necessary to have a switchable attenuator after the output amp. This performance is with the 1/2 inch ferrite rod stock.....I can't wait until the 5/8 inch stock comes in!
I was just talking to Paul this morning.....he tells me that there are many people that would also like this thing to cover the shortwave bands. It seems that when you get above 5 or 6MHz, the nulls aren't quite as deep. I will investigate this further. I think if I can get longwave through 6MHz, that should be good for a start.

"Satellite Radio Facing Bankruptcy?"

"Satellite radio companies have been suffering heavy losses - and
plunging stock prices - even as they continue to add subscribers. And
a front-page story in Tuesday's Wall Street Journal warns that the
worst may be yet to come... Industry leader XM Satellite Radio
Holdings Inc. lost $667 million last year, and rival Sirius Satellite
Radio Inc. lost $863 million. The big losses have shaken investor
confidence in the industry. XM shares have lost 71 percent of their
value this year, and Sirius shares have lost 51 percent... For one
thing, a substantial number of people who buy vehicles with pre-
installed satellite radios don't activate them, nor do many who
receive a radio as a gift. It's estimated that 10 percent of all store-
bought radios given as gifts during the last holiday season were never
activated. Also, those who do subscribe often abandon the service
after a period of time, some switching to iPod adapters to provide
music in their vehicle."

Alternatively, give this a try.

http://www.kubuntu.org/announcements/6.10-release.php

It's also based on the Debian distribution and you can add a Gnome
desktop once you know what you want.

People should be aware that most Linux installs put a new boot block on
the first drive.

You have a choice if you want to start Linux or the Windows installation
you now have. You can either partition your existing drive or just
install another one. The prices on hard drives have come down
dramatically in the last few years.

A person can try it before installing anything by running it from a self
loading CD. Naturally, the cd is a heck of a lot slower than a hard
drive, but at least you get to play without committing.

From another site:
==========
The desktop CD allows you to try Kubuntu without changing your computer
at all, and at your option to install it permanently later. This type of
CD is what most people will want to use. You will need at least 192MB of
RAM to install from this CD.

http://releases.ubuntu.com/kubuntu/6.06/
==========

"HD Radio is trying to kill the wrong technology"

From today's news:

WASHINGTON -- January 29, 2008: HD Radio developer iBiquity Digital
asked in an earlier ex parte filing with the FCC that a merged XM
Satellite Radio and Sirius Satellite Radio be required to include HD
Radio technology in all satellite radio receivers, and now the HD
Digital Radio Alliance has made a filing with the FCC in support of
that request.
(Isn't this old news?)

The FCC will never, ever do this, of course. You could file all day
and in a rainbow of colors and it won't make a difference.

When push comes to shove, this merger will be going through. And it
will go through without a "tip of the hat" towards HD radio. But as
symbolism goes, it's symbolically symbolic.

Satellite radio is making it tough for HD to find a spot on the
dashboard, the argument of the HD radio folks goes, which is probably
true.

But what's more true is that the presence of terrestrial radio is
really what makes a spot for HD impossible on that same dash.

Get this straight: HD is viewed as redundant to radio. It is the
current AM/FM bands that are hogging the spot in which a newfangled HD
radio would otherwise sit.

The HD folks are trying to kill the wrong technology.

"Chrysler to put WiMax into its cars"

Recommend article:Detroit (MI) - Chrysler is working on what the company calls "advanced in-vehicle wireless communications" that will be based on cellular, Wi-Fi and WiMax technologies.

Chrysler may have been a bit slow adopting electronic gadgets for its vehicles in the past few years, but the company plans to be on the forefront when the next wireless technology is rolled out.

"We recognize that customers are spending more and more time in their vehicles, and that the automobile is becoming much like an additional room in the home or office," said Frank Klegon, executive vice president for product development at Chrysler. "To address this evolving reality, Chrysler vehicles will soon boast an unprecedented level of vehicle connectivity, delivering a wide array of important communications features directly to our customers, in their vehicles." Chrysler believes that wireless connectivity will also increase the security of cars.

In fact, specifically the intent to integrate WiMax into cars comes very early, even before the technology has become generally available to business and home users.

So, what exactly is WiMax expected to bring to the driver and passengers of a car? Of course, general availability and a greater bandwidth than cellphone networks makes this technology an attractive tool to increase data communication: Chrysler envisions that future GPS systems will feature satellite imagery downloaded from the Internet as well as automatic wireless map updates, real time weather information. Downloads to in-car entertainment centers can also include service reminders, Internet search, e-mail access, and online shopping - which will include the availability of fee-based multimedia content. On the service side, an always-on broadband connection could be used to download software patches to virtually any electronic module in a car.

"Chrysler's in-vehicle communications strategy will continue to focus on creating a safe-driving environment through practical innovations, while enabling customers to choose a variety of features they want," said Klegon.
"Chrysler's connectivity solutions will deliver simplicity, security, freedom and flexibility," the executive promised.

He said that Chrysler, Dodge and Jeep vehicles will be getting WiMax connectivity "over the next few years."

WiMax services are expected to be rolled out in the U.S. this year.

http://www.tgdaily.com/content/view/35601/145/

The other automakers will have to follow-suit - then, satrad and HD will have no chanvce.

It's just the tail end of the dot.com bubble.

Why they had confidence in the industry in the first place is a mystery
to me. Early on, before the days when everybody has broadband, when you
went to the XM web site, you found that each page was megabytes of graphics.
That showed me that those folks were all "marketing" types taking deep sucks
off the dot.com bong and were serious addicts of the new.economy bullcrap.
Ooohhhh. Marketspace... How many Lexus's were in their motorpool.

When ham rigs with the 30 meter band started showing up, it was common
to hear a lot of stuff zero beat to WWV. Sometimes just "testing testing",
but it was also a common calling channel for expat Vietnamese freebanders
trying to call home. "Hellooooo Vietnaaam" in a strong asian accent.

Well, if I wanted to annoy said government, and had some funny ideas
about how to go about doing that, and was pretty sure I wouldn't be
caught in this lifetime, I might do something like this.

-►Welfare babies, greasy diners and other tidbits

Yes it's Emerson and yes I'm back to express my opinions on several hot topics germane to the here and now. First, nigs on welfare. Because these women can't seem to understand the concept of using birth control and because they appear all too eager to spread their legs for any Tom, Dick or Demetrius, our government is left footing the bill for the resulting future car thieves. A solution? Cut off all benefits after 1 year. Educate the ones who want it so they can find a real job and above all, keep up with current affairs in our nation's welfare program. There is no shortage of liberal ass polyps in suits out there lobbying for even more rights for these lazy sloths.

Next up, greasy diners. I've eaten at my fair share of them while out on the road and for the most part, they offer a pretty good selection of Americana food however it was my recent misfortune to run across a diner named "Juanito's", a former 1950's shotgun style home converted into a Mexican diner. "I'll take the enchilada special" sez I to my clearly brain dead waiter. What the heck. I'll try it and see how they are. Bad move. Within 30 minutes of ingestion, I found myself cutting high- pitched farts with a serious side affect. They were wet ones. I was given a most unwelcome squishy reminder of my meal when I rose from my booth to pay the little mongrel behind the counter and walk out to my car. I nigger rigged a man kotex out of kleenex and pushed it between my ass cheeks to sop up the remnants of those brown blasts. The moral of the story? Be ready for gastric distress when trying out someplace new, especially if the owners don't have a green-card.

I said it, you read it and I remain....

Here is the only source, of which I am aware, for this antenna new:

http://search.stores.ebay.com/buyfromjapan_AN-LP1_W0QQfciZQ2d1QQfclZ3QQfsnZbuyfromjapanQQfsooZ1QQfsopZ1QQsaselZ54829801QQsatitleZANQ2dLP1QQsofpZ0

According to PASSPORT TO WORLD BAND RADIO Edition 2008, page 205, this dealer is quite reputable and ships quickly. If you desire one of these (and, in my opinion, it is the very best external antenna for compact portable shortwave radios), I should recommend that you act fast. No one knows for how much longer this antenna will be available. Frankly I can't imagine any owner wanting to sell his/hers unless he/she has mistreated and damaged the antenna in some way. I own and use five (5) and I certainly wouldn't sell any of them!

Best,

Joe

Dave,

Whether you view it as 'good-or-bad' : It would appear that
the 'other' Shoe is about to fall . . .

That Shoe being the Great Big Lead-Foot of the U.S. Federal
Government Bureaucracy [FCC]

-IF- The new fully functional AM/FM "HD" Radio is mandated
all it will need is Digital 'Interface" for the XM-SIRIUS Modular
Tuner-Antenna* like the Eton E1-XM Radio has bulit into it.
http://www.universal-radio.com/catalog/portable/0101.html
* Audiovox CNP2000 XM tuner antenna module
http://www.universal-radio.com/catalog/portable/0407.html

Besides AM/FM "HD" Radio -IF- You want XM-SIRIUS Satellite
Radio Pay $50 for the little "XM-SIRIUS Module" and Plug it in;
{Plug-and-Play}; plus pay your XM or SIRIUS Satellite Radio
"ubcription" and you are good to go.

IMHO - XM-SIRIUS should be "Jumping-for-Joy" because
this would make every new AM/FM "HD" Radio and Instant
Plug-and-Play XM and SIRIUS Satellite Radio.

This would bring about a Radical Change in both the
AM/FM "HD" Radio and XM-SIRIUS Satellite Radio
Public Acceptance and Adaptation Time-Lines. ~ RHF

That went well. It started off slow but got to : US $153.51

If I recall, the average selling price on these used was around sixty to seventy dollars. The seller should be happy, isn't that right, 'null'?

Hi John,

Maybe the delay of the IC-7700 to South Africa will be fortuitous for you? It's giving you time to consider the Elecraft K3, I suspect!

I have followed this radio's development "from a distance", and it sounds like the company is applying all the design lessons they learned with their earlier, simpler models. It's great to see them giving FlexRadio a run for the money... the competition is healthy and the radio enthusiast wins out.

I've read most of the eHam.net reviews, and these two tidbits caught my attention:

"The receiver is as good as the ICOM 7800 with the dynamic rage being much the same."

" It's also possible, as I did on Aruba, to hook up the IF OUTPUT to the antenna input of the 756 Pro series, tune the latter to 8215 kHz, and use the Pro as a bandscope (a pretty expensive approach, but it works -- thanks to W0YK for that tip)."

What would customs and duty add to a K3 purchase if you were to buy a fully-built one and had it imported? Perhaps the savings of the "value-priced" K3 + shipping + customs would be enough to let you buy it AND keep the 756 ProIII? That way you could use the ICOM's scope like was described above (although the IC-7700 has a far better scope in terms of zooming levels and resolution).

I'm sure the K3's 12VDC operation and reasonable size and weight are attractive for DXpedition purposes.

Most cable systems are slowly moving away from carrying local FM stations to carrying satellite fed digital radio (the precursors to Sirius and XM). My local companies in Portland, OR did this almost two decades ago, much to the chagrin of many radio listeners in "shadowed" parts of town. Smaller companies started doing this fairly recently, but it's likely all will do so in time, especially once analog TV goes offline, it's doubtful they will carry any analog signals.

Hi Guy,
Thanks for your well thought out and considered reply. The delay in
the IC-7700 is indeed causing me to carefully rethink my options.
Your tip about using it with the 756PROIII is indeed very useful and
thought provoking = thanks for that.

The K3 would land at my doorstep all charges paid at about $2,700,
which is about half the price of the IC-7700. (that includes two
filters and the general coverage option)

I have carefully looked at the specs of the K3 and had eMail exchanges
with Elecraft. The major disadvantage of the K3 is that it will not
tune in 9 Khz steps, a marvellous feature available on the Icoms, and
so necessary for MW DXer's. Also no LongWave, and I do like dabbling
with the LW NDB beacons during winter.

But as you say, it's low current draw, light weight and high specs
make it ideal for DXpeditions.

For the Newbies - Out there looking for an Antenna Tuner
to use with their Random Wire Shortwave Antenna and a
Shortwave Radio / Receiver.

Yaesu FRT-7700 Antenna Tuner for Shortwave Listening (SWL)
eBay Sold Items - http://tinyurl.com/3ypqv5
Usually Bid Out around $85 with a few as low as $60; and
many as High as $100; above $130 is way-too-much.

FWIW - The Yaesu FRT-7700 is a nice compact Antenna Tuner
http://www.universal-radio.com/catalog/commrxvr/frt7700.html
and can be 'adapted' to other Radio / Receivers.
http://groups.google.com/group/rec.radio.swap/msg/07fe68360ee97bf0
* Frequency Coverage : 150 kHz to 30 MHz [Six Bands]
* Can be used with Two Antennas and One Radio / Receiver.
* Can be used with One or Two Antennas and
* * BC DX Output can be used with a AM/MW Radio
* * SW/BC Output can be used with a Shortwave Receiver

imho - they are pretty good antenna tuners
for both shortwave listening and bcl - iane ~ RHF

- Morose? MOROSE?
-
- Do you guys feel REMORSE for having done that?
-
- mike
-

Mike [M II],

Ask John Gorman that was his BLOG's Subject-Line
[Radio: Clear Channel's Buyer's Morose]
http://gormanmediablog.blogspot.com/2008/02/
radio-clear-channels-buyers-morose.html
GormanMediaBlog - http://tinyurl.com/22v8zu
John Gorman chose the word "Morose" -vice- 'Remorse'.
http://en.wiktionary.org/wiki/morose
http://en.wiktionary.org/wiki/remorse

Maybe it was due to the fact that the Buyers had NOT
Gone-through-with-the-Deal and were feeling "Morose".

Where as had the Buyers Gone-throught-with-the-Deal
they would then be feeling "Remorse".

i am getting a 'tense' feeling ~ RHF

Frank, if i remember, that was at 15mg. there were a few post on a few
of pirate web sites on this a few years back. also, when the gov did the
weather and wave thing a few years ago, i remember a few people freaked.
i believe that was 10mg. and that didn't last long either. so, as the
saying goes, when it sounds a little different, just blame a pirate.

GOOD DX!

Good business, Pete. i got a spot for one right here.

side note, was wondering if Dave turned ownership of the
Yahoo Lowe group over to you? a few of the UK posters were
asking who was the mod there. if it's you, ya might want to
drop by the group. spam is starting to get in again. and,
a big thanks for the help on the ar3030. your were right,
it was the diode in the filter set up.

thanks again.

Source record: 137498

Here is Something 'Old' that is Shortwave Radio Related on eBay

TACO "Self-Selecting" Antenna System
http://cgi.ebay.com/_W0QQitemZ250216871337

There is an Interesting Diagram {4th Picture} of the Antenna
and Feed-in-Line arrangement - It appears to be :
* 60 Foot Tip-to-Tip Dipole Antenna with a Center-Piece
[This Dipole Antenna would be roughly cut for ~7.8 MHz]
* 80 Feet of Twisted-Pair feed-in-line; connected to a
* Dual Lightning Arrester and Grounding Block plus more
* Twisted-Pair feed-in-line connected to a
* Matching Transformer to connect to the
* Radio / Receiver's [500 Ohm HI-Z] Twin Terminals

My Guess is that the "Self-Selecting" part of the name
is more Sizzle than Steak - any Other Ideas ?

Note - "TACO" = Technical Appliance Corporaton
located in Flushing New York, NY -circa- 1930s ?
.
NOTICE - BE ADVISED : This is NOT my eBay Auction
and I am NOT Associated with the eBay Seller.
.
PLEASE NOTE : That this Message is being Posted
for Informational Purposes Only { F Y I } .
.
CAUTION - Know your Seller and something about
what they are Selling.
.
-Also- Know something about the Pricing of a New Item
with a Warranty vice a Used Item listed on eBay and
Do Not Over Bid and Item. { Oh No I Paid Too Much ! }
.

Pete [KE9OA],

Some where I read ? saw ? a LW and MW Ferrite Rod Antenna
with both Coils on the same {single} Large {Long} Ferrite Rod.

IIRC - It had a Single Large Coil in the Center and a Pair {Two}
of Balanced Coils at each End of the one Ferrite Rod.

Believe the Ferrite Rod was around 12 Inches long.

Reply to Dave,

The iBiquity IBOC Scheme for AM/FM Radios has already
been worked out.

So what is needed is a 'standard' [Common] Digital Interface
built into the soon to be "New" All Digital Mode AM/FM/DS Radios.

This 'standard' [Coomon] Digital Interface would simply be the
Visual Output using the Radio's LCD Display and Radio's
Knobs & Buttoms as the Control Inputs.

Attach a external Plug-and-Play XM or SIRIUS Satellite Radio
Tuner-and-Antenna Module to one of the 'New' All Digital Mode
AM/FM/DS Radios : And You Are Good To Go Direct [Digital]
Satellite Radioing !

Like It or Not : It Soon May Be A Done Deal : And . . .
That Will Be That [.] -ps- Until the Next Screw-Up !

You could put ten HD radios in every car in America and it wouldn't
make any difference. As technology it is stillborn and as a business
plan it is prehistoric.

"Satellite Radio Facing Bankruptcy?"

"Satellite radio companies have been suffering heavy losses - and plunging stock prices - even as they continue to add subscribers. And a front-page story in Tuesday's Wall Street Journal warns that the worst may be yet to come... Industry leader XM Satellite Radio Holdings Inc. lost $667 million last year, and rival Sirius Satellite Radio Inc. lost $863 million. The big losses have shaken investor confidence in the industry. XM shares have lost 71 percent of their value this year, and Sirius shares have lost 51 percent... For one thing, a substantial number of people who buy vehicles with pre-installed satellite radios don't activate them, nor do many who receive a radio as a gift. It's estimated that 10 percent of all store-bought radios given as gifts during the last holiday season were never activated. Also, those who do subscribe often abandon the service after a period of time, some switching to iPod adapters to provide music in their vehicle."

http://archive.newsmax.com/archives/ic/2006/8/15/175258.shtml

"Regarding the Technical Aspects of the SDARS Providers XM and Sirius"

"There are significant differences in certain technical aspects of the two SDARS systems as deployed by XM and Sirius. The systems as currently deployed are not interoperable. That is to say, an XM receiver cannot receive the Sirius signal and vice versa. Thus, as is true today, if the proposed merger of XM and Sirius were consummated, consumers would still need to purchase a new interoperable receiver in order to receive the signals of both providers. These differences in system operation, function, and structure make the design and implementation of a single unified and interoperable receiver both complex and expensive. In fact, both XM and Sirius have been working in a joint venture to develop an interoperable radio since 2000. At this time, no interoperable radios have been introduced into commercial production."

This group has been great for me over the years, but now I'm short on time and not that interested in what is posted about here. I need to stick with the radio groups as I don't have time for everything else.

Good luck to all of you. Perhaps I'll run into some of you on 20 meters?

Cheers,

Steve

"RAIN: Consumers, Wall Street Not Buying HD"

"So what's the play here? There doesn't seem to be one. The Radio
industry is correct to conclude that they need to make some changes to
start growing again, but they seem to have made a bad bet with HD, and
there doesn't seem to be much percentage in staying the course."

http://tinyurl.com/3cqnyq

Yup, there is no HD business-model. Since broadcasters can't afford repalcing all existing HD hardware, if the 10db FM-HD power increase is approved, HD will fail in-dash. Perhaps, this will be when this scam is exposed, if Congrss doesn't do it first.

I have an HD radio. I use it to listen to my Whole House FM Transmitter
Gold which transmits web radio (which no one listens to).

So, RHF, is it a liberal knee-jerk reaction to call Wainwright a racist? Does blatant use of the N***** word qualify one as being a racist?

This response shouldn't require hyperlinks.

Just curious,

MWBRYANT

Since the article starts with the pending approval of the XM-Sirius merger,
I suppose it could just mean that all new satellite radio receivers might be
required to also carry HD radio.

US Electronics is clearly talking about satellite radio.

Cross-posted to:
rec.radio.shortwave,alt.radio.scanner,alt.radio.scanner.uk,rec.radio.amateur.equipment,rec.radio.amateur.homebrew

This group has the most complete collection of modifications, usage tips, links to related websites, documentation, and photos along with a user survey and a message forum (5000+ messages archived) to help you get the most fun and DX out of your Realistic / Radio Shack DX-394, DX394, DX 394 LW/MW/SW scanning receiver.

About 100 mods and tips now listed - more mods than for any other general coverage receiver! Thoroughly documented with a Master Index. If you like to tinker with radios, I know of no other recent model that lends itself to as much fun in this arena as the DX-394. Great platform for learning radio-electronics. Always 1 or more FA on eBay.

Active & friendly user community now with over 1200 members. Some members are
keen short wave listeners; some are hams; some are into MW/AM DXing and a few enjoy long wave. Many experiment with antennas and some are ardent modifiers - customising and souping up the rig as hot rodders would do with cars. You'll find lots to interest you and help get the most out of your radio as propagation improves over the coming years.

All here at:
http://groups.yahoo.com/group/RADIOSHACKDX394/ <http://groups.yahoo.com/group/RADIOSHACKDX394/>

Subscribe on line at the website (for full access privileges to the extensive collection of Files, Photos and Links),

Or you could blame radio. On a couple of occasions, I've heard what sounds like chatter under WWV. Maybe it was an image or crossmod or something like that. Maybe it was a transmitter spur. It's always been unintelligible and I couldn't be sure if it was English or not.

I suppose the WWV frequencies might be usable in parts of the world where time station signals are weak, but there must be hundreds of better frequencies.

Oh, that's what that e-mail was about.....no, Dave
didn't turn that over to me. Which mod were you talking about? Was this
about changing all of the front end switching diodes in the 3030 to PIN
diodes? If they have questions, feel free to send them my way.
Now, about the new Palstar unit I am developing.....I wound a MW
loopstick for this unit. Like the LW loopstick, I have a little bit more
than a 6:1 tuning range. I can tune the MW loopstick from 485kHz to 3100kHz.
This is using Litz wire with close wound turns. The research that I have
done indicates that when using Litz wire, the inter-winding capacitive
effects are eliminiated. What this means is that if you wind two loopstick
antennas.....one of them uses Litz wire and the other one uses solid
enamel wire.....when using the same tuning capacitor to resonate them,
you will be able to resonate the Litz wire wound loopstick to a higher
frequency, while still having the same low end resonance as the enamel wire
wound loopstick.
In addition to this, the Litz wire wound loopstick will have a sharper
tuning characteristic and higher RF output, because of the higher Q afforded
by the Litz wire itself. I know.....the crystal radio builders
have already known this, since before I was born!

- - Things are looking mighty good for Wimax.

- "Wimax" ?

For One and All,

WiMAX = Worldwide Interoperability for Microwave Access
http://en.wikipedia.org/wiki/WiMAX
"a standards-based technology enabling the Delivery of
the "Last Mile" of Wireless Broadband Access as an
alternative to Cable and DSL."
The Wireless Home + Office + Business becomes . . .
The Wireless Neighborhood becomes . . .
The Wireless City becomes . . .
The Wireless State becomes . . .
The Wireless Nation becomes . . .
The Wireless World becomes . . .
Everywhere and Everyone -is- Universally Wireless

WiMaxForum - http://www.wimaxforum.org/home/

How WiMAX Works [How Stuff Works]
http://computer.howstuffworks.com/wimax.htm

IMHO - Now indeed this may replace Radio and TV
as we know them with Wireless Internet Appliances
that can go anywhere and function all the time.

? But What Is The Business Model For WiMax ?

and now you know - win to the max ~ RHF

Message-ID: <7OOdnSWBsfIo0iHanZ2dnUVZ_vGinZ2d@comcast.com>
Source record: 137528

I appreciate the link! I have tried the dual coil on one rod approach, and I did get it to work fairly well. There is some interraction between the two coils, so I decided to go with the one range per band approach. This also eliminates the stray capacitance and inductance that can occur when switching the coils. I even tried the tapped inductor approach, but that is another can of worms. I ran into self resonance problems in the MW coil that were caused by the LW coil.
As an example, the MW coil exhibited self resonance at 950kHz. When grounding the LW coil, the self resonance changed frequency to 850kHz. If this approach is used, the ferrite rod needs to have a variable density, where it would have a very low permeability in its center, and have the permeability increase at each end. It would be easier to use two loopsticks mounted end to end, using a delrin coupling to that the two rods don't come into physical contact with each other.
Using the separate loopstick approach, I noticed that placing two loopsticks within 5 inches of each other would not only detune the desired loopstick, but it would also cause distortion in the directional characteristics.
I notice that the German radio manufacturers have been using the dual coil approach (LW and MW on the same rod) for years, but my experiments indicate that this approach appears to be a compromise.
I am thinking about winding a loopstick that will cover from 2MHz to approximately 11 or 12MHz today. I don't think there will be any directional characteristics above 5 or 6MHz, because of the multipath effects that can occur because of ionospheric scatter, but it is worth a try.
I should be doing the formal board layout for the final unit later this week.

Pete

Pete [KE9OA],

Some where I read ? saw ? a LW and MW Ferrite Rod Antenna
with both Coils on the same {single} Large {Long} Ferrite Rod.

IIRC - It had a Single Large Coil in the Center and a Pair {Two}
of Balanced Coils at each End of the one Ferrite Rod.

Believe the Ferrite Rod was around 12 Inches long.

<snip>

Last summer, here in No. MN, often WWVH would overlay WWV on 10 MHz; the WWVH time announcements precede those on WWV and use a female voice, but propagation and other announcements are often just recorded voices (male and female) that can sound like chatter.

Was you chatter at all intelligible?

and Replies here on Rec.Radio.Shortwave
http://groups.google.com/group/rec.radio.shortwave/msg/e99697a5ccf91902

Reply to Steve,

IMHO - "YES" for Today and at least a Decade or Two there
are enough of the 'Older' Generations {Above Age 50} who
will be around and want to Listen to the "Good Old" AM/FM
Radio that is {and will be} in the Cars and Homes. To them
it will not matter whether that AM/FM Radio is Analog or
Digital "HD" {IBOC} as long as it sounds like the good old
"Free" Over-the-Air AM/FM Radio that they grew-up-with
and Still Enjoy Listening To.

Plus-the-Proposed - All Digital Mode AM/FM/DS Radio
[Standard from the FCC] will add the 'Option of XM-SIRIUS
Direct Satellite (DS) Radio to every new Radio installed in
every Car and Truck and every new Radio bought for Home
or Office use.

In-the-Next Five-Years - Will Comcast or Clear-Channel
or MicroSoft or Google be Buying-Into or Buying-Up what
is presently XM-SIRIUS Satellite (DS) Radio ?
-ps- Yesterday's Competition -is- Tomorrow's Acquisition !
{ cause that's just business }

So for that Decade or Two the current US Commercial Radio
Business Model {Paid for by Advertising and Free to Listeners}
will still be a Business with a significant number {Market Share}
of "Audio Consumers".

What all of the current Broadcast Media Corportations have to do
is figure-out "How" they are going to Deversify into the types of
New Media that they can build a Sustainable Business Model for
the Next 50~100 Years.

IBOC : A Dynamic Change in the American Listening Audience :
The New-Generation of Audio Consumers versus Older Radio Listeners

4516. Every time an HD Radio rings a Satellite Radio gets its wings

Newsgroup: rec.radio.shortwave
Date: 2008-02-20 17:05:52 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <454c2449-9ac2-4689-a351-66a06b6a32b5@b29g2000hsa.googlegroups.com>
Source record: 137534

"Every time an HD Radio rings a Satellite Radio gets its wings"

From Inside Radio:

U.S. Electronics is pushing the FCC to hold a summit among a number of parties citing a "newly emerged consensus" that a combined XM-Sirius be required to make their receiver technology "open" allowing more choices for consumers. U.S. Electronics attorney Kathleen Wallman says "Consumers deserve to have a choice about what devices they will use." Among those backing the requirement are iBiquity and the HD Digital Radio Alliance as well as public interest groups such as the Media Access Project. Stifel Nicolaus analyst Blair Levin thinks it's likely the FCC will require such a mandate as part of its approval of the deal, as well as a requirement that any new receivers include terrestrial HD capabilities. Evidently you have a "consensus" when you call it a "consensus."

Check out the unprinted part of the story here in Orbitcast:

The report citing Stifel's assertions probably came from last week's note, where HD Radio was listed among a list of several other possible concessions. Others possibilities that Levin included in his report were public interest programming, price freezes, and lower priced packages.
So it seems that the "consensus" isn't nearly a consensus after all.

Here's my consensus: I think it is unlikely that HD would ever be legislatively bundled with satellite radio in this way. And I also think it remains incredibly likely that the merger will be approved, albeit with a minor concession or two.

But let's pretend, for the sake of argument, that I'm wrong and that the influential lobbying powers-that-be hold sway over good sense.

Let's pretend that every new satellite radio has HD plus hundreds of satellite radio channels available, including tons of premium content at a wide variety of price points.

What do you think would happen?

Would this be the beginning of the HD radio era - or the end?

On the one hand it creates distribution. But distribution is not a guarantee of acceptance. Otherwise there would be a future for HD-DVD.

But on the other hand, what happens when HD radio goes head-to-head against satellite radio in the same units at Best Buy? And who benefits disproportionately - the brands with the big national names

(XM and Sirius) or the local HD stations hidden beneath the existing stations and playing God only knows what?

So the choice of consumers will be between free and scattershot programming with little investment from broadcasters but plenty of commercials and premium satellite content, now cheaper (thanks to new price plans) and more diverse than ever, commercial-free.

Has our industry done the research that indicates where listeners will spend most of their time with these radios, satellite or HD?

I think not.

Will the radio industry inadvertently be legitimizing satellite by placing it side-by-side with HD versions of the terrestrial stations listeners know and love? Will the radio industry make it easier for listeners to tune in satellite once it shares the same hardware with newfangled "regular radio"?

You can bet on it.

That side-by-side is exactly what exists today in the OEM market, where the "FM" button sits beside the "SAT" one. And the anxiety caused by this is evident in the radio industry, which fails to understand that listeners are not choosing Satellite so much for its variety, but for its premium content and its commercial-free environment - two problems that HD radio fails to solve.

By bundling HD with satellite are we leveraging off satellite's increasingly mammoth distribution - or are we feeding it?

Be careful what you wish for, HD radio.

You're fighting for a concession the satellite folks might be thrilled to provide.

Think of it: One day every HD radio promo you're running would be inadvertently pitching a satellite radio, too.

Every time an HD Radio rings, a Satellite Radio gets its wings.

FD,

Flip-Flop That Idea - All AM/FM Radios would be Digital {IBOC}
and like the Eton E1-XM Radio be built to Accept an external
http://www.universal-radio.com/catalog/portable/0101vlrg.html
Plug-and-Play Direct Satellite (DS) Radio Module containing
the 'optional' Tuner-Antenna; for those who would wish to
buy one and Subscribe to a Direct Satellite (DS) Radio Service.

THUS - The All Digital Mode AM/FM/DS Radio -or-
more precisely the : All Digital Mode AM/FM+DS Radio.

Once the Direct Satellite (DS) Uniform Interface is designed
and "Standardized" for the new All Digital Mode AM/FM/DS
Radio : Anyone could go into the Direct Satellite (DS)
http://static.howstuffworks.com/gif/satellite-radio-xm.gif
Broadcasting business with a Rented Satellite and Sell
Modules for under $50 or give-them-away for a Two Year
http://www.gosatellite.net/images_templ/xmradio/xm-connectandplay2.jpg
$ubscription like they do with Celphones.

Hell ! - AT&T could get into the Direct Satellite (DS) Radio
business as a side-line to their current Celphone business.

Walking Into any RadioShack and what do they offer
you a "Free" Direct Satellite Plug-and-Play Module
http://tinyurl.com/ysqnnm
with every Two Year $ubscription to 'their' very own
Direct Satellite (DS) RadioShack Network.

A Revolution in Audio Content Delivery May Be in the Making :
http://groups.google.com/group/hd-radio/msg/96a8d6de046fe486
The new All Digital Mode AM/FM/DS Radio 'Standard' may
in-fact "Open-Up" a new Digital Delivery 'Venue' for the more
traditional Terrestrial based AM/FM Radio Broadcasters.

Even specialised Radio Networks like EWTN [Catholic Radio}
along with CBN, TBS, etc could get into their very own Direct
http://en.wikipedia.org/wiki/Religious_broadcasting#United_States
Satellite (DS) Radio distribution system with the introduction
of the new All Digital Mode AM/FM/DS Radio 'Standard'.

yes - the times they are a changing and it may
soon be an all digital mode radio world ~ RHF

Frankly, I would like to see this group return to a no-nonsense on-topic and technical orientation that it had in its early days. I resent all of the ongoing flame wars, ad hominem attacks and off-topic tripe that has ruined the group for many serious radio enthusiasts.

I do however enjoy your observations and incidental personal recollections; your posts are for the most part cheerful and you have a kind attitude towards others.

Michael

I love it. Reminds me of the East German judges and the borderline female athletes in the 1960s.

As for the reality of Lemmings drowning themselves, I vaguely remember a story about that being myth based on a Disney nature movie. They actually shoved a bunch of the little critters over the edge to make the 'documentary'.

That in turn reminds me of the Wild Kingdom's Marlin Perkins and assorted idiots chasing herds around with a helicopter. That and the animals they tied down to be 'captured' by whatever hunter thy were filming. It was an abomination as far as Nature shows went.

I used a kill file for a long time and I watched the people that were
worth reading leave the news group. Many left because of RHF.

He may be an irritant, but he's still infinitely better than the hate mongering name callers.

On a radio related note, I recently purchased a lightly used Yaesu vr5000. It's really a mixed bag. On the MW band, I've got to use the attenuate function or just about everything not local is over ridden by noise.

Some aspects of the set are pure genius, others should have been reconsidered.

Any memories of helpful sites or searches?

Cool. How does that compare to reception you have gotten on something
like a portable AM/FM/SW with the ferrite antenna or other desktop
radio you may be using?

4557. I'm reconsidering and thinking about buying an HD radio

I'm reconsidering and now thinking about buying an HD radio from the local Best Buy store just to have the pleasure of returning it a few weeks later. I want to go on record at the store as another person disgruntled with HD radio. Then my returned radio will be marked as "returned" along with the other returned HD radios on the shelf.

I know it's a small contribution but I want to do my part in expediting the demise of iBiquity HD radio.

The closest set is a Realistic dx 398 on batteries. It's doing almost as well on the internal antenna as the Yaesu is doing on the random wire.

The 398 seems a bit more selective in the bandpass department.

The computer induces some noise into the 398, though..the Yaesu has a coaxial lead coming in from the back of the house. I had to ground the sheathing where the cable enter..I didn't have a good ground handy near the radio.

Shortwave is bad tonight. I can't get 5 or 10 MHZ time signals on either set and yes, it took me a minute to remember to slide the whip out on the 398.

5985 seems to come in about the same on both.

5:54 GMT

I'm sure that the worthwhile contributers to the news group didn't care
for the name callers either but I know for sure RHF drove them off
because they said as much.

I'm not familiar with this radio. There seems to be a number of sites
that have information on the set.

This has some of the specifications
<http://www.rigpix.com/yaesu/vr5000.htm>

You might want to read this page as besides being a review the author
gives you some operating tips on this receiver. People also have
comments further down this page with details I'm sure you will find
interesting.
<http://www.ticon.net/~n9ewo/vr5000.html>

Regarding your complaint about the AMBCB performance is typical of a
radio without an internal loop stick antenna. The internal loop sticks
generally perform better than erected wire antennas for local noise to
distant signal levels and according to this radios specifications it is
not that sensitive on the band in question being 4uV in the 0.5 to
1.8MHz. I suggest an outboard loop antenna of some type for AMBCB. You
can experiment with different types. The easiest would be a simple wire
loop with the plane on the loop in the direction you want to receive
something like 20 to 50 feet in length. A smaller tuned loop antenna

would probably be a better choice. Spending more money for an amplified external loop stick antenna would be another option.

Are you being facetious or are you really asking this?

If you have web access, compare their web site with their "sister" station Sky News.

Since I no longer live in the U.S., I have a different agenda than people who do (although I am a U.S. citizen) and then seem far more fair and balanced than the international versions of CNN.

You can also compare them to the BBC, who believes that any one who murders for politics is an "activist" or if they are a mass murderer, a "militant". The only people they called terrorists were the IRA and as soon as Blair started to give them what they wanted, the BBC stopped calling them that.

IMHO the only fair and balanced news report on television is Jay Leno's monologue. He leans far to the left, but he makes fun of everyone.

Geoff.

The 20 FEB 2008 Lunar Eclipse an Eye Ball Report :
http://sunearth.gsfc.nasa.gov/eclipse/LEmono/TLE2008Feb21/TLE2008Feb21.html

First we had Clouds Overcast and could not see the
Moon; let along the any Stars in the Night Sky.

Plus the position of the Moon at 7 PM PST was still
down below the Tree Tops.

But from 6:30 ~ 7:30 PM PST we could slowly see the
amount of Moon Glow coming through the Clouds
slowly decreasing and then slowly increasing.

Presently at Midnight PST the Moon is directly overhead
and brightly shining through thin Clouds with a Halo; and
there are many Stars in the Sky.

our eclipse was eclipse and that wast that ~ RHF

- I want to go on record at the store as another person
- disgruntled with HD radio. Then my returned radio will
- be marked as "returned" along with the other returned
- HD radios on the shelf.
-
- I know it's a small contribution but I want to do my part
- in expediting the demise of iBiquity HD radio.
-
- jw
-

RF Burns,

Actually by doing so you IMHO are doing much more then
all the Posters who just Wish and Hope that the iBiquity
IBOC Scheme will Fail. Wishing and Hoping will not make
"HD" Radio Fail.

But may be small personal actions like yours may help
to tip the scales in the direction of it's Failure.

1 - Buy an "HD" Radio and Return it and Complain
Loudly in the Store that "HD" Radio 'Sucks'

2 - Call-up several local Radio Stations and tell them that
their "HD" Radio Audio 'Sucks' and the Digital Signal
always Drops-Out.

3 - Call-up several local Radio Stations and tell them that
they are being Interfered with by the other "HD" Radio
Stations IBOC Signal and now their Audio can not be
listened too due to the Interference : In fact it 'Sucks'

4 - Write the FCC and complain about IBOC "HD" Radio
interference : Give specifics Radio Station's Call Letters,
Frequencies and Locations.

5 - Write your Senators and Congress and complain about
IBOC "HD" Radio Interference : Give specifics about your
Home Twon Radio Station's Call Letters, Frequencies and
Locations.

STOPPING IBOC REQUIRES THAT YOU DO SOMETHING.

IBOC : Wishing and Hoping Will Not Stop "HD" Radio ~ RHF

Malibu,

Well then you know that the FM Radio does work.

If the Cable TV has stopped carrying the local FM
Radio Stations. You then have two options :
* Check-out and Listen to the Digital Music Channels
being offered by the Cable TV.
* Get an External Outside FM Radio Antenna; install it
and use it to improve your FM Radio Reception.

4570. On Radio: Listeners wary of yet another HD

Newsgroup: rec.radio.shortwave
Date: 2008-02-21 11:10:03 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <2d1ad5e9-9882-4823-9c73-d352bec8924d@u69g2000hse.googlegroups.com>
Source record: 137538

"On Radio: Listeners wary of yet another HD"

There's been a lot of news out recently about HD radio. KNDD- FM/107.7 has started a second HD channel to concentrate on Northwest artists.

KNHC-FM/89.5 is already offering a digital signal; KBCS- FM/91.3 will follow later this year. KING-FM/98.1 devoted one of its alternate channels to classical Christmas music over the holidays.

But does a lot of activity translate into a lot of listeners?

That's been the continuing question about HD radio, a digital technology that allows broadcasters to offer improved audio quality in their signals and, in the case of FM, offer more than one channel of programming on their frequencies.

(An industry Web site says the acronym stands for "hybrid digital," although increasingly radio broadcasters are borrowing the television usage of HD as "high definition.")

However, the technology requires a special type of radio to hear it, leading to a classic chicken-and-egg, which-came-first challenge: Programmers aren't willing to commit a lot of resources to HD radio until they're convinced there are enough listeners with awareness of and interest in the technology, and listeners have to be convinced there's enough different about HD radio to justify the purchase of such units.

Scott Sutherland, Seattle market manager for Bonneville International (whose KBSG-FM/ 97.3 operates a second HD channel with an urban adult-contemporary format), defines the problem as one of "cars and content."

With so much radio listening done in the car, having HD-capable radios in vehicles is crucial for building an audience for the service.

Sutherland sees some progress in that area, with the announcement by Ford last year that it will offer HD radio across its product lines.

"The challenge for broadcasters is to create innovative content to provide stickiness" that keeps listeners tuned in, he says.

Another example of content that may help draw listeners to HD comes from KNDD-FM/ 107.7, which has announced the launch Saturday of "The Sound of the Northwest," featuring new and recent releases from bands from across the region.

KUOW-FM/94.9 was one of the earliest and most ambitious in deploying HD radio; it offers three separate channels of programming through HD. On a recent morning, listeners could at the same moment tune in to "To the Point," "Talk of the Nation" or the BBC World Service on those channels.

Given that variety of offerings, "listeners are bound to find something that interests them," program director Jeff Hansen says.

"People who have figured it out love it," he adds. KUOW has begun emphasizing its HD service and alternate channels in its on-air announcements.

Hansen says the development of HD roughly parallels that of FM. It, too, was a new channel for which listeners needed specially equipped radios. And it wasn't until FM became common on car radios, and progressive-rock stations began drawing listeners to it, that FM truly took off, he says. "I bring it up every time people say 'Oh, HD is dead.' "

One of the HD skeptics is Kent Phillips, program director for KPLZ-FM/ 101.5, which has not made the move to HD. "Is it still around?" he asks, only partly in jest.

Considering the lack of units, especially in cars, the lack of content and the marketing, the continued emphasis on HD radio "just baffles me," Phillips says.

It's even more baffling, he adds, given the next big technology.

"Realistically, we're WiMax in three years," referring to units that use wireless Internet connections to link to stations. "WiMax radios are great. You can get anything you want on it."

If you buy it, then return it, iBiquity will probably mark that as
another purchase, even though you returned it...

4577. One Radio Venue That Is Actually Showing Signs of Life

Newsgroup: rec.radio.shortwave
Date: 2008-02-21 13:25:04 UTC
From: dave <nothere@nowhere.com>
Message-ID: <13rqutpjbsh4863@corp.supernews.com>
Source record: 137545

Big growth for online radio listening and revenues.
Online music radio online logged 4.85 billion total listening hours last year, a 26% increase from 2006. AOL's Shoutcast remains the top destination, followed by Clear Channel Online. AccuStream iMedia Research calculates ad revenues increased 194% to $80 million last year - and that figure could jump to $150 million this year.

The marriage of an until now 100% "free" medium, in digital form that
supports conditional access, with 100% pay media; coupled with the plan
to increase digital carriers by a factor of 10; presages a 100%
subscriber based model, once the analog carriers are shut off.

I watch Fox News with the sound all the way down while listening to Air
America; that's my version of "fairly unbalanced".
```

One must sift through the material extant and distill to the best of
one's abilities an approximation of the truth. This requires developed
critical thinking abilities, not something one gets in a standard
education these days.

Barely, I could make out a few words here and there but nothing
substantial. I assumed it wasn't an official message because I could
hear the time announcer just fine.

4587. (OT) Telecomm Legislation & John McCain

Newsgroup: rec.radio.shortwave

Telecomm Legislation , Blondie Lobbiest & John McCain

A female lobbyist had been turning up with him at fund-raisers,
visiting his offices and accompanying him on a client's corporate
jet.

Convinced the relationship had become romantic, some of his top
advisers intervened to protect the candidate from himself --
instructing staff members to block the woman's access, privately
warning her away and repeatedly confronting him, several people
involved in the campaign said on the condition of anonymity.

When news organizations reported that Mr. McCain had written letters
to government regulators on behalf of the lobbyist's client . . .

(Well, Well, Well ..)

- - Is Fox News really fair and balanced?

- I watch Fox News with the sound all the way down
- while listening to Air America; that's my version of
- "fairly unbalanced".

Dave,

I had to 'think' does "Air America" Radio still Exist ?
AIR AMERICA - http://www.airamerica.com/
Yeah sort of . . . after the 2006 Chapter 11 Backruptcy and
http://en.wikipedia.org/wiki/Air_America_Radio
now with fewer Radio Stations in the Network distribution.
http://www.airamerica.com/stations

Question - Are People who Listen to Air America Radio
daily to get their 'fix' of Uber Liberal Rhetoric "Air Heads" ?

nah - they're just 'sick' people ~ RHF
-ps- Liberalism is a Mental Disorder -by- Michael Savage
http://en.wikipedia.org/wiki/Liberalism_Is_a_Mental_Disorder
.

Even with good reception, often the voice reports on WWV (geomagnetic, weather, etc.) are unintelligible, as if the speaker has no on-air experience. It was so bad last year that I had intended to complain to NIST but I never did.

Broadcasters want to do it on-the-cheap with HD Radio and not invest anything worthwhile in the main and HD channels - radio is too busy firing talent, in order to please stockholders. Boy, they must be happy as pigs-in-shit, with stocks down 90%! How about you, Eduardo?

- There is no such thing as 12:00 PM.
- You can have 12:00 Noon
- or 12:00 Midnight.
-

Dave,

(OT) : The Confusion at 12 Noon (12 PM) and 12 Midnight (12 AM)
http://en.wikipedia.org/wiki/12-hour_clock#Confusion_at_noon_and_midnight

Technically [By Definition] {Scientifically} You Are Right.

However Common Everyday Speech {The Vulgar} is not
necessarily Scientifically Correct, but never-the-less it is
both Understood and Accepted by all using the Language.

Q 1 - Does the Hour 'start' on 00 Minutes and 00 Seconds
or the 00 Minute and 01 Seconds ?

The conventional wisdom is Top-of-the-Hour at 00 Minutes
and 00 Seconds.
Example : The One-O'Clock Hour starts at 01H 00M 00S.

Q 2 - Does the Hour 'end' with "59" Minute and 59 Seconds
or on the 00 Minute and 00 Seconds ?

The conventional wisdom is The-Hour-Ends at 59 Minutes
and 59 Seconds.
Example : The One-O'Clock Hour 'ends' at 01H 59M 59S.

Therefore When We Speak of Time (in Time) We Say* :
12:00:00 PM (12 PM) commonly stated as 12 Noon
00:00:00 AM (12 AM) commonly stated as 12 Midnight
* Not Science -but- Simply Common Everyday Speech.

any time my friend - just ask ~ RHF
http://en.wikipedia.org/wiki/12-hour_clock#Confusion_at_noon_and_midnight

-futp- UTC 24:00 [0000] Hour Military Time

You are the dumbest S.O.B. on the internet these days!!!!!!!!!!!!

We (meaning those who read this Newsgroup) are fully capable of
finding links to various news articles.

Go stand in front of a microwave antenna for 3-4 days straight, then
you might be able to post coherent material.

I'm outta here, PERIOD!!!

Roy, you are the worst case of what the internet has wrought. Telamon
has you pegged.

I have too many toys, shortwave receivers, etc. to keep me busy so I
don't have to read any of your crap ever again.

I'm going to unsubscribe from any group, yahoo or otherwise as soon as
I send this.

hello, my name is larry will jr., i'm from maryland as some of you might know. i've been the voice of kracker radio and commander bunny and a few others over the years. IN MY OLD AGE I'VE FOUND THAT THIS HOBBY HAS JADED ME MORE THAT ANYTHING! what started out as fun has really turned me into an angry old man.i never thought a hobby like this could effect someone in such a negitive manner. i've found that the broadcasting has not been fun for the last few years. so after become a very angry person,i've just decided to wash my hands of it all togather.everyone of you who listen to me are a bunch of idiots.you could never appreciate my programming.there was no respect for me or my station.so i'd like to just say fuuk you all,please dont write me anymore.

this is the end,any broadcasts from this point on will only be rebroadcasts by someone else.
i'm done with this sorry azz hobby becuse you've all shown yourselfs to be pieces of crap.
enjoy your pitiful lives and when you think of me you go fuuk yourself

GOODBYE,

-KRACKER

kracker radio,

4614. Radio Tirana, Albania - Feb.21/08

Radio Tirana English bdcst, 1945-2000 UTC, man and woman with news and views. Very strong signal on 7465 Khz, S8-S9 and peaking to +20DB over. First such strong R.Tirana signal at this time here in S.Ontario Canada in a long, long time. R-Shack DX 394 and Hustler 5BTV vertcal, ground mounted. Not only a great ham ant. but excellent for SW listening as well, and at a great price. Cheers and...
Good Listening To All.

No you haven't.

IN MY OLD AGE I'VE FOUND THAT THIS
> HOBBY HAS JADED ME MORE THAT ANYTHING!
You do appear jaded indeed , probably from being dropped on your head
one too many times.

what started out as fun has
> really turned me into an angry old man.
Sounds like you have issues.

i never thought a hobby like
> this could effect someone in such a negitive manner.
It is your breath backing up on you.

i've found that
> the broadcasting has not been fun for the last few years. so after
> become a very angry person,i've just decided to wash my hands of it
> all togather.everyone of you who listen to me are a bunch of
> idiots.
The only idiot is you for impersonating 2 individuals Larry and
Myself.

you could never appreciate my programming.there was no respect
> for me or my station.so i'd like to just say fuuk you all,please dont
> write me anymore.
Why don't you actually try to create a program ? i would like to hear
how bad you suck at it.

>
> this is the end,any broadcasts from this point on will only be
> rebroadcasts by someone else.
Well to stop broadcasting you would have to actually broadcast in the
first place.

> i'm done with this sorry azz hobby becuse you've all shown yourselfs
> to be pieces of crap.

The only piece of "crap " is you for trying to pull some juvenile
bullschit like this faux pau of a post.

> enjoy your pitiful lives and when you think of me you go fuuk yourself
You should try that yourself.

>
> GOODBYE,
>
> -KRACKER

> kracker radio,

This @$$hat is obviously delusional .

Simply amazing , he wants to be me. I guess it must suck to be him . I
guess I must be a pretty righteous dude to have fans like this @$
$clown.

Next time you try to impersonate me try using spell check you are
only making yourself appear even more pathetic than you already are.

Krackerradio

Thanks for the laugh.

I live about 6 miles north of the swamp that KSTP has it's antennas in,
always booming in here, imaging its way up to about 10 MHz on a crappy
radio.

The KC-10A Extender is an Air Mobility Command advanced tanker and cargo aircraft. Its primary mission is aerial refueling.

Warplanes.com offers KC-10A Extender Model Aircraft. It is a complete replica of the original aircraft. It was made from a fine mahogany wood and made by our own master craftsmen. The KC-10A Extender wood model has a span of 13 inches and length of 14.5 inches.

For more model aircrafts visit: http://www.warplanes.com/

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

URL: http://www.panix.com/~rram/usenet/rri/index.html

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

4656. Eduardo's comment on Radio-Info concerning Clear Channel's valuation

Newsgroup: rec.radio.shortwave
Date: 2008-02-22 11:39:50 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <6e4dea27-21a2-4e05-b5b4-f4c1ad648a5a@34g2000hsz.googlegroups.com>
Source record: 137474

"Re: Cramer: It's Over for Radio Stocks"

"A company with EBITDA of $1.6 billion last year is hardly "in the
crapper." That's what Clear achieved. The two satellite companies lost
$1.7 billion last year. The satellite companies only wish Clear would
buy them... giving them lots more successful content."

http://www.radio-info.com/smf/index.php/topic,92393.msg715236.html#msg715236

BUT:

"Clear Channel's murky future"

"Sad because eliminating new hires (including sellers), failing to
replace those who leave, stopping all investment in the future, and
halting all advertising and research is the equivalent of saying that
necessity requires us to strangle the goose that lays the golden eggs,
even as the goose is up for sale."

http://www.hear2.com/2008/01/clear-channels.html

"CLEAR CHANNEL PULLS THE PLUG ON SOME HD RADIO STATIONS"

"After conducting a survey of 340 HD2 stations to determine their
programming needs, the folks at Clear Channel have dumped a number of
their HD 'Format Lab' stations due to a lack of demand."

http://talentfilter.blogspot.com/2008/02/clear-channel-pulls-plug-on-some-hd.html

"WSJ: The Deafening Clear Channel Silence" Jan 28, 2008
Posted by Dana Cimilluca

For Clear Channel Communications shareholders, silence is anything but
golden.

Arbitrage investors who have put their faith in the radio
broadcaster's buyout are the latest deal junkies running scared after
the honcho of one of the private-equity firms buying Clear Channel
went unnervingly mum today. At $29.51, Clear Channel stock is down
some 6% today and is nearly $10 below the $39.20 buyout price.

http://blogs.wsj.com/deals/2008/01/29/the-deafening-clear-channel-silence/

Clear Channel's stock has been historically at a high of $90, but has
lost 2/3 of its value - most other major radio stocks have lost 90%
and are in the penny-stock range. Going private, just as with
merging, is a retreat strategy. Cramer is right - it's over for radio
as we know it, and over for HD Radio.

EDUARDO - KING OF THE SPIN-MISTERS and BULLSHITTERS!

You aren't Kracker, you certainly aren't "Commander Bunny" and there is only one thing certain.

You are a sad, pitiful, attention seeking, fooooooktard monkey.

This is another example of why monkeys, who post schit like this, will be put in cages, small cages, in dark danky corners, and whipped (in this case several times a day).

Funny thing is, WE WILL FIND OUT WHO YOU ARE AND MAKE YOU FAMOUS!

Mike Gaukin (this smells of Gaukin), Sierra Poo-Poo, Bozo just name name a few, that have crossed our paths and been exposed for the masturbating, excrement flinging, smelly monkeys that they are.

THIS IS JUST ANOTHER FOOOOKTARD MONKEY SEEKING ATTENTION. He will get it.

Commander Bunny
President 2008

Far Left my ass. This helps Huckabee's campaign. The Left would have
held this 'til the general election.

That's wack. The weather (space and at sea) announcements are done over a restricted bandwidth voice channel and sound every bit as unintelligible as a landline phone call using a telephone. In other words, they sound OK.

They held it till McCain was a virtual lock. The NYT are nothing more than
shills for the DNC.

"PURs slip, so why is David Field not worried?"

"As Inside Radio reported Wednesday, Arbitron's quarterly report on
Persons Using Radio (PURs) fell to a record low last Fall. But
Entercom CEO David Field says "It is inevitable with the proliferation
of all sorts of other media that we are going to see radio's time
gradually erode." He points out that 95% of Americans still listen to
the radio every week and radio reaches more people than any medium
except TV. Read the impact on advertisers in today's Inside Radio."

http://www.insideradio.com/pdheadlines.asp?phid=534590&PT=Today%27s+Top+Stories

Dave,

Eduardo sends his "thanks". No wonder, radio stocks have slid 90% into
the penny-stock range!

http://www.rwonline.com/ shows the cover of the current Radio World magazine, where the lead article is about the Samsung chip, built around a SHDR100A peripheral processor and the SDHR200A main processor and flash and RAM memory and which is currently available. The article discusses the power requirements and all kinds of other HD developments shown at CES, including the SiPort chip, which is also available to manufacturers now. Both consume between 120 and 180 mW of power. Both chips are intended for integrated devices.

If you qualify for an online subscription, you can read the entire article.

"Don''t be put off by high power drain"

"I have just purchased my second Bush DAB radio (I left the first in a hotel room and never had it returned) I have also owned the Ferguson version which, I believe is the same but for the case and battery compartment (Ferg uses 3 AAs). Yes they do use a lot of power but this is understandable as the units use Digital to analogue converters which are very power hungrydevices (feel the heat coming off your Sky Box!). The trick is to use rechargable batteries (we should all do this anyway for environmental reasons) - I use mine in bed every night and frequently fall asleep with the unit on; using 2700 mAhr batteries I get about 2 nights sleep out of them - Just have two sets - one on charge and one on drain."

http://tinyurl.com/2uxork

"Nokia Music Internet Radio: Listen to the World Through Internet Radio"

http://europe.nokia.com/A4668051

No matter what, digital to analogue converters are battery-hogs. No one, is going to be interested in HD chipsets with cell phone providers starting to provide access to Internet Radio. LOL!

4671. Steve Jobs considers traditional radio to be a an old technology

"Radio on the iPod? Only if it's Internet Radio"

"From Dave Van Dyke, in reference to my earlier post about hints that streaming Internet radio capability is coming to the iPhones and WiFi-enabled iPod Touches:

I saw this same mention of 'iTunes radio' in a previously published piece and asked an Apple tech about this. His response was that it was a misnomer description of the wireless capability iTunes uses to download music to iPhones. He said (with a straight face) that Apple had no immediate plans for a 'radio-type' function on its players because "Steve considers traditional radio to be a an old technology and he doesn't want to 'taint' his cutting edge technology.

How about Internet radio? "That's a different story" my contact stated! This might be funny if only it didn't sound exactly like the kind of sentiment we would likely hear from Steve Jobs. Internet radio, however, that's "a different story." And speaking of which, if you have an iPhone or an iPod touch, sample some streaming radio here. It works! It's courtesy of WFMU and a New Jersey-based software company called Tversity."

http://www.hear2.com/2007/11/radio-on-the-ip.html

Oh, no HD chipsets?

I looked at the SiPort web page and the company is just a shell company composed of management types. The news and events page just states "stay tuned." This has not changed since last spring when I looked them up.
<http://www.siport.com/news.htm>

I can only find two Radio World articles about them from last spring and one even older article about them here from 2005, which is a press release from the CEO.
<http://www.intelportfolio.com/CPS/CoProfile.aspx?co_id=962>

The Samsung semiconductor web page does not have these part numbers. The prefix does not appear to be a part of their part numbering scheme. Try your luck here and let me know if you find anything.

Pardon me for replying to my own post but here is some information from
TI. The following link is their concept HD radio, which could also be
used for other digital radio formats such as DRM. The information here
is kind of dated. TI produces entire lines of DSP/CPU chips that can be
programed to do just just about anything you would want.

What is significant to note here is that they have not developed a
reference design, or have application notes, and have not developed any
specific tools for this application. Since iBiquity owns this
proprietary software scheme you would have to have a license for a copy

on the EEPROM in the block diagram.
<http://focus.ti.com/docs/solution/folders/print/8.html?DCMP=OTC-dsp_solu
tions_newsletter&HQS=Other+NL+dmedianewsaug06contribhd#pr>

Note that the news release at the bottom is 2/6/2006.

< SNIP >

So nobody is supposed to respond to you now?

You are clearly the worst Troll I have ever seen inflicted on a news group. I first had you kill filed for responding to spam as no matter how many times you were asked to stop you just kept right on with it so I just gave up on you. Others left the news group. Most people can only take so much stupidity and you are way past their tolerance limit.

Reading your posts is like watching a drunk behind the wheel of a car run over pedestrians crossing the street left and right using the parked cars that line the streets as bumpers to keep your pin ball trajectory on the road. I await your next car wreck of a post. Good work.

It is about HD chips, HD receivers and the integration of HD into
multipurpose devices. There is no DAB band nor DAB stations in the US. The
article mentioned that the chips could integrate DRM, DAB, HD and other
devices for the international market

Read the Radio World article. The saw the chips, saw prototype receivers,
etc.

You are in denial on something that 100,000 people could see at CES.

I don't know what they saw. Did they see it work? No. Did they see it
installed in a prototype operating? No.

I could show you a time machine on a chip. How would you know if it was
for real or not? You don't.

You have nothing to show that a "chip" is shipping.

> etc.

Means nothing. All they saw was a package that most likely had nothing
inside.

> You are in denial on something that 100,000 people could see at CES.

I have no idea what 100,00 people saw at CES. I was not there. All I
know is there is no information stating that anyone is making "chips"
for an HD radio. The funny thing is I can find "chips" shipping for
things like HDTV for instance but not HD radio.

Nope. For some strange reason Samsung, SiPort, and TI all have no
"chips" for HD radio or have any application designs for them. No
specifications, no application notes, no reference designs on any of
those web sites. If somehow I managed to overlook them PLEASE post a
link to them. Got that Eduardo? A link to a web page with actual
information about an HD radio chip. That information has to be there if
the chip is shipping.

Now I just want you to close your eyes and intone calmly the following
phrase "HD radio chips are just vaporware" as you click the heals of
your ruby red shoes together three times and you will open eyes to find
yourself at home again.

<<RW is an HD-shill magazine.

To the contrary, it has been a forum for both the promoters and the detractors in the HD arena. There is hardly an issue that does not have an anti-HD article or letter to the editor. Obviously, since you don't qualify for the magazine and don't understand radio you are simply taking pot shots with no basis in reality.

Actually, they saw both.

It's in the RW article, which indicates that the chip is available and now
shipping.

I found it in a 3 page article in Radio World.

You obviously know less about component marketing than you pretend to know.

Probably the only way I'm going to have a technical discussion is with
myself. TI was a leader when the HD radio thing was supposed to happen 2
or 3 years ago. Here is a link to an integrated front end chip that has
a digital output. This is the first chip in the block diagram in a link
I posted previously above. They started making this part 2.5 years ago
and notice that it takes almost 500 mW all by itself. This together with
the DSP/CPU chip will take about 1 watt all by themselves. Here is a
link to the HD AM/FM front end digital output TI part.

Really? What have I written that shows you I don't know what I write
about here?

This article was written last spring 3/1/07. Everything written is being proposed about the "chip".

< SNIP >

I think what we have here is a failure to communicate.

Nothing new here. You have run off many people doing this and since I am
still here this makes me their spokesperson.

Radio World is the authoritative technical publication for broadcasting, and has been for some time. If their reporters say they saw the chip working in a prototype, the chip exists and works. If they say it is shipping, it's shipping.

References to a TI project that did not develop several years ago are irrelevant and an attempt to obfuscate.

They saw the prototype working. Buy a subscription to Radio World or shut
up.

Radio World verified that it was.

The magazine, either printed or the electronic version, is a controlled
circulation publication. One must be in the industry and have certain
decision-making authority to qualify. The things you can see without
qualifying are about 5% of the magazine.

The magazine is typically about 30 pages long, tabloid. The little bits they put on the web are a fraction of what the qualified subscribers get.

There is no "e-mailed newsletter." There is a robust magazine twice a month, and an e-version that can be read online, which is identical.

Since you are not in broadcasting, and have no purchasing power in the industry, you may be able to buy the magazine... in any case, those of use actually in the business know Radio World as a reputable, solid and authoritative source for news, technology updates, useful columns on the maintenance of stations, etc. It's reputation is substantial, and in convention coverage, always accurate.

There is nothing on the SiPort or Sansung web sites to indicate that a
"chip" that has been developed or shipping. There is nothing on the
Radio World web site to indicate that they saw a prototype working. All
statements I have read on the Radio World web site were promotional
forward looking statements.

Now I want a link or a quote to the contrary otherwise shut the hell up.
I'm not taking your word for it. It is put up or shut up time Eduardo.

The website has little abstracts of the magazine content, but to get the
full magazine, you have to qualify. Get the magazine if you can. It answers
all your questions.
>
> Now I want a link or a quote to the contrary otherwise shut the hell up.

No, it's time for you to stop objecting to every piece of evidence by asking
for more evidence or by disbelieving actual facts. Radio World is the

journal of record for radio broadcast engineering. If you are so insignificant as to not even be able to obtain the magazine, that's not my problem.

All the information about HD developments shown at the CES are in Radio World, in an edition with several lengthy articles about HD developments that is so extensive that it discusses the power requirements of each of the chips in different operating situations.

If you are not qualified, you will not get it. They verify industry
affiliation. You may be able, as an outsider, to buy the subscription.
>
>> >> >> The chip is shipping.

Get the magazine. Radio World is an advertiser supported publication, and
they do not give the content away for this reason. All they have on the
website is a bit of promotion to make qualified persons want to get the
magazine.
>
>>
>> Its in the article in the magazine that landed on my desk this Monday.
>
> Then quote it.

It's copyright. Quoting the entire article, which is three pages long, would
be illegal. That may not bother you, but I am in the industry and there is
both a legal and ethical issue there. I'm surprised you even suggest it, but
it confirms my impression of you.
>>

I am not going to do something illegal. And you likely do not qualify for the magazine, unless you lied. I'll ask the publisher.

Telamon,

1 - Your 'attempt to be Bombastic* here does nothing to Advance
your Arguement. [Makes you sound like the loser.]

* An Agressive Emotional Reaction -when- Confronted with Facts.

2 - Plus it Helps to make d'Eduardo appear to be more Creditable.
[Makes him 'sound' like he is Winning.]

just trying to be helpful ~ RHF
.

Telamon - Physician Heal Thy Self. ~ RHF

-ps- If you stop Reading Me the 'effectively' for You I have.

ACTUALLY - TELAMON I WANY AND URGE YOU TO STAY.

I think that you could be a great contributor to this Newsgroup :
Provided that you got down from the High Horse and talked to
People {Readers} on their own Level.

Talk to a "Newbie" like the in-fact do not know all that you know.

Maybe about a 1/4th of this Newsgroup is on your level of
Technical Knowledge; others like me are lacking; and many
like me just plain don't want to know all that 'technical stuff'.

Telamon - I Recommend that Once-a-Week You Endeavor To :
* Post an Answer to One Newbies Question
* Post One Shortwave Radio Reception Report (SWR3)
* Post One : Me-Too / Atta-Boy / That Was Interesting
Reply to a Post that you though was deserving.
* Post Info about One Website that is Shortwave Radio
or Radio Related.
+ That Something Extra that is Uniquely You :o)

Imagine Yourself and 20 Other Members of this Newsgroup
Being Positive Contributers to this Newsgroup and Posting
Four (4) such Messages and Replies each Week : That
would add-up to 80 Messages about 11 per Day for each
Day of the Week. The Quality Signal Level would Go Up
and even -if- the Noise Level stayed the same the Signal
to Noise Level would improve Greatly.

Telamon - It's Your Newsgroup -but- Only -if- You Contribute
in a Positive Way -by- Being-a-Contributor

Knocking On Me simply makes you out to be a Whinner
and simply adds to the Noise Level of he Newsgroup -and-
Telamon - I Believe That You Are Better Than That.

Telamon - Be Better At Being Yourself - Love The Reason
For You Being Here as a Member of Rec.Radio/Shortwave :
More Than You Hate Me or Anyone Else Here.

Three brand new sites hit the Internet for hams next month:

HamBid.com is an Auction, 'Fore Sale' and wanted posts site which is completely free to use.

QRZsearch.com is a ham focused search engines which provides only targeted results, no mush!

DStarForum.com is a iscussion board focused on D-Star users and functionality.

Give them a go.

4720. FS: Edek Torus-Tuner Loop Antenna & MFJ Ant. Amp

Newsgroup: rec.radio.shortwave
Date: 2008-02-23 11:43:20 UTC
From: Bill Golden <shortwave1@verizon.net>
Message-ID: <sFTvj.417$T8.134@trnddc03>
Source record: 137688

I have For Sale the highly rated Edek "Torus-Tuner" 16" Portable Loop
Antenna, with an MFJ Model 1020-A Active Antenna Amplifier and
Power Supply.

Designed and built by K3FDY for shortwave listening from approximately
3 to 30 Megahertz, (the HF shortwave bands), the "Torus-Tuner" Portable
Loop Antenna received excellent reviews on eHam.net

Features of this tunable direct connection HF loop antenna include:

Portable/Indoor 16" Loop (Small physical size)
Tunable, 3 - 30 Mhz (Covers all popular shortwave bands)
Very Solidly Constructed
Solid Wood Base
Includes the Connecting Cable with Plugs
Significant Gain over other loop antennas
Excellent ability to null and reject noise
Ideal for those who can't put up an outdoor antenna

I'm selling this "Torus-Tuner" loop antenna with an MFJ Model 1020-A
Active Antenna Amplifier. This combination makes an excellent indoor
or portable shortwave receiving antenna.

Will sell this complete portable loop receiving antenna setup, with a
110 Volt A/C to 12 VDC Power Supply ("wall-wart"), for a USPS
Postal Money Order for $ 65.00 plus the actual shipping charges
(Cont'l U.S. only)

If you're interested, I can send you the URL's for further information
about the Edek "Torus-Tuner" loop antenna, and further information
about using Loop Antennas for Shortwave Radio Reception.

Tnx & 73,

-Bill

One of the turning points on the way to the demise of traditional
broadcasting in the USA was the NAB's flat refusal to adopt Eureka 147
because legacy stations would lose their higher-power legacy facilities
and AM would have equal footing with FM.

Since then, Sirius and XM filled the void. Radio has been bleeding red
ever since.

The point is it is not going to be in mobile phones, Walkmans, MP3
players, or any other truly portable device until they figure out how to
decode the mess efficiently. This won't happen until demand reaches a
critical mass, which won't happen without mobile devices. I can buy a
radio for around a buck that'll tune AM/FM and run for several days on a
single AA battery.

And all US military installations and embassies are considered to be a part
of the US for purposes of determining citizenship. Also if you are born to
an American parent, no matter where in the world you may have been born, you
are also considered to be a US citizen.

Oh? Really?

And just who put you in charge?

Wait, I know...it must have been Mr. Narcissistic Personality Disorder and Mr. Borderline Personality Disorder that put you in charge.

Sorry to see that you still can't control that Rhode Island sized ego...

Seeing as you have this irresistible desire to control, I would respectfully suggest you form a moderated news group, with -you- as the moderator. Because of your vastly superior knowledge, people will flock to join. Problem solved. :-)

No one cares about the empty HD developements and vaporwear HD chipsets that no one except a few loser MP3 and cell phone companies will care about. Steve Jobs doesn't want it and his iPod makes up 80 - 90% of the MP3 players. LOL!

4742. Budget Hosting Services

Newsgroup: rec.radio.shortwave
Date: 2008-02-23 16:23:30 UTC
From: ronnal887@yahoo.com
Message-ID: <9a8f160f-7d17-446b-a9f2-fc15169761e3@u10g2000prn.googlegroups.com>
Source record: 137710

Web Hosting Today

I used to believe in the concept using a using a hosting company that had been in the business for years but things have changed.

Almost fifty percent of all hosting companies went out of business during the past year. If you were a customer of one of the ones that went out of business you already have your own horror story to tell.

People lost files, websites were down for weeks, some businesses were left unable to get permission to transfer their own domains to other hosts and still others unable to renew lost their domains and websites completely.

The bulk of these business failures were from the more established hosting companies that had built up good reputations over years. Large corporations purchased many of these companies. Services and support were cut or scaled back in order to maximize profit.

Bandwidth is Cheap

Budget hosts almost always used to be slow and overloaded and many still are, but with bandwidth costs as low as they are today giant managed server farms located in data centers are now a very reasonable alternative, especially if you host multiple domains or require less support.

Features You Might Require

Make sure you choose a hosting company offers the business related hosting services you need NOW, and those you WILL need in the future.

At the least, I require redundant backbone connections and a backup power supply.

Make sure they offer web based site management - instead of just FTP. Make sure they offer Java, statistical reporting, real audio, real video, mail list management, and a search engine. If you use Microsoft's Front Page, make sure they offer Front Page extensions.

Budget Hosting Services

I used to consider hosting costs to be the least important factor to consider when shopping for a host. But with connections, servers and domain names costing so much less now there are some real quality fairly low cost hosting options available today.

Other Important Considerations

Don't move your website from server to server. Most Internet businesses have no idea about the problems they will encounter when migrating from one hosting company to another.

Each Host has their own file naming conventions and is setup to run various scripts differently. Each use a different version of the UNIX or Windows operating system and run on differing computer servers.

Scripts and forms that worked flawlessly on one server might not work at all on another or the new host may not be able to support the technology you have grown to depend on. Each server migration requires more time and expertise as your business grows; that's why it's so important to match each website to your future needs.

My Recommendation

Contrary to my past experiences, now there are more good hosts out there now than there has ever been. Now you really can save money using a reliable low cost hosting service, especially when you are getting started or to host additional mini-sites on additional virtual servers.

Let me sum up this report and tell you how you can host your website with this a good company.

I can attest to the "cash value" of fast servers, zero downtime and innovative webmastering tools. I can also tell you that a company that stands ready to assist you - any hour of the day, any day of the week is priceless in today's web hosting industry.

Now that you have the facts, I invite you to try our recommended web hosting solution...

ec2Biz.com offers a unique all-in-one web hosting service for small business owners -- something no other host I know of offers.

ec2Link.com combines just about every web-based business growing software tool into one web hosting package. It's really low priced also.

With their suite of tools you can build a website, build an opt-in list, follow-up with prospects and customers, take secure orders and even generate website traffic.

Eureka did not even get to the NAB level; the band in the US is reserved for
military uses. It has failed miserably in canada, too.

> Since then, Sirius and XM filled the void. Radio has been bleeding red
> ever since.

No, satellite has been bleeding. Clear Channel had EBITDA of $1.8 billion
last year while the satellite companies collectively lost $1.6 billion.

Radio billings were up 2% last year.

Hey CITIZEN mcCAIN ! - It Would Make A Great Movie :o)

BAD - Two Very Good Points :o) ~ RHF

Point # 1
- And all US military installations and embassies are considered
- to be a part of the US for purposes of determining citizenship.

His Father On-Active-Duty as a US Naval Officer was Stationed
to the US Military Base in the Panama Cannal Zone and John
McCain was Born in the US Military Hospital there which was
at the Time by Treaty US {Controlled} Territory.
http://en.wikipedia.org/wiki/Panama_Canal_Zone
http://en.wikipedia.org/wiki/United_States_territory

Point # 2
- Also if you are born to an American parent, no matter where in
- the world you may have been born, you are also considered to
- be a US citizen.

Point-of-Fact - Both of John McCain's Parents were US Citizens.
-but- Also a point-of-fact One of Barack 'Hussein' Obama's
Parents was NOT a US Citizen.

Shifting the burden to the person one is trying to
convince is no way to make a point.

If the point Eduardo is trying to make were a
good one then it would be supportable with
multiple independent references.

4750. Sean Hannity's warning for music-oriented Radio

Newsgroup: rec.radio.shortwave
Date: 2008-02-23 17:34:14 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <56d8968e-742e-4ac0-b9bf-6fae6ccd9fcc@p43g2000hsc.googlegroups.com>
Source record: 137718

"Sean Hannity's warning for music-oriented Radio: Music radio is going to be in trouble."

So said radio talker and Fox News host Sean Hannity this week at Arbitron's consultant fly-in.

"In five years when every car has an iPod connection and you can listen to anything you want, what is music radio going to do?"

I have long argued (and many others have likewise taken up the cause) that what's between the records becomes more, not less, important as our sound-alike competition multiplies and new channels of distribution make their way into home, work, and car - populated by content that is not owned, produced, sold, licensed, or monetized by anyone in the radio industry.

Sean is dead right on this point.

Within five years we'll see diminishing ratings on sound-alike music-oriented FM's. And radio will enter a new age of non-music programming.

Not necessarily talk. But not particularly music.

The spoils will go to those who create the experiments now. While it's fine for our industry to reward the successes of those who do the obvious and succeed, shouldn't we also reward those who take the kinds of chances that are necessary for the long-term vitality of radio?

The AM radio style of political talk is only one facet of what will fast become a burgeoning trend towards non-music.

An aside...

I had never seen Sean in the flesh before and I found him fascinating. Primarily because of his pen. On Fox News, that pen never leaves his right hand. You can see him waving it madly - as if it's the trigger for the Liberal ejector seat. And here he was, holding that pen (the same one?) throughout his entire presentation at Arbitron - never writing a word. I watched him stroll out, sure that he'd leave the pen behind since walking is rarely improved by note-taking. But would you believe that he not only traveled with pen in hand - he even shook hands with it! He was giving pen-shakes! Who does that!? Please don't sign me when you greet me, okay?

Sean, put....the pen....down.

Just an aside.

http://www.hear2.com/2007/12/sean-hannitys-w.html

Listen-up, Eduardo, you farce!

Excerpts pertinent to the discussion could be
quoted under "fair use".
http://en.wikipedia.org/wiki/Fair_use

Hmm. The central part of Eduardo's argument is
a reference that he (over) emphasizes is difficult
to obtain. Burden shifting and secret evidence are not
good ways to make a point.

4756. Clear Channel is in the "crapper", along with HD Radio

Newsgroup: rec.radio.shortwave
Date: 2008-02-23 18:47:55 UTC
From: PocketRadio@gmail.com
Message-ID: <0d7f3982-ab18-4b4c-8ada-d638acb7a446@u69g2000hse.googlegroups.com>
Source record: 137724

"Clear Channel's murky future"

"Sad because eliminating new hires (including sellers), failing to
replace those who leave, stopping all investment in the future, and
halting all advertising and research is the equivalent of saying that
necessity requires us to strangle the goose that lays the golden
eggs,
even as the goose is up for sale."

http://www.hear2.com/2008/01/clear-channels.html

"CLEAR CHANNEL PULLS THE PLUG ON SOME HD RADIO STATIONS"

"After conducting a survey of 340 HD2 stations to determine their
programming needs, the folks at Clear Channel have dumped a number of
their HD 'Format Lab' stations due to a lack of demand."

http://talentfilter.blogspot.com/2008/02/clear-channel-pulls-plug-on-...

"WSJ: The Deafening Clear Channel Silence" Jan 28, 2008
Posted by Dana Cimilluca

For Clear Channel Communications shareholders, silence is anything
but
golden.

Arbitrage investors who have put their faith in the radio
broadcaster's buyout are the latest deal junkies running scared after
the honcho of one of the private-equity firms buying Clear Channel
went unnervingly mum today. At $29.51, Clear Channel stock is down
some 6% today and is nearly $10 below the $39.20 buyout price.

http://blogs.wsj.com/deals/2008/01/29/the-deafening-clear-channel-sil...

Clear Channel's stock has been historically at a high of $90, but has
lost 2/3 of its value - most other major radio stocks have lost 90%
and are in the penny-stock range. Going private, just as with
merging, is a retreat strategy. Cramer is right - it's over for radio
as we know it, and over for HD Radio.

4758. Popular radios

Newsgroup: rec.radio.shortwave
Date: 2008-02-23 19:10:55 UTC
From: plimmer@telkomsa.net
Message-ID: <458d94c6-02c9-4e39-8a16-11ad3899bedc@s37g2000prg.googlegroups.com>
Source record: 137726

My interests was aroused to do a little research on why shortwave HF radio
receivers are steadily going off the market. The only new receivers coming
on the market these days with upmarket features are the computer based
SDR's (Software Defined Radio). Many of us don't like computer SDR
receivers, but prefer the traditional radio with lots of knobs and
buttons.

OTOH ham transceivers continue to sell like hot cross buns at Easter with
new and advanced models coming out all the time. Mainly the ham transceivers
also represent good value for money, even for listeners only. So listeners
wanting the latest technology are moving forward in two directions; some are
migrating to the new computer SDR receivers and some,like me, have migrated
to using the latest ham transceivers.

To get a feeling for this I referred to the popular eHam website reviews,
that has hundreds of reviews of both receivers and transceivers.
http://www.eham.net/reviews/
When looking at the number of reviews I quote below, consider that they are
a reflection of what sales are like for the various radio's. When I was at
marketing/advertising school years ago, I was taught that for everyone who
wrote in, some many more didn't. If I remember rightly the figure was about
25:1, so for everyone who wrote a review there are about another 25 who
didn't, and that is why I believe the figures for the number of reviews
gives some indication of the sales volumes and popularity for each radio.

Number of reviews = R (receivers vs. transceivers)
Drake R8/A/B - R33 versus Icom 746PRO series - R241
Icom R75 - R62 vs. Icom 718 - R301
AOR7030 - R17 vs. Kenwood TS-2000 - R370
Yaesu FRG100 - R14 vs. compact transceivers - R643

JR NRD545 - R10 vs. Icom 756PRO series - R449
Ten Tec RX340 - R12 of which there is no such expensive transceiver, but it
may interest you that the coming Icom 7700 has attracted over 40,000 views
on the You Tube website, an enormous response and interest! This top end
transceiver will sell at $6300.

Other popular transceivers in the $2000/3000 category that reviewed well:
Yaesu FT-1000 - R440
Yaesu FT-2000 - R136
Elecraft K2/3 series - R229

So the conclusion to be drawn is that ham transceivers are hugely popular
and attractive for manufacturers who can turn them out in good volumes,
whereas even the most popular receivers have very limited popularity and
there manufacture cannot be very profitable or economical. I wonder
therefore if Mr. Thorpe will be allowed to make another high end replacement
receiver for the AOR7030, or if AOR UK will find the prospect unattractive
commercially?

Looks to me like the Samsung chipset is klunky compared to the competitor:

"...Samsung's HD Radio baseband processor, based on Tensilica's programmable core, integrates the baseband, memory, SDRAM and flash in a system-in-package measuring 9 x 9 mm. Including the companion RF chip, the chip set's total power consumption is 150 mW...

...Sunder Velamuri, vice president of marketing at SiPort, said power dissipation of the mixed-signal device is expected to be "around 100 mW in typical configurations." He added that the chip, essentially "a software radio," can tune and demodulate not only analog AM/FM and HD Radio but also DAB and DMB-T, making it ready for the global market. Taiwan Semiconductor Manufacturing Co. is fabricating the device..."

Thank you, you've said it very well, and given the URL's of the sites
I referred tp/

> FWIW - I have one of the Edek "Torus-Tuner" 16" Shortwave
> Loop Antenna sitting on-top-of a Grundig Satellit 800-M Radio

> the Shortwave Radio Stations and cut down on the local RFI /
> EMF Noise inside the House.

I met "Ed" at a hamfest some years ago, when he was making each
"Torus-Tuner" loop antenna by hand in his worshop. He demonstrated
the performance of this antenna to me using a Sangean portable SW
receiver he had brought along with him to the hamfest. I was amazed.
Ed was interested at the time in finding someone interested in making
and marketing these antennas commercially, as he was doing this more
as a hobby than as a business. I was injterested at the time, but had
other obligations which took priority.

Interestingly, I've yet to hear from anyone who has had anything but
good experiences, good remarks about the "Torus-Tuner" loops.

> -imho- your Price is very reasonable too ~ RHF

Especially with the antenna amplifier, I believe it's priced to sell.

Maybe I should start with words no longer than 8 letters. Bummer, I
could not use the word technical then.

That brings me the better idea that you get educated in SWL, radios,
antennas, and the technology used to make them happen.

Or you could just leave. I like this idea the best. Go with it.

Which references the same few news releases I have already seen from
earlier 2007, which promise future development. There are no press
releases that state these promises have actually happened. There are no
specification sheets, no application notes, no reference design
examples, no number to call to get samples.

These parts are vaporware.

There are no chips developed for HD radio. Sansung and TI have some
years old notes on how you can use a set of their respective general
purpose chips DSP/CPU and analog baseband devices to make an HD radio.
For these parts to work as an HD radio they need additional support
devices and the license to use the ibiquity software. A lot of power
must be used to drive all this.

More promises about development. The link for the semiconductor
manufacture is below so get busy and come back when you find a link to a
system on a chip.
<http://www.tensilica.com/>

> Here is a Related Link : http://tinyurl.com/2hhrua

>
> like it or not - the truth is out there ~ RHF

Like it or not the discussion is over your head.

Now get busy with that link and find that system on a chip.

He is to stupid to understand that was all I could find on HD radio
devices on the TI site. There is no current references to newer devices.
I might as well be posting to a brick wall.

Actually, NAB management initially supported Eureka 147 but then had
to back away when faced by a revolt from its members.

Parts that do not appear to be vaporware are Analog Devices Blackfin
Processor used in EtherWaves' Sub-$10 DAB+ Digital Radio Module:
http://www.analog.com/processors/epPressRelease/0,2458,level4%253D%25252D1%2526ContentID%2
53D136602%2526Language%253DEnglish%2526level1%253D431%2526level2%253D207%2526level3%253D%2
5252D1,00.html

The Blackfin part used in the Etherwaves product became available as
this debate raged:

http://www.analog.com/en/epProd/0,,ADSP-BF532,00.html

EtherWaves either does or could support HD Radio, perhaps constrained by licensing but not by technology:
http://www.etherwaves.com/

Its Sonata product claims to support DAB, DAB+ and T-DMB. EtherWaves also offers software and silicon design to assist Solutions on a Chip (SoC) customers add multi-standard Digital Broadcasting (DAB, DAB-IP, T-DMB, DRM and HD Radio) receiving capability.

It is, of course, the power consumed by the processor that has been the biggest hurdle to overcome. D/A converters are surely almost a non-issue in the power budget these days as every digital audio device with a headphone jack or loudspeaker has a D/A.

I receive Radio World International by post and cannot find the referenced article on CES. It must be in the US edition or one that has yet to be delivered.

As unbelievable as it may seem, not everything is on the Internet. The dealings of Samsung and SiPort are directly with iBiquity and receiver manufacturers, of which there are relatively few in the world. There is no need to have an internet presence for the chips, as the appropriate people already have samples, and are proceeding to the design phase of the process. There is no purpose in promoting chips to consumers, just the manufacturers.

Anyone who wanted to see the chips working could at CES. Articles in paid or controlled subscription magazines and newsletters have covered the developments, including Inside Radio and Radio World. There is lots of

documentation, but all of it requires either going to CES or having subscriptions to the publications; Inside Radio is about $400 a year, for example.

Even Fair Use requires my typing the article... and the article is on my
desk, and I am about 5 states away.

There is really no need to "prove" what is published in Radio Word, as what
is there has already reached the only audience in the US that has
participation in this issue, the broadcasters. All the manufacturers are in
Asia.

No, you are just lying and making up statistics that do not exist. Billing
back to the 60's is on the RAB website.

TI is no longer a player in HD. Simple. It's all Samsung and SiPort in the
4th generation.

<Actually, NAB management initially supported Eureka 147 but then had
t<o back away when faced by a revolt from its members.

How could anyone back a band that does not exist for commercial use in the
US?

The D/A argument is for the most part true but keep in mind that the HD
radio has to do both A/D and D/A and the D/A has to happen in more than
one block or process. Also the baseband A/D part has to happen at a much
higher rate than the audio rate consuming more power.

And there is nothing on their web sites about it. Sorry Eduardo I'm not
buying your snake oil.

Looks like a false statement to me as I want to know yet do not meet the
conditions you mentioned above.

I suggest that you scan in the article and email it to me then. My email
has a spam trap in it but you should be able to figure it out.

```
New, dedicated broadcast bands would have evened the playing-field,
but iNiquity and the HD Cartel wanted an exclusive monopoly inb order
to shut out the smaller broadcasters with IBOC's adjacent-channel
interference.
```

No one will buy portable HD radios, and only a handful of loser cell phone and MP3 player companies may show some interest in the HD chips - listen to the world through Internet Radio already available on Nokia cell phones:

<snip>

In fact, since the dot com bubble burst, there has been a major decline in the availability of technical material on the 'Net (many citations available on the Web and Usenet archives). In my personal experience I have found that the usefulness of the 'Net to obtain arcane and especially mature technical material has declined to deplorable levels. I used to be that nearly everyone with any digitized material made it available by ftp, gopher, or the web; now if you are very lucky sometimes you can stumble on things in binary newsgroups or peer-to-peer if you are really clever. The cost of storage has declined to the point that it cannot be an excuse for the deletion of 'legacy' material on the part of larger firms; there are obviously other (perverse) reasons behind it.

As to esoteric Asian parts (as per this thread), I recently discovered that there is a lot of regionalization in web resources and that inquiries originating from outside certain regions often get served pages which omit material viewable within those regions or within certain subnets. Clues to this are often found in foreign-language mailing lists and discussion forums. Also I have battled the 'great firewall of China' on a number of occasions while doing software development involving Chinese projects and sometimes it is a mystery from day to day what pages will appear in the West or what emails will leak through depending on the state of the 'net over there.

As for SiPort and CES, there are over 400 hits on Google citing articles describing the product; here is a Radio World quote from http://www.rwonline.com/pages/s.0121/t.10856.html:

> Radio World Email Newsletters :: The Leslie Report

> apparently guides the spicules from the spicular pouch into the cloaca.

Well, I guess that beats some obscure reference to a post-apocalyptic
cyber-punk nihilistic yarn, video game or death metal band...

That's not what it says. It says it uses ca. 100 mW in "typical
configurations". It says it "can tune and demodulate" so I would think
any "additional support devices" wouldn't be that big a deal.

That is my understanding as well. The protocol can be applied anywhere
in VHF/UHF. While the L Band is used by Boeing and Rockwell; at the time
the S-Band was wide open and was already allocated to sound broadcasting.

was TV? Outdoor? Attractions?

4809. David Gleason's 'baptismal' moniker

Newsgroup: rec.radio.shortwave
Date: 2008-02-23 23:56:57 UTC
From: msg <msg@_cybertheque.org_>
Message-ID: <13s1clo4flkc969@corp.supernews.com>
Source record: 137677

From www.davidgleason.com:

> I was born after the Second World War in Cleveland,
> Ohio as David Frackelton Gleason. My second given name,
> Eduardo, was bestowed upon my baptism.

Now, only by searching church records could one contest or verify this assertion; considering that there seems to be no accessible evidence to the contrary, why do folks continue to question the validity of this name?

Perhaps David could comment: was this moniker bestowed as 'Eduardo' or 'Edward' or 'Edouard' or some other version of the name?

If indeed as he says it has always been Eduardo, then there appears to be little justification for use of pejoratives like 'faux hispanic'. I don't remember seeing any claims for hispanic ancestry in Mr. Gleason's web pages or in any posts in the N.G. either.

...Just would like to see an end to the incessant ad hominem crap in this N.G.

Michael

I should have check the archives of this N.G.; from a post
by 'David Eduardo' in Feb. 2007:

> My mother selected the name, and the godparents "gave it" at the
> ceremony... as in "they gave the response" That's the way it is done. The
> priest asks the godparents, "and what name have you selected..." and the

So why does this name-calling persist? Are the participants invested in
some Lemon-Mathau "Grumpy Old Men" style of rivalry? There are never any
emoticons or cues to the intensity of remarks so one can only conclude
that they are either done in animosity or in poorly-constructed mock
indignation, left up to the reader to deduce.

He used "Eduardo" to get a job with the now private, in-retreat
Univision, since he is only a high-scool dropout with a lousy podunk
GED. It is also going to make it harder for Univision to fire/layoff
him. Because of this, he feels very insecure, hense the need to
continually joist with us educated folk. Hell, my company wouldn't
even consider him, as they require at least a high school diploma and
US citizenship.

I agree with you. I see no need to abuse Eduardo on a personal level.
Now calling him an IBOC shill is fine because that is what he is.
What's next, rude comments about his mother?

Top it off with Kiwa is really not so good as it's reputation. As I've stated a few times, I know someone with a wellbrook (1530), Kiwa, and Quantum. Once in a while the Quantum (old version) bests the other two antennas, but it is amazing how most of the time a Wellbrook does the job. This all assumes you don't need the filtering these loops provide, i.e. the radio isn't crap.
http://www.dxtools.com/QXv2+.htm

You can tweak the reception by tilting the Quantum, but the Wellbrook never seems to benefit from tilting. Rotation yes, but not tilting.

I can't vouch for the optional longwave and tropical band Quantum loops. Remember, though, the wellbrook has a large aperture, which these ferrite loops don't have. If you have the space, I think the wellbrook rocks. But if you need something on your desk, the Quantum is the way to go.

Maybe you should take a look at the proposed block diagrams before you
open your mouth and the specifications I read were 500 mW not 100 mW.

< SNIP >

I'm not sure what it is you are addressing here but the subject is what
is available from the semiconductor web sites. I can tell you for a fact
that any manufacturer out there recognizes the benefit of getting their
products on their web sites. I use these sites all day long looking for
components to incorporate into my companies products or for automated
test. Doesn't matter if it is a 1 cent resistor or a $100K network
analyzer, my search starts on the web.

For chips that actually exist you can find its full specifications,
application notes, and if it has a complex or difficult implementation
it will have a reference design that some application engineer put
together. And of course you find news like when samples will be
available and when production will commence.

Again, it very much depends on your choice of vendor; some have websites
that are truly impenetrable. I find myself going first to datasheetarchive.com
nowadays. And when I design with 'mature' devices, I can forget most manufacturer's
websites as a first choice; the chips 'exist'; it is just that the vendor
has chosen to make using them difficult.

In my previous post I was bemoaning the elimination of mature software, manuals
and datasheets that cost very little to host, which seems to be the result
of company business decisions and ownership changes, and also the loss of many
private sites that used to mirror such materials -- gone for undocumented
reasons. As to new announcements, I used to get some 80 trade journals per

month (the bingo-card renewal process took a lot of time) and found that I was better informed with the mass of paper than I have ever been on the 'net.

0% attractions which they spun off several years ago.

Radio is the largest part.

Go to the RAB website, and see the billing figures for the last nearly 60
years.

AM radio is losing audience, as few new listeners come in. FM is at
approximately the same levels as 10, 15, 20 years ago.

Thanks. An Atlas, strong architectural support...

Does that mean the readers of this N.G. are witness to a Battle of
the Titans? ;-)

What is the "Telamon Spamshield"?; I couldn't find any reference to it
in a quick web search -- a product or service?.

It came from the years my mother spent in Europe in the early 20's.
>
> If indeed as he says it has always been Eduardo, then
> there appears to be little justification for use of

While the name is Spanish, a name does not make a person "Hispanic." The US definition of the term shows "Hispanic" to be a cultural identifier, not an ethnic or racial one (and this is supported by the fact that the "Hispanic Question" in the Census is separate from the race question.). Since I have lived in Latin America for more than 3/4 of my life, speak Spanish much more than English, including in the home and with my children, I fit the definition of "Hispanic" by virtue of culture. In simple terms, I have never watched Seinfeld but never missed El Derecho de Nacer.
>
> ...Just would like to see an end to the incessant ad

It's a normal reaction to my comments on HD Radio and the death of AM, and, consequentially, DX on the Medium wave band.

<He used "Eduardo" to get a job with the now private, in-retreat
<Univision, since he is only a high-scool dropout with a lousy podunk
<GED.

Actually, I was employed by Hispanic Broadcasting Corp. and prior to that,
by Heftel Broadcasting which merged to form HBC. HBC was bought by
Univision, and I had been with the company for about 10 years then.

And, of course, you always neglect to mention that I dropped out of school
because I was bored to death, and built my own radio station, the first Top
40 station in South America. Idiots don't build #1 radio stations.

<It is also going to make it harder for Univision to fire/layoff
<him.

Why? 75% of our workforce is Hispanic. One more or one less is hardly significant, and certainly not anything that makes me a member of a protected class. In fact, the protected class I belong to is "making #1 radio stations" as I have always done; I hold a record in the US for having programmed the FM station, in a top 50 market, with the longest run of consecutive #1 ratings periods... 22 years.

> Because of this, he feels very insecure, hense the need to
>continually joist with us educated folk. Hell, my company wouldn't
>even consider him, as they require at least a high school diploma and
>US citizenship.

Fortunately, in my field we are talent driven and one's achievements, not their education, are the most important factors. By the way, during the several years I went to ASU, I got over 100 credits and a GPU of 4 and was on the Deans List consistently.... not having a US High School Diploma apparently did not matter much, did it?

I am just getting very disillusioned with the state of some Usenet
N.G.s that used to be informative and technically useful and have
become the arenas for bad behavior.

Suggestions to "ignore posts or threads" from certain originators
doesn't improve the S/N ratio, or make navigating any easier. The
ongoing noise level also dissuades new participants and repels
veterans.

There has been some recent discussion about reforming the charter
or at least the FAQ for this N.G.; I would like to see a clear
code of conduct as an amendment.

Look to comp.arch.embedded for a well behaved unmoderated N.G. with
truly outstanding participants and a lot of useful content.

Michael

Cheap, considering the heads up display was $1300 and the keyless locks
$1100. It's not a KIA.

-

MSG - Hence my use of [d'Eduardo] ~ RHF

* The small [d] for who He was 'David'

* The ['] Apostrophe Mark for "Of"
http://en.wikipedia.org/wiki/Apostrophe#Use_in_non-English_names

* The Name [Eduardo] {Personna} that He wishes
to be Called and Identified by/with related to the
Hispanic Acculturation that He can rightfully Claim.
http://en.wikipedia.org/wiki/Acculturation

What's in a Name or for that matter a Set of Initials
like "RHF" with transmorphs into : King+Called+Fish
-aka- The KingFish :o} an old Chinese Engineer told
me that one many years ago.

IMHO - The Issue of His Name is a weak argumentative ploy
used by those who can not Debate with him on the Merrits
of His Numbers; or the Corporate Media perspective that he
represents. Being here for 'dEduardo is most likely a free form
open discussion which allows him to 'practice-his-craft'; and
discover a diverse set of points-of-view that he would not be
exposed to in the majority of professional 'business' settings
composed of many individuals like himself who are steeped
in the Radio Broadcasting Business.

I've heard enough of your rants about how stations you can pick up should be
listened to by everyone and how if you can't find something on the internet,
it does not exist to know that you have serious problems. DXass can be
explained by his obvious substance problems, where his invective and insult
increase as each weekend wears on. What is behind your problems?

M...Sushi,

Please do not demean d'Eduardo by simply calling him
an "IBOC shill".

Let us all show d'Eduado the respect that he justly deserves
for in-fact he is a "Highly Paid Professional IBOC $hill" ;-}

For those who are new to this Great Name Debacle about
none-other-than : David {Eduardo} Frackelton Gleason
here is a Link to his DEFG webpage :
DEFG - http://www.davidgleason.com/
David Gleason Spanish Language Radio Programming Consultant.

Please Note - That many of the Google Search Results
give Links to this Newsgroup and the Issue of his Name.
http://www.google.com/search?hl=en&q=David+Frackelton+Gleason

i am not a number -and- i do exist
even though i live well beyond . . .
the 10 mv/m contour - bcl-dx-u-all ~ RHF

I pick up on the radio is appropriate subject matter for the news group
where your life story isn't bozo.

Now get it together and post those quotes.

<http://www.rwonline.com/pages/s.0121/t.10856.html>

Thanks for the link.

OK, now I'll explain what this is to you. It is a thing called vaporware. Why do I call it vaporware? Let's take this one step at a time.

According to Leslie Stimson's article:

"SiPortï¿½s HD Radio chipset was an interesting highlight of this monthï¿½s CES, though it wasnï¿½t out on the floor. What I saw in the companyï¿½s suite in the Hilton was pretty interesting."

It is not out on the floor because it is not a product yet and is still under development. This is typical behavior when you are trying to convince someone of a product that's not ready. It's called high pressure sales talk. You can't do this out on a exhibition floor effectively. You should understand this tactic.

Leslie Stimson's article:
"The semiconductor company displayed what its engineers say is a single-chip solution for the portable market to invited attendees."

What to make of this statement? Pretty vague isn't it. My best guess is they just showed IC packages that you can see old picture of on the net. I would not take this statement to mean he saw something working because it is just to easy to say so.

Leslie Stimson's article:
"A company spokesman said SiPort expects to launch its chip with major customers this summer."

The rest is nearly meaningless fluff talk by SiPort except for this last line, which means it does not exist yet. Will it ever exist? Maybe this summer or maybe not.

This company does not have its own fabrication facilities and will contract with a firm such as TSMC to make the parts. This will probably cost millions of dollars and they are most likely looking for financial backing. That's what is going on in the hotel suite.

Now, Eduardo tell me again how crow tastes.

I just answered it. Took you long enough to repost it. As far as I'm
concerned you can call yourself anything you want but you are still a BS
artist.

- I am just getting very disillusioned with the state of some
- Usenet N.G.s that used to be informative and technically
- useful and have become the arenas for bad behavior.
-
- Suggestions to "ignore posts or threads" from certain
- originators doesn't improve the S/N ratio, or make navigating
- any easier. The ongoing noise level also dissuades new
- participants and repels veterans.
-
- There has been some recent discussion about reforming
- the charter or at least the FAQ for this N.G.; I would like
- to see a clear code of conduct as an amendment.
-
- Look to comp.arch.embedded for a well behaved unmoderated
- N.G. with truly outstanding participants and a lot of useful
content.
-
- Michael
-

MSG,

Nice Idea but . . .

Does No Good without a Core Group of Active Moderators
and an old-time UseNet Group like Rec.Radio.Shortwave is
not set-up to Moderate across all the possible entry-points
into it.

Requires a new forum that has a single entry-point and
is by-design a Moderated Group.

* Google Groups - http://groups.google.com/

* Yahoo! Groups - http://groups.yahoo.com/

+ plus their are many others . . .

Are two such Moderated Group Forums. ~ RHF

=PS= Telamon is ready to call everyone a "Troll" -but-
in-fact Telamon is himself a "Trill" in the continued Game
of Newsgroup "Ping-Pong" with and about d'Eduardo.
[Ping-Pong ~ Trill-Troll]

da trill of it all - pong ! ~ RHF
.

Why? Because it's merely something that he made up circa 2000. There are no 'church records', as Mr. Gleason is a liar and a fraud.

And that is a position you have, despite your protestations, still to prove.

It's pretty much come down, today, to insults based on not having a US High School diploma.... something I don't even give a shit about, let alone deny. I'm actually quite proud of the reasons behind it... and your... and other's inability to understand that marks you as narrow minded cogs in the conformity machine.

This is playing out in a rather amusing manner. I think I can model several characters after the traits you and several others have demonstrated... if I ever get a chance to retire and write.

Proven time and time again. You see, 'Eduardo', it's a 'pattern' on your part. You make claims, yet have absolutely no documentation. You then ask others to provide documentation to the contrary, which is impossible, save to say that there is no documentation, then you claim to be right, or provide any number of excuses.

It's a 'pattern' on your part!

Telamon - Clueless ? - Now Just Who Is The Clueless One !

GET THE TIME-LINE AND THE FACTS STRAIGHT :

The Original Poster "MSG" started this Thread with a
Subject-Line : David Gleason's 'baptismal' moniker
http://groups.google.com/group/rec.radio.shortwave/msg/24c0fdc26c6de2ca

Then I Posted a Replied with an Amended Subject-Line :
(OT) : David Gleason's 'Baptismal' Moniker
Adding an (OT) : to the start of the subject-line.
http://groups.google.com/group/rec.radio.shortwave/msg/5bbb31ffc6623e34

1 - Telamon You Chose* to Relpy to a Message with an
(OT) at the Start of the Subject-Line and then made the
statement that you did.
* Now That Is Really "Clueless".

2 - Telamon You Then Chose* to Reply to Me {RHF} who
was by then just one of many Posters to the Thread :
Versus the Original Poster of the Thread
* Now That Is Really "Clueless".

=PS= Telamon - You Whimped-Out Afraid to Alienate yet
Another Newsgroup Member with Your Personal Attacks }

3 - But you are wrong, Wrong. WRONG ! - It does in-fact have
something to do with the Rec.Radio.Shortwave Newsgroup.

Because of the Endless and Repetitive Ping-Pong Game of
Bashing David Frackelton Gleason -aka- "Eduardo" some days
and weeks amounts to 50% of the Posts to this Newsgroup.
Hello Telamon - You are one of the Major Players* in this
Ping-Pong Game.
* Which is Really CLUELESS Behavior.

READ - What About : The d'Eduardo "Ping-Pong" Players List ?
http://www.tabletennisdayton.com/graphics/pingy2.jpg
http://groups.google.com/group/rec.radio.shortwave/msg/9cb402a4ed9a106a
I thought that with DX Ace gone; that you Telamon might
have improved you 'position' in the Rankings of the Players
in the d'Eduardo "Ping-Pong" Players List -but- It now would
appear that DX Ace is back - - - Welcome Back DX Ace :-}
and clearly you are not up to DX Ace's level of Ping-Pong Play.

In Summary Telamon - There is a clear and consistant
pattern of action on your part in Posting here on RRS
that is Beyond Clueless : It is Newsgroup Ping-Pong !
http://www.misterpp.com/pix/Ping_Pong_Ball3.jpg

Dang Telamon,

Do you real honestly believe that I do have the Ability
to Drive {Force} People Away from this Newsgroup.

OK Lets See If It Works :
shoo shoo away telamon,
Shoo Shoo Away Telamon.
SHOO SHOO AWAY TELAMON !

sorry to keep bugging you telamon
by being alive and still here ~ RHF
http://www.shoo.org/Pics/Logo-Home.jpg
.
* * * Un- Snip * * * Here Once Again Is :
My Positive Message of Hope for Telamon and 'others'.
[Each of You Can Make A Difference.]

TELAMON I WANT AND URGE YOU AND OTHERS TO STAY.

I think that you could be a great contributor to this Newsgroup :
Provided that you got down from the High Horse and talked to
People {Readers} on their own Level.

Talk to a "Newbie" like they in-fact do not know all that you know.
+ Talk To Them {Think of Them as Yourself Way Back When}
- Don't Talk At Them
- Don't Talk Down To Them

Maybe about a 1/4th of this Newsgroup is on your level of
Technical Knowledge; others like me are lacking; and many
like me just plain don't want to know all that 'technical stuff'.

Telamon - I Recommend that Once-a-Week You Endeavor To :
* Post an Answer to One Newbies Question
* Post One Shortwave Radio Reception Report (SWR3)
* Post One : Me-Too / Atta-Boy / That Was Interesting
Reply to a Post that you though was deserving.
* Post Info about One Website that is Shortwave Radio
or Radio Related.
+ That Something Extra that is Uniquely You :o)

Imagine Yourself and 20 Other Members of this Newsgroup
Being Positive Contributers to this Newsgroup and Posting
Four (4) such Messages and Replies each Week : That
would add-up to 80 Messages about 11 per Day for each
Day of the Week. The Quality Signal Level would Go Up
and even -if- the Noise Level stayed the same the Signal
to Noise Level would improve Greatly.

Telamon - It's Your Newsgroup -but- Only -if- You Contribute
in a Positive Way -by- Being-a-Contributor

Knocking On Me simply makes you out to be a Whinner
and simply adds to the Noise Level of he Newsgroup -and-
Telamon - I Believe That You Are Better Than That.

Telamon - Be Better At Being Yourself - Love The Reason
For You Being Here as a Member of Rec.Radio/Shortwave :
More Than You Hate Me or Anyone Else Here.

Telamon "You" Build A Better Newsgroup By Being
A Positive Contributor Yourself :

NOT- By Wishing Other Members Would Go Away.

NOT- By Telling Other Members To Go Away.

teli-baby - i know that is a 'clueless' idea ~ RHF
.

I B OC'Deed and Half-Crocked,
-and now- Pocket Radio
.

Please put an "IBOC :" at the Start of your Subject-Lines for
your Anti-IBOC and Hate "HD" Radio Posts; and you will
most likely not see me Posting To Them with this Message.
.
IBOC : Clear Channel is in the "crapper", along with HD Radio
.
HOWEVER - IF You 'Choose' to leave-off the IBOC at
the Start of the Subject-Line for these Anti-IBOC and
Hate "HD" Radio Posts : You Can Count-On Me Posting
To Them and the Subject-Line will be simplified to :
.
"IBOC: . . . "
.
Which means that you "Lose Promoting and Making
Your Anti-IBOC and Hate "HD" Radio Message" for a
Message Cycle.
.
It's your 'Choice' and for you the 1st is the better option.
.
- - - - - - Message To/For One and All - - - - - -
.
In Reality many of IBOCcrock's Postings are in-fact
Anti-Terrestrial-Radio -meaning- Anti-AM-&-FM-Radio
-aka- the 'old' Media and promoting the "New" Media
-meaning- anything Digital except IBOC.
.
straight-talk from the heart of a 'free'
over-the-air am & fm radio listener ~ RHF
.

4899. IBOC : Where Are My AM/FM Radio Listeners Going ?

Newsgroup: rec.radio.shortwave

- - - the digital divide : i draw the line @ iboc 'hd' radio - - -
.
Where Are My AM/FM Radio Listeners Going ?
http://groups.google.com/group/hd-radio/msg/f77a3fdede5e67a0
GoTo => http://tinyurl.com/37ll9u
1 - Traditional Media Erosion to New Media - Update
2 - Where Does the TSL Come From? - Update
3 - Increased Use of Traditional Radio Due to . . .
Oops # 3 - That's News there is Actually an Increase !

Presents a whole lot of Numbers, Graphs and Charts and
here is my take on it all :

As a Matter of Fact Most Traditional AM/FM Radio Listeners
are Still Listening to their "Free" Over-the-Air AM/FM Radios;
and are extending their Audio Content Consumption {Listening}
over more types of Audio Media that is now available to them
as Audio Consumers.

Significantly the Age Groups over the Age of 35 Years are still
primarily AM/FM Radio Listeners which translates to a continued
Market Share for terrestrial based AM/FM Radio Broadcasters
for two to three decades to come into the future*.
* Yes - AM/FM Radio has a Future

New Meda has Real Market Share Grow 'Potential' :

But Old Media has a Super Large and Loyal Listener Base.

Plus - Terrestrial based "Free" Over-the-Air AM/FM Radio
is still the Easiest Audio 'Choice' to Make : It's Available
Any-Every-Where on a Billion Radios and It's Free.

the truth is out there ~ RHF

Only a 3? You disappoint us.

At least my K-LT is the top of the line.

4901. Re: IBOC : Where Are My AM/FM Radio Listeners Going ?

Newsgroup: rec.radio.shortwave

So, it looks like, after the initial exploratory phase,

people are getting " fatigued" with MP3 / Ipod and Sat radio...

TPeople 35 + listen more to radio;

and what is shiny and new right now may collect dust sometime down the
road..

Nothing beats AM / FM for current music / news and portability.

The College radio stations, and the Listener supported ones

(Jazz 88 / WBGO http://www.wbgo.org/) are where all the new stuff
happens.

& of course, WBCQ's " Alternative Programming"

where else would you hear radio TimTron and " Lost Disc radio " . .

"Internet Radio to Outstrip HD Radio"

"Bridge Ratings estimates that Internet radio will have 180 million
listeners by 2020. Terrestrial radio will have 250 million listeners.
But HD will have less than 10 million."

http://www.emarketer.com/Article.aspx?id=1005243

HD Radio will be long gone and buried well before 2020. No one is
buying these empty HD radios. What a farce!

http://hdradiofarce.blogspot.com/

Bridge keeps revising their numbers down for HD radio, and probably
only 100,000 are in the hands of consumers, and after all of the
returns of these "defective" radios, probably many less.

IBOC : Radio On The iPod ? - Only If It's Internet Radio !
http://groups.google.com/group/hd-radio/msg/60632f80f52a1878

Radio On The iPod & iPhone ? - Only If . . .
It's a "Listen Live" AM/FM Radio Station on the Internet !
http://groups.google.com/group/hd-radio/msg/1016fc1e08bb9a6d

OOPS ! - Many/Most Old Media {Terrestrial} AM/FM Radio Stations
now have websites on the Internet that Feature a "Listen Live"
Streaming Audio Function -so-by-default- That would make each
and every iPod and iPhone an AM/FM Radio. :o)
. . . and that is something to 'think' about ~ RHF
.
On Feb 23, 10:41 am, PocketRa...@gmail.com wrote:
IBOC : Steve Jobs considers traditional radio to be a an old
technology
-
- Doesn't change the facts
- HD chipsets will go nowhere.
-

Pocket Radio - Water Seeks It's Own Level In Time.

The same can be said of Technological Change : Technology
Raises To It's Highest Level of Acceptance Over Time.

True Generational Change usually occurs over a Period
of 16~19 Years : The Time it takes for a bew Generation
to be Born with a New Technology {Change} and Grow-Up
as Natural Users of that Technology.

"HD" {IBOC} Radio is presently going through it's
Earily Adapter Phase.

It will Suceed or Fail with the Public Acceptance of
"HD" FM Radio; and AM Radio will simple be going
along for the ride.

=WRT= Old Media {Terrestrial} AM/FM Radio :
Significantly the Age Groups over the Age of 35 Years
are still primarily AM/FM Radio Listeners which
translates to a continued Market Share for terrestrial
based AM/FM Radio Broadcasters for two to three
decades to come into the future*.
* Yes - AM/FM Radio has a Future as a Business

for Many Years to Come !

No Telamon is Arguing with Me : While I am Debating Him
[He Gets Angry - While I Get Amused]

- Don't you understand that all they do is bring you down
- to their level and beat you based on experience?

GH - Yes - Futility Has A Way Of Doing That.

Yes - It is sort of like Teaching {Arguing with} a JackAss {Idoit}.
[Telamon Attempting to Deal with Me {RHF} Rationally]
1 - Fustrates the JackAss
2 - Makes You Angry

But - More importantly it just Adds to the Noise Level
of the Newsgroup by keeping the Ping-Pong Game
going and Going and GOING ! ~ RHF

Again I Repeat - One Positive Post that is about Shortwave Radio
does Four Times (4X) More Good in Keeping this Newsgroup
"Focused" On-Topic then One Attack on Me or Anyone Else.

A Positive Shortwave Radio or Radio Related Post can
and does often generate a follow-up Reply by someone
else and that becomes the beginning of Real Content
for other Readers to R-E-A-D ! {Good Content :o}

People come here to R-E-A-D and Post -but- It Most Often
Starts with Reading and then a Reply. {Good Content}

On the Average One Good Original On-Topic Post will
generate Four or More Replies. {Good Content :o}

All Open Un-Moderated Newsgroups have their Off-Topic Posts
and SPAM [BAD CONTENT] -but- The Good Newsgroups also
have a Larger Share (Much More) of their {Good Content :o}

It is the S/N Ratio of {Good Content :o} over [BAD CONTENT]
that makes a Newsgroup Interesting-to-Read and -imho- a
Good Newsgroup.

Again Reap-What-You-Sow : The Challenge for Everyone

Once-a-Week Endeavor To :
* Post an Answer to One Newbies Question
* Post One Shortwave Radio Reception Report (SWR3)
* Post One : Me-Too / Atta-Boy / That Was Interesting
Reply to a Post that you though was deserving.
* Post Info about One Website that is Shortwave Radio
or Radio Related.
+ That Something Extra that is Uniquely You :o)

Imagine Yourself and 20 Other Members of this Newsgroup
Being Positive Contributers to this Newsgroup and Posting
Four (4) such Messages and Replies each Week : That
would add-up to 80 Messages about 11 per Day for each
Day of the Week. The Quality Signal Level would Go Up
and even -if- the Noise Level stayed the same the Signal
to Noise Level would improve Greatly.

Everyone - It's Your Newsgroup -but- Only -if- You Contribute
in a Positive Way -by- Being-a-Contributor "Poster"
and not simply a Reader {Consumer}.

Knocking On "The-Other-Guy" simply makes you out to be
one more Whiner and simply adds to the Noise Level of the
Newsgroup.
-and- I Believe That Each of You Are Better Than That.

Everyone - Be Better At Being Yourself - Love The Reason
For You Being Here as a Member of Rec.Radio/Shortwave :
More Than You Hate Anyone Else Here.

Improve the rrs newsgroup -by- make on-topic posts
-not- waring words ~ RHF

He has mental health issues. Specifically a pathological obsession with policing CB'ers. No one cares about his crusade and he is blind to that fact. He only makes a fool of himself with his obsession.

Britney Spears has the same problem in that she too can't see how others perceive her. She is looked upon as a self obsessed low class that has no idea of what an idiot she is making of herself.

You would need a 12 volt power supply because, like most ham
tranceivers, it does not run on 120/240 directly.

The 718 can be computer controlled.

I'd suggest an IC72 instead. It runs on 120/240 and doesn't have a
transmitter you don't need.

4946. Icom IC-718 Transceiver - Is It Any Good As A SWL Receiver ?

Mike [M II],

Read - Popular Radios [Receiver versus Transceivers]
http://groups.google.com/group/rec.radio.shortwave/msg/88f6657c0256af3f
-by- John Plimmer

eHAM Reviews :
* Icom IC-R75 Receiver = Total # 62
- =Versus = -
* Icom IC-718 Transceiver = Total # 301

Could-It-Be . . . That the 'difference' in the Number
of Reviews Posted is due to the Fact that :

* Shortwave Radio Listeners (SWL) like to Listen to
their Radios which is a 'passive' activity.
{Meaning / Making Them Readers by Nature.}

* While the Amateur Radio Operators {Hams} like to
Talk on their Radios - Which is an "Active" Activity
{Meaning / Making Them Writers by Nature.}

=NOTE= The first thing that strikes you about the Icom IC-718
Transceiver is its similarity to the Icom IC-R75 Receiver.

4950. portable wireless internet radio

Newsgroup: rec.radio.shortwave
Date: 2008-02-24 20:05:25 UTC
From: maliburon64@gmail.com
Message-ID: <b36060a3-b295-4a29-bd1b-0fd10c1365e5@e60g2000hsh.googlegroups.com>
Source record: 137868

I live in an area where receiving FM is all but impossible and I am considering buying a portable wireless internet radio. Will it receive the 1000's of radio stations if my apple laptop computer is shut down or must it be open and on. I have an Airport Extreme base station.

4951. Re: Icom 718 as receiver? Any good?

I believe, that WiFi in-home connections do not require the computer even to be turned on. Sure beats HD radios that require externally-mounted antennas, without even guarantees of receiving the fragile HD channels.

Just search on "Internet Radio" on the Internet to see that thousands
of world-wide stations are available - pretty cool!
```

I really don't want to say this, my many shortwave friends, but I find that I am giving up far to much of my increasingly valuable time here on RRS trying to educate the faux, the debutantes, and those who tote..

Therefore, I've simply decided to give up RRS.

Goodbye, I sincerely hope that you all find your niche in the world of SW.

Noooooooooooooo! Only faux Hispanics, wannabe Canucks (like 'Eduardo') and
dumbass Canucks (such as yourself) are qualified for membership.

Somebody put a big "O" on the Northbound "Zzyxx Rd. 1 Mile" sign a
couple years back. I had to slowly back up against 85 MPH traffic to
get a photo.

Is there WiFi where you are? You need a broadband connection for
internet music radio. Also, those things are very expensive, why not
just use your laptop and some external powered speakers?

Actually, I have provided multiple names of people who I worked with or knew
at every stage. Your choice was not to verify.

In this country, it is "innocent until proven guilty." Only you and the New York Times seem to feel differently.

Write ASU. I'm sure they have the records. Business School, about '72 to
'74. Go for it. There are about 90 credits there, including transfer
credits, and I have more from two colleges in PR where I took classes.

Go for it.

Nobody is freaking out. For "freaking out" check in with the home builders, mortgage companies, hedge funds, banks, home improvement suppliers, etc.

The same unviable half of all stations today is the group from the 90's and 80's and earlier that could not make money based on bad facilities, being a d aytimer, etc. A major broadcast appraiser and analyst believes that only about two AMs on the average per market exist in the Top 100 US markets that are viable... the rest are barely suited for niche programming such as paid religion, brokered shows and ethnic programming.

More than 80% of the audience is on AM, and so is most of the revenue.

RHF,
Please do not take my response from another thread and use it, out of
context, to begin another thread. It detracts from the message I am
trying to convey and shows you in a negative light. Ohh, sorry; I
forgot that your feud with Telamon has shown you both in a negative

light.

Carry on.....

Hold on here. One simple question: Does the illegal activity that he is crusading against have any negative impact on legitimate users of the CB bands? I don't know this answer; I'm not a CBer. But if it does, I can see someone getting frustrated if they can't get it enforced by their local FCC and decides to take things into his own hands, as far as at least gathering evidence. I'm sure he'll turn what he's found in to the proper authorities.

But if this activity to which he objects does no harm, then he is mentally ill.

Look, I tried the ignore tactic for over a year and so he did not bother me but at the same time he drove off other people that had information and the intelligence to deliver it in a post.

So what now? I'm looking for suggestions. Other news groups are not like this. Maybe complain to Google about him and get him kicked off. That would make me a net Nazi right?

If all you have to post is a non constructive criticism then you are
what you preach against.

How about a constructive thought from you?

And when nothing is going on, and ya already got the QSL's, one can always get on the monkey boy 'Eduardo' and urge him to provide that documentation!

Very little positive to say about it. Sure, I believe you are more
knowledgeable about radio than RHF and I've often commented on his
godawful writing style and lack of substantive contribution in actual
knowledge. However, either of you could walk away from the feud and
neither of you chooses to.

Now, if you mean positive contribution to be me sticking some barbs in
RHF that would be akin to bayonetting a dead soldier. Or do you wish
I should challenge Eduardo Gleason - again, very little to say that
hasn't been said already.

So, that leaves my one positive contribution as suggesting that the
parties cease their bickering and if you don't find that positive
and/or relevant well that's just too damn bad 'cause I don't play to

you as my primary audience nor do I seek or need your approval of what I post.

I've tried the non-confrontational approach and that was unsatisfactory.

I need another suggestion.

Thanks for the reminder about the boot(s). I gotta get my Operation Frequent Wind boots out and give 'em a polish. The 33rd Anniversary is coming up.

5004. WYSL's Bob Savage on AM-HD

Newsgroup: rec.radio.shortwave
Date: 2008-02-25 00:26:42 UTC
From: PocketRadio@gmail.com
Message-ID: <999e7ba0-43d2-4d95-8367-469e849709fb@34g2000hsz.googlegroups.com>
Source record: 137922

So a Salt Lake AM-FM has flipped the order in which it does its legal TOH breaks from AM-FM to FM-AM and that's supposed to make the case, that the only thing which will "save" AM is IBOC? Pardon me, but B-F-D. Neither this anecdote nor all the pedantic Arbitron and BIA number-spinning anyone can concoct will obscure the obvious truth: that if anything "is on life support" with no prospects but "certain death the instant the ventilator is switched off," it's IBOC, not AM radio.

Hello? The entire AM IBOC universe consists of 241 US AM stations, all of which are owned by iBiquity investors with the exception of about two dozen, and only a third of which are operating HD at night - that's less than TWO PERCENT of AM stations on the air. The implementation trend is gradually downward. There is NO growth in HD-AM on the broadcasting side. Accounts of unacceptable adjacent channel skywave interference continue to accumulate. iBiquity has thrown up its hands about the Citadel, Cox and CCU problems, saying there will be no further development of HD-AM beyond the current "state" of the "art." When it comes to HD-AM, it is what it is, and that's the unsatisfying end of the story. NOBODY is buying HD radios which continue to dwindle in availability. Receiver sales are an embarassing fraction of the most guarded projections and reportedly most of those units have been returned as defective. iBiquity had to bribe most receiver manufacturers to display ANY HD products at the most recent CES. To this day I have never had a single listener or advertiser comment or question about HD Radio. I do not know anyone who owns or listens to an HD Radio, nor does anyone in my wide circle of friends, relatives, associates or clients own an HD Radio - even the CE of a local major group with several HD-operating outlets doesn't own an HD Radio! In fact, I have met nobody outside the industry who even knows (or cares) what HD Radio is. And this is the business I've been in for almost 41 years!

If indeed, AM's only hope is to lure people to buy $200 cheesy HD boxes and camp out on the ground screens of 50kw stations to listen to the same progamming as the analog channel, in sparklingly artifact-cobbled fake AM stereo, the future of the band appears bleak. It would be depressing if I didn't know better, as do many others.

My station is having another record year - and in analog, go figure. Two good friends of mine, former Entercom executives, have bought and resuscitated two small market AMs and are having a ball and making money, doing what all of us have done throughout happier days in our careers - serving an audience and advertisers with local radio service.

I am struck by the contemptuous gloom with which IBOC supporters view not only AM radio, but radio in general. They continually preach Kahoutek-style imminent demise and strain mightily to force the defective IBOC-AM concept on a marketplace which couldn't care less. All the stubborn pro-IBOC blogging in the world will not get the HD-AM cadaver to respond to "just one more" application of the AED paddles.

Given the choices for music consumers and the incredible failure of corporate radio to respond meaningfully to current trends, I think that - far from being the near-term casualty - AM radio may well be the "last man standing" in broadcasting as music distribution choices continue their proliferation.

You must not be a car guy. Because car people don't consider it
bragging or otherwise. It's just talking about the cars they own.
Some people are happy with BMW's -- some people like the japanesse.
Kia's are good for some people. It's not bragging - it's just
talking about what kind of car one owns. Which makes me wonder what
kind of car you own.?? AND YES, I REALIZE THAT IS COMPLETELY OFF
TOPIC.

Did the Isettas come with a radio? Hoot Mon!,,, I Guarantee y'all all of them didn't.When I was in the Army, I was at Scott Air Force Base,Illinois (back and forth between SAF and SL-60 near Pacific,Missouri) in 1963, I spent ten months there.One day at SAF, I saw a little red 1958 BMW Isetta scooting around.I noticed that Isetta turned off at one of the Aircraft Hangers at SAF.Next day, as soon as I got time enough to go check it out, I went over there and I asked about that little car.I bought that little car for $350.00 from the Air Force Officer who owned that little car.A few months later, when I found out I was going to Vietnam, I sold the car to an Army Captain.I still have the great big owners/operators manual that came with that little car, the original owner of that little car was a woman in Germany, she bought that little car brand new, in Germany.Let me tell y'all, the owners/operators manual is a manual to drool over, Literally! Why don't U.S.A.auto factories include owners/operators manuals with the cars they crank out for the sheeple to buy?

Did my little 1958 BMW Isetta car have a radio???,,, are you kidding! That little one cylinder air cooled 9 horsepower engine was LOUD enough, it wouldn't have made any sense at all to install radios in those little cars.Sometimes, some of those guys at SAF used to pick up my litle red car (it only weighed 700 pounds or less) and they would hide it behind one of those evergreen bushies at SAF.

On wet rainy days/nights, diving my little red car across the old Eads Bridge between East Saint Louis,Illinois and Saint Louis,Missouri, across the Mississippi River, it used to scare the coon dog crap out of me! I am Glad I got rid of that little red death trap on wheels car.

Say cuzz, Fun and Games with furrin (foreign) cars.
www.foreignaffairs.us/solutions.php

I don't ever want any more furrin cars, they are all CRAP! I have also owned three air cooled VWs before, so I reckon I ought to know.

Why is a 1958 BMW Isetta car similar to my 1914 Model T Ford Runabout Roadster Car? One seat, one door.

Wind Boots? I own a pair of Army white ''Mickey Mouse'' Boots, if you know what they are? I bought them years ago at Daves Army Surplus store across the mighty Pearl River between Jackson and Pearl,Mississippi, about six/seven miles East behind doggy's couch.(Look in your road atlas) Those big heavy thick clunky Boots were made for sub zero cold weather.HUMPH! they never did keep my feet warm enough! U.S.Army got ripped off on those Boots.Those Boots were also made in the black color.I have an old U.S.Army metal canteen, I bought it for fifty cents at the Goodwill store.I want to find a cup (with the folding handle) and a carrying/tote pouch for my canteen, a web belt too, (I have a web belt here but it won't fit around my big fat double beer belly) only to make it all complete.

BMWs are good cars. I picked mine out of several options because it had HD
and the most comfortable seating. A Maseratti is expensive... for someone
who drives about 20 thousand miles a year, a BMW is an excellent price vs.
comfort option.

> How big a piece of iBiquity does BMW own? How many $100s per radio is

Telamon <telamon_spamshield@pacbell.net.is.invalid> wrote:

Welcome to this weeks RRS no-spin clueless factor report and now here is
this weekï¿½s breaking news.

The tragedy of yet another thread about Eduardo's life was narrowly
avoided today. I don't what is was that stopped him from talking about
himself again but I'm thankful for it. Maybe it was the crow he had for
lunch?

Billy and Mikey both generated just a few but highly clueless posts.
Quality not quantity must be their motto.

Cuhulin was his usual self.

Eduardo still believes that forward looking promotion statements are
factual.

RHF is considering a change of handle to RFI.

Here are the self-vote totals for this week.

Mike <mwbryant@aol.com> - 4
Billy Burpelson - 5
David Eduardo - 38
cuhulin@webtv.net - 49
RHF - 146

Well as you can see by the self vote totals RHF is again this weeks
clear winner. Kinda tough to beat the king of Google search, copy, and
paste. Congratulations RHF or should I say RFI.

This has been another installment of the RRS no-spin clueless factor
report. Good night and good listening.

The funniest vandalism I've seen involved a 'No Left Turn' sign.

Somebody stenciled in the word 'Unstoned' under the real printing, so
the thing read:

No Left Turn Unstoned

I drove for a couple of miles before it clicked.

dxAcehole, pathological liar and common drunk, during his fifth annual farewell tour, said:

==========

The Wit and Wisdom of Steve Lare, aka dxAce,
Supreme Commander United Michigan Militias
(Updated regularly):

==========
From: - Sat Feb 16 00:52:22 2008

I really don't want to say this, my many shortwave friends, but I find that I am giving up far to much of my increasingly valuable time here on RRS trying to educate the faux, the debutantes, and those who tote..

Therefore, I've simply decided to give up RRS.

Goodbye, I sincerely hope that you all find your niche in the world of SW.

dxAce
Michigan
USA

I ain't white, but unlike you, I dislike no one.

Now get your homo ass working on that documentation, boy!

Give it a shot queer boys, I dare ya!

Dumbass Canucks, sure ain't Rolex wearin' respectable folk...!

Cocksuckers such as your self.

Now go suck on some sushi, you little miscreant.

I just asked you to have the cunt send me a letter, boy.

Damn, the Canucky Niggah didn't have a damn thing to say...

Yes, I am witty, and I am wise!

Let me sum up, you Canucks are assholes!

Hit the road, drug addled fool.

Shame on CanaDuh for killing thousands of people every day.

Be sure to tell the bitch to send me that letter, faggot!

get your bitch *daughter* to send me a letter

Have the bitch send me the letter!

Well, go tell your other cocksucking countrymen.

Hey, have the bitch send me a letter

Ain't gonna happen, ya got no air farce, ya got no ne vuy, va goy nuthitin?

Have the bitch send me a f00kin letter!

You folk really think ya got balls?

Now run along to wherever it is you little debutantes run off to...

I'll be waiting for that letter from your *daughter*, asshole!

Oh yeah, tell me baby...

Hey, little pussy boy, we spell it "cunt" out here, just like I think I spelled it originally, boy.

Never touched the skanky,,,

If I don't get that letter, boy, then you and your *daughter* must both be drunk, eh?

Finally shut you up, eh boy?

Have the bitch send me a letter on whatever letterhead YOU might make up.

Ain't that just speshul! He's got to go find somewun to fake him a lettter.

Have the bitch send me a letter on her firms letterhead, boy.

Great, then get your bitch *daughter* to send me a letter on her firms letterhead within the next two weeks!

Have your *daughter* draw up a contract, BOY!

Hey, 'Edurado', have your *daughter* get in touch with me, amigo

True, ain't it, little faux Hispanic BOY... (Heavy emphasis on the BOY!)

Guess that shut the little boy up!

Stuff it up your prancing ass, 'Tardo!

You dumb sand niggers (sorry, I categorize ya all this way) need to understand that you need to get your collective shit together...

I'm LMFAO, since I've busted the f00kin faggot!

You are after all a drug addled 'tard boy who obviously knows little about the SWL/DX hobby.

Go blow some IBO Cock, and leave the real radio hobbyists alone, OK?

Let the faggot boy prove it!

LMFAO at the f00kin faggot

Yes, I learn more and more with each passing day!

LMFAO at the pathological liar!

Lying 'tard boy, much like the other debutante, malcontent, faux boys
who inhabit the lace we call RRS.

You, on the other hand are nothing more than a sorry little
homosexual 'tard

Liar, liar, pantalunes on fire! (1)

New history will be made when we crush CanaDuh!

Kan you just imagining that, you little faggot Cannucky boy?

Anybody, even Bozo, is worth more than some dumbass, faggot, Canuck!

Wonder why.... could it be that the Canucky Niggah is timid, afraid...?

Get busy, boy!

But you can't prove it, retard boy!

I know you faggots have dreams

Blow it out your ass, you dumbass Canadian! You and the rest of your
dumbass countrymen, and women too!

You'd not be very happy if I returned, little bitch boy!

Go get some IBOCock, 'tard boy, and bring home a taste for yer mama.

If you'd like to call me, I'm here to help you until 0330 GMT at:
616 335-9762
dxAce
Michigan
USA

Go give your boyfriend a blow job!

Talk about misery, you're in f00kin CanaDuh, boy!

Something for your faux Hispanic cock sucking brain to think about, eh?

Or better yet, go get yourself some IBO Cock!

Poor little cocksucker just had it handed to him

Eh? You sum dumass Canucuy bithyboy...

As long as it screws you Canucks, I'm a happy camper!

They are mere asswipes, suitable for flushing.

That's because you're a fucking liar!

Cry me a f00kin river.

Awwwww... the poor whiny dumbass Canuck is back at it again today.

Huh... you be just another stupid white boy outta Cleveland...
I suggest you get together with your "significant other" and bump butt
with each other,

Because I hate White Boy Canucks who suck cock...

Best you shuffle down the alley! That's what your mama wanted!

Crazy Retarded Australian People?

"Even 2 cents is more than a totally worthless Canuck"

Funny how the US Govt. sent me over $50,000 last year

You can preDICK all you want, you fraudulent cock sucking,
pathologically lying old bastard boy!

Hey, dumbfuck Canuck, I was not asked to leave!

I went and bought ammo... I still gots it case them tard boys such as
edweena gets stirred up.

And 10,000 rounds isn't a lot.

It was Russian ammo. I don't like the Chinese stuff.

That's not Canuckian, boy!

Kiss my ass, pedant!

I'm LMFAO, Mr. Gay-Lick!

Obfuscate, you little prancer!

LMAO at the 'tard.

Thing is, you 'tards are pretty fixated upon one set of parameters.
That is after all why you are considered to be 'tards!

As always, your head is up your f00kin ass.

You fuckin' Liberal asswipes are always ready to give somebodys else's
goodies away...

And, hopefully, my dumbass cousin in Mill Valley will leave me her
Corvette.

Obviously, you leep your head up your f00kin ass all day long.

I don't 'fear' homos, oh faux one!

Liar, liar, pantalunes on fire! (2)

Apparently you are the 'bendover boy'....

Do you spit or swallow?

Oh, I certainly have, time after time.

At least I went farther than you!

Good lubricant for you and the boys?

It's what dxAce uses!

that's good enough for me!

One can never slide the BS by dxAce

Not as well as you, fudge pack.

Go for it, dumbass!

Oh come on... it's Fall forward and Spring back. Everyone knows that!

Hit the road, drug addled fool.

Hey, I love kickin' gay-lick ass!

Pretty much what I indicated to you a while back, you f00kin prancer.

The only thing you know about short wave is that that is what your
mother gave you when she sent your f00kin ass packin' outta Cleveland.

Screw the drug addled retards.

Nah, I only attack the messenger when he/she/it is
obviously drug addled.

So, beat the rush and get the hell off of RRS, you f00kin retard.

Well, in you, we have a drug addled retard in our midst.

Get over it, you fake Hispanic piece of excrement.

And when you do confront HD, you'll have Cocksucker Dave and
The Prancer Boys to thank for it.

Damn... I'm of mixed race ancestry myself, what ever should I do?

Next time we come over the pond once again to save your sorry ass's
we'll have to dismantle that stuff.

Heck, I bought 1000 shares of FSEAX the other day.

Don't do business with the Huntington Investment Company,
in particular a fellow named Joseph Klein.

Not at all, we are both Miami Indians. ya got a problem with that, boy?

Ya right, suck my dick...

Believe it, it's like a dream to be with you again...

Then hit the road, you drug addled retard.

Just like you wish that you worked for me, retard!

Proven time and time again, fudge pack.

Get it, retard?

Dey done unnerstannn that us nateev boyyys R real Mericans!

I sure he is.

Insert your Gay-Lick reply here, boy:

And yet another Liberal rant

Sorry, I'm not a racist like you, Edweenie...

Nah, he was fake little cock sucker like you!

Your pathological lying is an offense to me, and more than likely an offense to God as well.

No medications here, cock sucker boy..

Stuff a watermelon up it

But that stuff isn't what dxAce uses!

Come on now, you being a nice Liberal, Carbon Footprint, Al Gore, Cock Sucking kinda Canuck Bastard..

I won R plantation up nord, dat dem dum ass Canuckys be oween us, ya be 'standin me?

CanaDuh is stupidity!

Stupid little pussy faggot!

Liar, liar, pantalunes on fire! (3)

Mr. Edweenie, the forces of Good are gonna come visit your sorry fake Hispanic White Boy Ass if you keep it up!

Pay attention, cock sucker...

LMFAO as I sit and look at my royalty cheques...

You've done this before, cock sucker...

LMFAO at yet another dumb friggin Canuck..

I know it may be hard, but as you withdraw, it will shrink away..

Oh damn, I guess we pissed another wanker off, Cuz..

I get my ride be fixed, I be cruisin to be givin ya da shake, yu be knowin, eh?

Try again, shithead.....

Dem Canucky boyz are dumaz rasissts..

We gone be sen u to sumplac bad boy... u be so bad weben the reel
Canuckys won wan u.

Fookin bustards! Like Edweenie!

Best you wake up soon... fookin retard leetle beetch..

Fookin 'retard.

It is then my patriotic friend, you must reach in the closet,
place your hands upon the weapon, and blow the cock sucking,
bean blower back into Mary's arms....

Indeed, I'm now at WAR with Canuckistan..

May the Great Spirit help the hapless bastards.

Actually VA facilities are quite good, but if you Canucky niggahs poke
around one might find a lot of things wrong.

At any rate, I'd bet it beats the Canucky Third World state of care...

CanaDuh sucks...

Wanna go to war, shit head?

Think you might win? Think you got a chance?

If you don't... I'd keep my fookin Canucky mouth shut, boy...

Meanwhile, I plan for the Spring campaign, looking forward to the
Blind River Massacre.

I collect stamps!

You are the largest noise source in the news group according to an impeachable source, which is the "RRS no-spin clueless factor report" thread.

> Telamon This Is A Request - Please Stop These Personal
> Attacks Now : They Are Becoming / Have Become Internet
> Stalking -and- I am Requesting That You Stop. ~ RHF

If you don't like the result of what you read in the news group I suggest you change your behavior. You have been asked by many to stop making abusive posts to the news group. If you don't like my comments on your abusive posts then stop making them.

I'll give you credit where credit is due. You at least stopped responding to most of the spam lately. I hope that isn't just an anomaly in your posting habits. I would consider that step one in a 12 step recovery program.

You got one clue down and eleven to go.

- I'll give you credit where credit is due.
- You at least stopped responding to most of the spam lately.
- I hope that isn't just an anomaly in your posting habits.
- I would consider that step one in a 12 step recovery program.

Telamon - Have I been Neglecting the SPAM ?

OMG - Warning Everyone - Stay Out The SPAM !

ok i know it is a 'bozo' [rfi] response ~ RHF

Eventually you will understand that you piss everyone off by constantly
changing the subject line. That will be step two for you.

Telamon,

Actually Google Groups Reports that "RHF"s 7-Day Activity is :
[Setting the Record Straight -wrt- The Number of Posts.]

29 Discussions Started

133 Discussions Replies Posted

Total for the Week of 162 which is ~23 per Day

About 368 Messages for the Month to Date
which is ~15 per Day
<Weekly Delta 128>

While You Yourself "Telamon" managed to Post a Total of
215 Messages for the Month to Date which is ~9 per Day.
<Weekly Delta 95>

FWIW - Maybe about 80 of these 128 Posts for this Week
would not have been Posted* -except in reply to you- Telamon
and your "Clueless" Report Antics (~80). Factor in another
~80 "Me Too" posts by 'others' giving their two-cents-worth.
* Now that just might improve the Signal to Noise Ratio of

the Newsgroup. {240 Clueless Posts = Less Noise}

pay no attention to all the 'clueless' numbers ~ RHF
[This is a Game of "Clueless" Newsgroup Ping-Pong
where the only Metric -is- Who Was the Last to Post]

=PS= 162-80 & 128-80 means that I manged to still Post
between 48 to 82 'other' Messages that I hope were some
what Shortwave and Radio related for the Week.
{ Give Yourself an "Atta-Boy" RHF :o}
.

(OT) : The RRS No-Spin "Clueless" Factor Report

Telamon - Hopefully You Will/Can Understand This Thread
Ain't About Shortwave Radio and Radio related things :

These Messages are Personal and 'only' about You and Me :

Therefore it should have an (OT) : at the Start of the Subject-Line.

The (OT) is simply being Fair and Honest with the 'other'
Members {Readers} of this Newsgroup.
* It allows them in an Instant to Read the (OT) and 'Choose'
to Ignore these Messages.
* Or to simply set-up their News-Readers to Automatically
Delete any Message that has a Subject-Line with an (OT)

in it.

Telamon - Have It Your Way : Remove the (OT)
-and-
I Will Have It My Way : By Inserting the (OT)

Once again - I believe that my way is simply being Fair and
Honest with the 'other' Members {Readers} of this Newsgroup.

ot'ing you ~ RHF
.

AM-HD is a bust - FM-HD to follow.

5044. Eduardo's response to Bob Savage on AM-HD

Newsgroup: rec.radio.shortwave
Date: 2008-02-25 11:15:48 UTC
From: IBOCcrock <ibocisacrock@yahoo.com>
Message-ID: <5690e33d-0690-4d9a-b4e2-ca71818e85f8@71g2000hse.googlegroups.com>

Quote from: Savage on Yesterday at 02:55:37 pm
So a Salt Lake AM-FM has flipped the order in which it does its legal
TOH breaks from AM-FM to FM-AM and that's supposed to make the case,
that the only thing which will "save" AM is IBOC? Pardon me, but B-
F-
D. Neither this anecdote nor all the pedantic Arbitron and BIA
number-
spinning anyone can concoct will obscure the obvious truth: that if
anything "is on life support" with no prospects but "certain death
the
instant the ventilator is switched off," it's IBOC, not AM radio.

I made no reference to HD. You have such an obsession with HD that
you
are reading it into discussions that don't even mention it.

My point is that, time and again, when traditional news talkers are
moved to FM or simulcast with FM, the 25-54 numbers shoot up
considerably. This, to me, is proof that AM is not viable no matter
how good the programming if listeners under 40 or 45 are desired. FM
reaches two generations who think that AM sounds bad or who do not
even know AM exists.

Again, this has nothing to do with HD. As I have said, HD may help
AM,
but the band may well be beyond salvation.

Quote
Hello? The entire AM IBOC universe consists of 241 US AM stations,
all of which are owned by iBiquity investors with the exception of
about two dozen,

There are less than 250 viable AMs in the top 100 markets. Almost all
of them are HD. That's all that are needed.

Quote
Given the choices for music consumers and the incredible failure of
corporate radio to respond meaningfully to current trends, I think
that - far from being the near-term casualty - AM radio may well be
the "last man standing" in broadcasting as music distribution choices
continue their proliferation.

The slow ratings and PUR declines of the last 20 years is mostly due
to the ageing of AM and that band's inability to replace ageing
listeners with ones under 55. FM is much more stable; AM is sure not
someplace I would invest my money.

http://www.radio-info.com/smf/index.php/topic,92284.msg717170.html#ms...

BUT:

"News/Talk/Sports:Radio's Last Bastion"

"Music FMs of any flavor are utterly screwed... Right now -- while
FMs
are losing the music audience to new media -- satellite radio is
offering more News/Talk/Sports programming than we can fit on AM
radio..."

http://ftp.media.radcity.net/ZMST/daily/IS031005.htm

"The Last Days of AM Radio?"

"Sports, all-news and talk programming continue to draw large
audiences to the AM band in most big cities..."

http://blog.washingtonpost.com/rawfisher/2007/09/the_last_days_of_am_...

"News/Talk/Sports Tops Radio Formats, Interep Analysis Reveals"

"The latest share numbers place the News/Talk/Sports format at the
top, pulling in an average of 17 percent of listenership among
persons
age 12-plus, based on Arbitron figures for total radio listening in
92
continuously measured metros. That share number is even higher than
levels seen last spring, when the war in Iraq began. According to
Interep, more stations than ever are programming News/Talk."

http://www.thenewsletterplace.com/054strauss/issue9/article4.htm

"Sean Hannity's warning for music-oriented Radio: Music radio is
going to be in trouble."

So said radio talker and Fox News host Sean Hannity this week at
Arbitron's consultant fly-in.

"In five years when every car has an iPod connection and you can
listen to anything you want, what is music radio going to do?"

I have long argued (and many others have likewise taken up the cause)
that what's between the records becomes more, not less, important as
our sound-alike competition multiplies and new channels of
distribution make their way into home, work, and car - populated by
content that is not owned, produced, sold, licensed, or monetized by
anyone in the radio industry.

Sean is dead right on this point.

Within five years we'll see diminishing ratings on sound-alike music-
oriented FM's. And radio will enter a new age of non-music
programming.

Not necessarily talk. But not particularly music.

The spoils will go to those who create the experiments now. While it's fine for our industry to reward the successes of those who do the
obvious and succeed, shouldn't we also reward those who take the kinds of chances that are necessary for the long-term vitality of radio?

The AM radio style of political talk is only one facet of what will fast become a burgeoning trend towards non-music.

http://www.hear2.com/2007/12/sean-hannitys-w.html

The music-oriented FMs are utterly screwed!

I'd have to agree that few SWL's are going to frequent eHam, so therefore the
number of reviews is going to be skewed toward transceivers.

I had already pondered deeply on whether eHam was popular with SWL's
and came to the conclusion that it was. It's coverage of portable
reviews is quite the most comprehensive public entry forum available.
You can try my theory for yourself by entering something like "Grundig
S350 review" on a Google search and it will come up with eHam tops.

Since Google rank your search findings according to popular views it
is an indication of a sites overall popularity with the public.

I don't know of any other site that gives such a comprehensive
coverage of shortwave radio's as eHam, and the hundreds of shortwave
radio reviews attest to that.

thank's to Bart and Ace for responding

Hi All:

Here's a little video on Windows Vista; entitled " Vista Sucks"

http://blimptv.blogspot.com/2007/11/vista-sucks.html

- Now that your in a good mood, please go to the link below

and sigh the petition to

Save Windows XP.

http://weblog.infoworld.com/save-xp/

After you've done all this, consider sending this message to all your friends; everywhere

Thanks

About 100,000 other people who've already signed the petition to Save Windows XP.

John, I have found eHam is the way it is because of the combo of
members there. a lot of ham's started as SWL-ers. and a lot of
swl people went on to ham. so, one supports the other. bunch of
the armatures i know have at least one shortwave in their shack.
myself, i look at eHam every day. i want to read what you liked
or disliked about a receiver, etc., before i think about a buy.
and, as RN no longer does reviews, it's harder to find real life
info on receivers. the yahoo groups are another great info source.
your own reviews on dxer are are just as important to me. i do
a lot of homework before i buy, or trade.

GOOD DX!
Drifter...

Shouldn't you be spending your increasingly valuable time doing something else? The alcohol is killing you...on second thought, may I send you a case?

==========
From: - Sat Feb 16 00:52:22 2008

I really don't want to say this, my many shortwave friends, but I find that I am giving up far to much of my increasingly valuable time here on RRS trying to educate the faux, the debutantes, and those who tote..

Therefore, I've simply decided to give up RRS.

Goodbye, I sincerely hope that you all find your niche in the world of SW.

You DO mean his FINAL and Irrevocable parting shot, don't you? It's actually quite amazing that he could still spell after finishing the third twenty-sixer.

> mike - remember to keep your eye on the 'niche' ~ RHF

Niche? Oh yeah...he's on the shelf. Thus Spake Zarathustra comes to mind...along with the Superman and G_d is Dead theories.

I think that the reason for the rapid decline in the number of new receivers for sale is tied to demand. There just are not enough people interested in shortwave listening that are willing to spend money on a new receiver. And low demand means radio companies won't spend the money to set up a production line.

The reasons for declining demand are many and pretty well documented so there is no real need to go into them.

I think that there are still quite a few SWL's out there, but as a group they are making do with perfectly good used equipment and purchasing the dual purpose gear you mentioned. A good transceiver

will handle the needs of both ham and swl very well. And a few swl's with deeper pockets are helping to keep the market for high-end receivers alive.

-
- Hello,
- Anyone use one of these receiving only antennas?
- This is the 45 foot omnidirectional unit.
- Mike
-

Mike M,

The Par End-Fed Shortwave Listener (EF-SWL) Antenna is
a very good design and well constructed for an all around
Antenna for both AM/MW BCL'ing and SWL'ing. Gives good a
ll-around Shortwave Band reception and works well on the
AM/MW Band Antenna too. [500 kHz to 30 MHz]
http://www.universal-radio.com/catalog/sw_ant/2205.html
http://groups.google.com/group/rec.radio.shortwave/msg/b368cb105b4a370b

The Par Electronics EF-SWL Antenna can be Rigged
{Set-Up} with a 15 Foot Vertical-Up-Leg and a 30 Foot
Horizontal-Out-Arm to form an Inverted "L" Antenna
using a Coax Cable feed-in-line and remote Ground Rod.
http://www.grove-ent.com/ANT8.html

Diagram {Sketch} Inverted "L" Antenna
---------------------------------------o
|
|
|
|
x====================C>

" - " Horizontal-Out-Arm part of the Wire Antenna Element
" | " Vertical-Up-Leg part of the Wire Antenna Element
" x " 9:1 Matching Transformer
" = " Coax Cable
" C> " PL-259 Plug to the Radio / Receiver

NOTE - This configuration {shape} of Antenna is commonly
called an Inverted "L" Antenna and lends it self to Low Noise
installation concepts : The Par EF-SWL Antenna lends itself
to this 'small' Inverted "L" Antenna Rigging and it is only
45 Feet Long and includes the Wire Antenna Element and
Matching Transformer - Just add Ground Rod plus Coax Cable
and you are ready to Rig-It and Enjoy Listing to your Radios.

DX Ace and John Plimmer,

With respect to the 'difference' in the Number of Reviews
that are Posted to eHAM; could it be partially due to the
simple Fact that :

* Shortwave Radio Listeners (SWL) like to Listen to
their Radios which is a 'passive' activity.
{Meaning / Making Them Readers 'Quiet' by Nature.}

* While the Amateur Radio Operators {Hams} like to
Talk on their Radios - Which is an "Active" Activity
{Meaning / Making Them Writers 'Braggers' by Nature.}

one man's opinion ~ RHF
.

Illegal CB'ers (keyclowns) often operate on frequencies reserved for
government services in the US and other countries. One example is that
above 27.405 there are frequencies reserved for coast guard and air/
sea rescue in Australia, NZ, etc.

Locally, the dirty nature of CB radios being fed to class C amplifiers and other garbage type emitters causes interference to communication on other CB channels.

Harmonics of these dirty transmissions often may reach the public service bands, impeding those communications.

At the neighborhood level these illegal high powered transmissions overwhelm the capability of many home entertainment appliances to supress them. A 4 watt CB radio won't generally do this but a 4 watt CB with a dirty amplifier after it often does so.

The plain fact is that CB radios, and their "export" cousins (CB's with power, mode and frequency capabilities not allowed by the FCC and smuggled into the USA illegally) are not held to the same standards of emission purity that other transmitters are. This is beacuse at the 4 watt level they do not "pollute" at a very high level. When amplified, you get the "garbage in - garbage out" syndrome. They become VERY dirty, and cause the problems mentioned above.

The reality is that keyclowns do not care about this problem or any other problem not relating to their own idea of what they should be allowed to do. They could get amateur radio licenses and be allowed up to 1500 watts of power output but they don't WANT a ham license. They WANT to operate like they do. No rules, no consideration, no clean signal, no common sense. That is the keyclown way.

Like the ones you sell, hypocrite?

http://tinyurl.com/2ql9dx

Locally, the dirty nature of CB radios being fed to class C amplifiers
and other garbage type emitters causes interference to communication
on other CB channels.

Harmonics of these dirty transmissions often may reach the public
service bands, impeding those communications.

At the neighborhood level these illegal high powered transmissions
overwhelm the capability of many home entertainment appliances to
supress them. A 4 watt CB radio won't generally do this but a 4 watt
CB with a dirty amplifier after it often does so.

The plain fact is that CB radios, and their "export" cousins (CB's
with power, mode and frequency capabilities not allowed by the FCC and
smuggled into the USA illegally) are not held to the same standards of
emission purity that other transmitters are. This is beacuse at the 4
watt level they do not "pollute" at a very high level. When amplified,
you get the "garbage in - garbage out" syndrome. They become VERY
dirty, and cause the problems mentioned above.

The reality is that keyclowns do not care about this problem or any
other problem not relating to their own idea of what they should be
allowed to do. They could get amateur radio licenses and be allowed up
to 1500 watts of power output but they don't WANT a ham license. They
WANT to operate like they do. No rules, no consideration, no clean
signal, no common sense. That is the keyclown way.

never sold any illegal radio equipment in my life, assclown. Thats a
base cb, UN MODIFIED. As for the mod info, if you were smart enough to
even comprehend it, it puts the radio on 10 meters.

As for jamming a repeater, as discussed before...LONG before...that
was a heated discussion on the machine in question. NO PERSON was
accused of jamming anything. This is just another example of how you
lie to make things fit your own weird frame.

by the way, you never answered my statements, just called me names and posted this garbage...is what I said true or false?

write your complaint letters and post them...I will correct them and
send em back so that when you write the fcc you don't look dumb.
The fact is that if something illegal were going on you would have
already used it as a hypocrisy cover over your keyclownism.
Go for it, sissy.

Bottom Line: 1. Everything I said about keyclowns is true. 2. You
can't stand it 3. Nothing you have ever done has stopped it. 4.
Nothing you ever do will stop it.
Trade media with your new lover, post anything you think of, call me
anything you want. The bottom line is you are totally incapable of
preventing the AKC from acting. Totally incapable. It has been
demonstrated now for going on 9 years. You are a keyclown, you are too
stupid to get it. We know. We grin.

The secret CB article is called "Complete, Updated, 10 meter amateur
conversion for the uniden 858 chassis" That is exactly what it does,
too.

Want a copy, queenie? Save the time and change out those CB crystals
in your Collins gear. What an ass.

5085. (OT) : The 'Difference' in the Basic Human Natures of Shortwave Radio Listeners (SWL) and Amateur Radio Operators {Hams}

- -
- - With respect to the 'difference' in the Number of Reviews
- - that are Posted to eHAM; could it be partially due to the
- - simple Fact that :
- -
- - * Shortwave Radio Listeners (SWL) like to Listen to
- - their Radios which is a 'passive' activity.
- - {Meaning / Making Them Readers 'Quiet' by Nature.}
- -
- - * While the Amateur Radio Operators {Hams} like to
- - Talk on their Radios - Which is an "Active" Activity
- - {Meaning / Making Them Writers 'Braggers' by Nature.}
- -
- - one man's opinion ~ RHF
-
- IOW: the SWLers are so appalled by the magnitude of
- bullshit flying on the Ham bands, they just sit there
- mesmerized, too stunned to go over and click on eHam?
-

BB,

NO - That would be an extreme exaggeration; and have no 'basis'
to be drawn from my original statements.

For those who simply remain Shortwave Radio Listeners (SWLs) :
It is their "Nature"* to Listen - They are Listeners and many/most
of them simply Listen to the International Radio Broadcast Bands;
and not the Amateur Radio Bands.
* Basic Personality Type who mostly Listens and Reads
and Talks and Writes less.

For those who become Amateur Radio Operators {Hams} :
It is in their "Nature"* to Talk - They are Talkers {Morse Code is
also a form of Talk/Writing} and the "Two-Way" Communication
of the Amateur Radio Bands attracts them to Ham Radio. Some/
many may also Listen to the International Radio Broadcast Bands.

* Basic Personality Type who Talks and Writes equally along with
Listening and Read as forms of "Two-Way" Communication.

It's about the 'basic' Human Nature of individuals in the Two Groups
and how that may pre-select the individual who natually are attracted
to each of the groups.

FWIW - There is a clear and fundamental 'difference' between
"Bragging" and Out-Right "Bull-Shit". -and- that is no 'bs' ;-}

it is simply my opinion - no facts or science is claimed ~ RHF
.

5086. FA: High-quality power centers for your radios and accessories (or stereos!)

Newsgroup: rec.radio.shortwave

Source record: 138004

In case you are looking for or can use a nice, filtered power center to consolidate all your radio AC power needs and have a common ground for all the radios and accessories to avoid hum and ground loops, and above all better protect the equipment, I'm auctioning two brand-name high-quality surplus units at eBay right now. See auctions # 200202398125 & 200202394421. Please check the piks and read the details. I've been using one of the HTS1000MKII since last month and I'm very very happy with it. The PC1000 is also well-made (aluminum, not cheap plastic) but I needed the extra space to plug my AC adaptors. Thank you for looking.

< SNIP RFI nonsense >

I see you got a F in math but math is not this months experiment, which is whether or not an old Troll can learn new tricks. This month we will see if I can get you weaned off of changing the subject line in threads.

To this end I will force you to respond to this thread, which is the Troll handling thread in the news group.

Now be a good boy and respond to this thread.

A radio was an option for the Isetta but apparently few bought them.
The US accessories brochure shows a Motorola unit mounted on the side
panel.

In Germany, Philips was first to offer a radio for the Isetta that was installed in a small cabinet mounted to the door. Later Blaupunkt offered a similar unit. They were expensive and it would appear that relatively few were sold as they are very rare today.

A current Isetta owner!

Wrong as usual Billy Bob. Those who spread malicious gossip are as blameworthy as the originators. I'm guessing that you also call yourself a "Christian". A few scriptures for you to ponder:

"For lack of wood the fire goes out, And where there is no whisperer, contention quiets down." Proverbs 26:20

"He who goes about as a slanderer reveals secrets, Therefore do not associate with a gossip." Proverbs 20:19

"At the same time they also learn to be idle, as they go around from house to house; and not merely idle, but also gossips and busybodies, talking about things not proper to mention." 1 Timothy 5:13

"So get rid of every kind of evil, every kind of deception, hypocrisy, jealousy, and every kind of slander." 1 Peter 2:1

There are many more that condemn what you do best i.e. tale bearing but why bother.

That is a bad trolling habit you need to stop. It is step 2 of your 12
step program to reform from being a Troll. Give yourself a chance to
change.

5128. HFCC discussions on future of DRM

Newsgroup: rec.radio.shortwave
Date: 2008-02-26 07:10:10 UTC
From: Brenda Ann <brendad@shinbiro.com>
Message-ID: <69adnf_NFe76Jl7anZ2dnUVZ_uyinZ2d@giganews.com>
Source record: 138046

HFCC discussions on future of DRM

"From both formal and informal discussions among participants at the
HFCC, it is now clear that the proposed DRM (Digital Radio Mondiale)
system, that would have converted analogue Shortwave to digital, FM
like quality reception would hardly be implemented if ever on a large
scale, beyond the current experimental stage.....there are no plans
from any large manufacturer to produce such (DRM) receivers now."

Full report, item 2 at:

- Say no to institutionalized interference.
- Just say NO to HD/IBOC!
-

BAD,

Unless 80 Plus governments around the World are going
to Build, Buy and Distribute {Give-Away-Free} the new
DRM Radios to the 85% of Shortwave Radio Listeners
who can not afford them : Then DRM is Dead the Number
of Listeners in the First-World ~15% of the World Total
is too small to justify the Cost. The First-World SWLs
have other less-costly options to Hear the same Shortwave
Radio Broadcast via local AM & FM Radio and Streaming
Audio on Demand via the Internet; all of which will give
them much better Audio Quality then an Over-the-Air
Global HF Broadcast.

Plus DRM as a Broadcast Media seemed to work best
out to 3500 km ~ 2200 Miles and provide the levels of
"Better Sound and Consistant Signal within a Shortwave
Broadcasters Continental Boundaries :
* Across Europe from one Euro Country to another.
* Across Australia : ABC Domestic Broadcasting
that goes for Domestic Broadcasting Systems of :
India, Japan, China, Philippines, Brazil, Canada,
Indonesia, and the Russian Federation.

Beyond that Range 4000 km ~ 2500 Miles the perceived
advantages of DRM by the Shortwave Radio Listeners
dropped-off and the Costs exceeded any reasonable
justification for large implimentation of DRM.

If you were to Take-a-Look you would presently find the
BBC World News in 85% of American Homes. Not on
the Radio be it AM, FM or Shorwave; but on the TV via
Cable TV and Direct Satellite TV. The older generations
grew-up Listening to the Radio and the newer Listeners
are Watchers Too; and they Watch TV and Listen to TV
Audio. For the BBC Corporation [UK] the BBC-TV
Channel is a Money Maker while the BBC-World Service
on the Shortwave Radio is a Money $pender.

For TV Broadcasters the Internet is look at as an Inter-Active
Video and Audio extension of their TV Offerings and a second
oportunity to connect-with and market themselves to their
Viewer/Listeners. TV Broadcasters View the Internet as their
Friend and a Tool to be used to build a better relationship with
their Viewer/Listeners.

Digital Radio Mondiale (DRM) is simply Over-Come By Events.
DRM - http://www.drm.org/

IMHO - The Combination of TV and the Inter-Active Internet
is way too Powerful for AM & FM Radio and Shortwave Radio
and DRM are non-starters.

drm too little too late and too costly for the roi ~ RHF
.

I saw this over at DXLD. Hopefully this might signal an end to some of the QRM on the HF bands.

5140. Entercom.get whacked!

Newsgroup: rec.radio.shortwave
Date: 2008-02-26 11:25:20 UTC
From: PocketRadio@gmail.com
Message-ID: <c052709e-4b84-4c99-ad27-d4dfed0ec3fb@72g2000hsu.googlegroups.com>
Source record: 138058

Another deal is dead at BainCapital.

Bain and Huawei Technologies of China pulled the plug on their pending $2.2 billion buyout of the Marlboro, Mass.-based 3Com Corp. when the deal ran afoul of a U.S. national security panel.
The Committee on Foreign Investment in the United States refused approving the deal since it would provide Huawei probable access to 3Com's sensitive encryption technology.

Encryption, prescription. We can trust the Chinese. Pet food? Toothpaste? Do you want your Barbie doll leaded or unleaded?

BainCapital. Try not to let the facts get in the way of a shoddy deal. Just ask Clear Channel.

If there is any upside with the BainCapital-Clear Channel deal it's that the dog and pony show that the radio industry morphed into is drawing to a close. The smoke has dissipated, the mirrors are broken and easy way outs are getting a lot tougher to pull off.

There was the news that came down late last Friday about Entercom. They posted a Q4 loss of just under $10 million, which resulted in a black Friday of firings at many of the company's radio stations. The immediate down-whacking that followed included a few air established personalities who'd been with their respective stations for over 20 years.

Old and in the way. Seniority and being established in a market is so over-rated.

It seems like only yesterday when radio chains told shareholders that their stations were solvent and recession proof. Are they making money? Sorry, no more questions.

You have major radio chains gutting their morning shows, eliminating sidekicks, writers, producers, characters - the support team that helps make a morning show entertaining and memorable.

A daypart accounting for somewhere between 40 to 60 percent of a station's total revenue is superfluous?

Some stations have even given up on doing a morning show and opting for non-personality jocks to spin music in the morning with little to no supplementary content.

That's like being rescued from an alligator attack by a man eating shark.

Then we have Regency Broadcasting stock. Got any change? You can buy it for under a buck. It closed at 95 cents to be exact. Citadel did $1.49. Cumulus, $5.82. Clear Channel closed at an inflated $32.24. All the king's horses and all the king's men. You know the rest.

Not all chains are drowning in debt - but none of them have paddles and that stinking creek is rising quickly.

So much of radio's future depends on what comes down in San Antonio over the next few weeks.
The mess Clear Channel can't extricate itself from continues to grow more tentacles and now they're choking the entire industry.

The deal in jeopardy at the moment is Clear Channel's $1.2 billion sale of its television unit to Providence Equity Partners, a media-focused buyout firm. Providence balked at the originally agreed-upon price, citing deterioration in the business and the economy, which prompted a lawsuit by Clear Channel. But late Friday following a few hours of name calling and finger pointing, the two sides had struck a deal in principle for Clear Channel to drop trou by $100 million.

But that may be too little too late.

Three banks are backing the deal. Two of them, Goldman Sachs and UBS, agreed to finance the revised deal, with Providence borrowing less money at a higher interest rate - but the third, Wachovia, just wants out. They hired the law firm of Robinson, Bradshaw & Hinson to make the split permanent and to find an escape hatch to avoid getting stuck with the $45 million break-up fee.

Clear Channel (and others involved in privatizing schemes) is having problems getting banks to back them. The credit market freeze chilled chances for banks to resell loans - and that's going to force them to take huge write-downs to keep them on the books at a time when they're already reeling from subprime mortgage scams.

It's doubtful the Providence deal will close without Wachovia.

If that deal crashes, it's almost certain doom for the Bain/Lee-Clear Channel buyout.

And that may be a good thing.

Devaluation will rear its ugly head - and it'll become a buyer's market - and loans will be made contingent upon a realistic sales price - with realistic multiples. Then, the opportunity for real broadcasters to reenter the business will be one step closer to reality.

You do have to wonder if the non-broadcasters in this business have a final trick up their sleeve.

Can they prop up themselves up for one more glorious year of looting at shareholder expense?

Doubtful.

http://gormanmediablog.blogspot.com/2008/02/radio-running-on-empty.html

Well, maybe they can continue to fund those pre-programmed HD Radio jukeboxes!

Supposedly, he a a research staff of 50 (yea, right) and that is
usually one of the first to get canned.

I like having a tubular steel roll cage around me (as opposed to the
open road). We have idiots with motorcycles where I work. One of them
shows up in a cast about once a month.

When I do become a Ham I will only use CW or other digital modes, so
that I won't offend the SWLers.

If you go to Ubuntu you can download a live CD iso file that'll boot on
your computer and allow you to try it out (with your hardware, etc.)
without actually installing it.

This book is very helpful for somebody starting out in Ubuntu Linux:

Ubuntu for Non-Geeks, 2nd Edition: A Pain-Free, Project-Based,
Get-Things-Done Guidebook

[ILLUSTRATED] (Paperback)
by Rickford Grant (Author)

Dave,

Shortwave Radio's Days are numbered and it is declining
and being supplanted by more 'effective' Video and Audio
Systems that have a lower-cost of delivery; and DRM is
simply 'too-little-too-late'. DRM has become OBWE.

For effective deployment of Audio Content in the Third World
to Underdeveloped Rural Areas with few and limited resources.
I now appears that within Country FM Radio is the better option.
At about US $5 per AM/FM Radio to distribute Radios to the
Population in Mass.

What would any new stand-a-lone DRM system cost per
DRM {Ready} Radio ?

The low-cost Video and Audio Content delevery system to
an Underdeveloped Rural Area "Hub" is a Direct Broadcast
Satellite Receiver for both TV, Radio and Internet: That is
couple with a Low-Power FM Transmitter to re-broadcast
the Signal(s) over a defined Limited Area within a Country.

The Rural Area "Hub" is in Village that is centrally located
for an Area with a Ten Mile Diameter. The DBS Receiver

and the FM Transmitter are located within the Village's
School. The TV Output is used within the School to bring
the World to the Students. The Audio Output is used to
Bring the World to the People.
* The DBS System can also include Internet Connectivity.
* The DBS System gives the Biggest Bang-for-the-Buck
and is decentralized on the Ground.

Where-As for an Audio Only System using DRM via
Shortwave Radio it would take about as much resources
and only Deliver Audio Content : When 'richer' TV and
Internet Content providing both Video and Audio is the
preferred Media by the younger Media Consumers.
* Desktop PC
http://www.walmart.com/catalog/product.do?product_id=5969099
* Ten-Tec RX-320D Shortwave Receiver with DRM
http://www.universal-radio.com/catalog/commrxvr/0321.html
+ Shortwave Antenna
* Ramsey FM100B - FM Stereo Radio Station
http://www.ramseyelectronics.com/cgi-bin/commerce.exe?preadd=action&key=FM100B
+ FM Transmitting Antenna

All the above requires Electrical Power and a Stand-a-lone
Solar Power System for the "Hub" School is a neccessary
part of either the DBS or DRM Systems.

idtars ~ RHF

Unfortunately, Eduardo is near retirement (probably past-due, but has nothing else to do), so it may not matter too much - would be mostly a blow to his HUGE ego. Eduardo also claims that his retirement funds are in a 401K, but I was hoping they were in Univision's Pension Plan (I bet, some of it is), because just like with Enron, these are open to pillaging by the company.

5162. Synergy : Christian Radio Broadcasting plus Shortwave Radio

- why are there so many fundamentalist Christian
- broadcasts in English on shortwave?
-

BS,

Christian Radio Broadcasts : It is a Message of Hope
and Salvation for those seeking one or both around the
World.
* It can Go where Christian Ministers and Evangelist
may not be allowed to; or fear to go.
* It is supported by the giving of the Faithful and is not
done as a Commercial Activity.

Shortwave Radio : It crosses Borders without a Passport.
* One of the most Cost-effective Delivery Systems for :
What It Does; Where It Can Go; and Be Distributed To
Around the World from a Centralized Point.
* It is hard to Stop the Message from Getting-Through;
and being Received by anyone in a Country that is allowed
to have a low-cost AM/FM Shortwave Radio.
* Costs the Shortwave Radio Listeners Nothing -cause-
It's "Free" Over-the-Air Radio.

Christian Radio Broadcasts +plus+ Shortwave Radio

> >> Talk on their Radios - Which is an "Active" Activity
> >> {Meaning / Making Them Writers 'Braggers' by Nature.}
>
> >> one man's opinion ~ RHF
>
- - IOW: the SWLers are so appalled by the magnitude
- - of bullshit flying on the Ham bands, they just sit there
- - mesmerized, too stunned to go over and click on eHam?
-
- When I do become a Ham I will only use CW or
- other digital modes, so that I won't offend the SWLers.
-

WHY : Shortwave Radio Listeners (SWL) -don't listen to-
Amateur Radio Operators {Hams} ?

Dave,

IMHO - The Vast Majority of Shortwave Radio Listeners (SWLs)
are not offended by Amateur Radio Operators {Hams}.
* Most find Hams interesting as individuals.
* But Listening to Hams is a Different Thing : They {the Hams}
are having a Two-Way Conversation and you the SWL is simply
Listening-in.
* The Ham's discussion may be interesting to them; but since
the SWL is not 'part' of the conversation it is BORING to the SWL.
SO IN FACT - The majority of SWLers do not Listen to Hams

on a regular basis; where as the SWLs listen to Broadcast Radio
Daily / Weekly.

Something-to-Think-About :
Would You Go To A Party Where All You Could Do Was
Stand-in-the-Corner and Listen : While Everyone Else could
Form Small Groups and Talk and Enjoy Themselves ? ? ?

Where As - Broadcast Radio has by-design Programming
Content that is meant to be Listened-To and Enjoyed by
"The Listener" {One-Way Communication} Be It Music
Radio or Talk Radio.

Again this is simply my opinion -and-
no facts or science is claimed ~ RHF
.

Hi
I am trying to pick up the weather images using my Target HF3 and my PC,
what would be a good program for this please
Also what are the frequencies for the weather satellites etc.
thanks
Roger

Many good (and serious) answers else-thread. I'll add that Christianity is a proselytizing religion, so there is a moral imperative in many expressions of fundamentalist Christianity to Go Forth And Spread The Word.

Since Islam is also a proselytizing religion, we should expect a fair amount of similar sorts of shows. In my limited experience, this seems to be the case. If you hunt around different parts of the world you can pick up more than a few similar Islamic stations, mostly out of North and East Africa, and the Middle East. I am, of course, assuming that these stations provide the same purpose as their Christian counterparts in spreading The Word. Which might be untrue, since I don't understand Arabic. The French stations out of North and West Africa certainly covered much the same ground with respect to the One True Religion.

Many of the strongest Christian stations I pick up are in North America or English-speaking areas of the northern hemisphere; so easier to pick up by folks living where those commonly propagate. So, there might be some self-selecting going on since it is so easy for most of us to hear these guys. There might be a little bit of preaching to the converted going on, maybe.

HELLO ALL MY SUBORDINATE MONKEYS,CHIMPS,AND RODENTS.
this is your commander speaking!! due to your low intelligence and inability to comprehend any thing, i will take some time today to explain the truths of some recent actions of mine. a while back, things got pretty rough being a senior citizen. my monthly social security checks just were'nt paying the carrot bills and rent for my dirt hole domicile.so thinking of you being as dumb as you are monkey, i decided i'd run for president.after a few months with no donations and no funds to campaign with my thoughts turned to you again. how can i make my groupie, jock-rideing, kiss my azz, subordinate fans, dole out money for my pocketbook again???? well you know monkeys you sure did fatten my wallet last time!!! thanks for buying my T-Shirts, in the near future i will find more wares to whore out to you. since anything i touch becomes a shiny object worth buying to you monkeys i've got your next purchase covered!!

AS OF TODAY I WILL BE SELLING MY RABBIT DROPINGS!! ,THEY WILL BE HARD, DRIED OUT AND SPRAY PAINTED SILVER,BEACUSE I KNOW YOU LIKE SHINY OBJECTS MONKEY BOYS AND GALS!!!

SO IF YOU'D LIKE YOUR VERY OWN, VERY SPECIAL, "COMMANDER BUNNY FECE'S PELLET" PLEASE
LOG INTO THE F.R.N. AND POST A REQUEST,THE GOING PRICE WILL BE $20 A TURD. REMEMBER I ONLY EAT SO MUCH STRAW AND GRASS A DAY THAT THERE MIGHT BE A BACK UP ON ORDERS FOR A FEW WEEKS.

ORDER IN ADVANCE,ORDER EARLY,ORDER NOW!!!

>* Radio Australia - The ABC @ 9590 kHz
>* Radio New Zealand International @ 9765 kHz

Er, that's Midnight to 3 AM on the West Coast of North America.
It's just as good, or better at a more sane hour.

1. The BBC 9740 comes in until 16:00, sunspots premitting. (Been real
crummy this year so far). 6195 and 5975 from about 13:00 and an hour on
6040 (15:00?) are better bets.

2. Radio Aus is good until 14:00 on 9580, and a bit later on 9590,
and starts up on 7240 at 14:00. Also 6020 (by 12:00 for sure) then
5995 at 14:00.

3. RNZI is down in the 6 MHz band later on. 5950, I think.

HIya Rog,

Look for JVComm, or MScan - they're both pretty good - however If you've
still got a DOS PC knocking around - grab a copy of JVFAX (you'll need
to build the interface, but its dead easy!)

Frequencies int eh UK - 4.610MHz, 7.880 and 8.878 (not too sure on the
last one!) - all USB - but tune down 1.9 kHz from the frequency so as
you get a defin

The frequencies for the Weather Satellites are in the 137MHz Band - I
use WXtoIMG for Weather Satellite - its great with a Dartcom RX, and a
discone in the loft!

Well I suppose the obvious answer is because there are a lot of interested listeners willing and able to tune into the religious broadcasts on HF. Once upon a time the same question could have been asked about government sponsored broadcast stations like the BBC.

Additionally, since most churches are on a tight budget the relatively low cost of an HF broadcast allows them to cover a larger area than would be possible with multiple FM or MW broadcasts. Finally long range HF broadcasts would be of interest to those churches who want to broadcast their message overseas.

DX Ace,

Yes "AC6V" has been mentioned some 853 Times in the
Rec.Radio.Shortwave Newsgroup - http://tinyurl.com/2gptkb
Rec.Radio.Amateur.Antenna shows AC6V listed 714 Times.

FWIW - I myself have Reference his website 45 Times here
on RRS as a place for the Newbie or other Interested Party
to Check-Out and Learn something more about Radio and
Shortwave Radio {High Frequency Broadcasting}.

Rod Dinkins, AC6V (SK) - http://www.ac6v.com/
AC6V's website "Amateur Radio and DX Reference Guide"
Continue to be a valuable Resource on the Internet for not
only Amateur Radio Operators but also for those Shortwave
Radio Listeners (SWLs) who want to get into more of the
Technical aspects of the Radio Hobby.

Good News <http://www.arrl.org/?artid=8035> Link says
that AC6V's son "Jeff" has Hosted {been running} his father's
WebSite for the past Five Years. :o)

Plus AC6V's son "Jeff" plans on getting his Amateur Radio
License and applying for his father's Call Sign. :o)

SHOUT-OUT - To You Newbie Radio Listeners (SWLs)
and those wanting to Refresh heir knowledge about the
Technical aspects of the Radio Hobby.
Check-Out the : "Amateur Radio and DX Reference Guide"
-by- Rod Dinkins, AC6V (SK) - http://www.ac6v.com/

IMHO - This is not (OT) but very Shortwave and Radio related.

dxAcehole, pathological liar and common drunk, during his fifth annual farewell tour, said:

> Why is it that you queers always seem to **SIGH** a lot?

==========
From: - Sat Feb 16 00:52:22 2008

I really don't want to say this, my many shortwave friends, but I find that I am giving up far to much of my increasingly valuable time here on RRS trying to educate the faux, the debutantes, and those who tote..

Therefore, I've simply decided to give up RRS.

Goodbye, I sincerely hope that you all find your niche in the world of SW.

dxAce
Michigan
USA

==========

The Wit and Wisdom of Steve Lare, aka dxAce,
Supreme Commander United Michigan Militias
(Updated regularly):

==========

I ain't white, but unlike you, I dislike no one.

Why is it that you queers always seem to **SIGH** a lot?

Now get your homo ass working on that documentation, boy!

Give it a shot queer boys, I dare ya!

Dumbass Canucks, sure ain't Rolex wearin' respectable folk...!

Cocksuckers such as your self.

Now go suck on some sushi, you little miscreant.

I just asked you to have the cunt send me a letter, boy.

Damn, the Canucky Niggah didn't have a damn thing to say...

Yes, I am witty, and I am wise!

Let me sum up, you Canucks are assholes!

Hit the road, drug addled fool.

Shame on CanaDuh for killing thousands of people every day.

Be sure to tell the bitch to send me that letter, faggot!

get your bitch *daughter* to send me a letter

Have the bitch send me the letter!

Well, go tell your other cocksucking countrymen.

Hey, have the bitch send me a letter

Ain't gonna happen, ya got no air farce, ya got no ne vuy, va goy nuthitin?

Have the bitch send me a f00kin letter!

You folk really think ya got balls?

Now run along to wherever it is you little debutantes run off to...

I'll be waiting for that letter from your *daughter*, asshole!

Oh yeah, tell me baby...

Hey, little pussy boy, we spell it "cunt" out here, just like I think I spelled it originally, boy.

Never touched the skanky,,,

If I don't get that letter, boy, then you and your *daughter* must both be drunk, eh?

Finally shut you up, eh boy?

Have the bitch send me a letter on whatever letterhead YOU might make up.

Ain't that just speshul! He's got to go find somewun to fake him a lettter.

Have the bitch send me a letter on her firms letterhead, boy.

Great, then get your bitch *daughter* to send me a letter on her firms letterhead within the next two weeks!

Have your *daughter* draw up a contract, BOY!

Hey, 'Edurado', have your *daughter* get in touch with me, amigo

True, ain't it, little faux Hispanic BOY... (Heavy emphasis on the BOY!)

Guess that shut the little boy up!

Stuff it up your prancing ass, 'Tardo!

You dumb sand niggers (sorry, I categorize ya all this way) need to understand that you need to get your collective shit together...

I'm LMFAO, since I've busted the f00kin faggot!

You are after all a drug addled 'tard boy who
obviously knows little about the SWL/DX hobby.

Go blow some IBO Cock, and leave the real radio hobbyists alone, OK?

Let the faggot boy prove it!

LMFAO at the f00kin faggot

Yes, I learn more and more with each passing day!

LMFAO at the pathological liar!

Lying 'tard boy, much like the other debutante, malcontent, faux boys
who inhabit the lace we call RRS.

You, on the other hand are nothing more than a sorry little
homosexual 'tard

Liar, liar, pantalunes on fire! (1)

New history will be made when we crush CanaDuh!

Kan you just imagining that, you little faggot Cannucky boy?

Anybody, even Bozo, is worth more than some dumbass, faggot, Canuck!

Wonder why.... could it be that the Canucky Niggah is timid, afraid...?

Get busy, boy!

But you can't prove it, retard boy!

I know you faggots have dreams

Blow it out your ass, you dumbass Canadian! You and the rest of your
dumbass countrymen, and women too!

You'd not be very happy if I returned, little bitch boy!

Go get some IBOCock, 'tard boy, and bring home a taste for yer mama.

If you'd like to call me, I'm here to help you until 0330 GMT at:
616 335-9762
dxAce
Michigan
USA

Go give your boyfriend a blow job!

Talk about misery, you're in f00kin CanaDuh, boy!

Something for your faux Hispanic cock sucking brain to think about, eh?

Or better yet, go get yourself some IBO Cock!

Poor little cocksucker just had it handed to him

Eh? You sum dumass Canucuy bithyboy...

As long as it screws you Canucks, I'm a happy camper!

They are mere asswipes, suitable for flushing.

That's because you're a fucking liar!

Cry me a f00kin river.

Awwwww... the poor whiny dumbass Canuck is back at it again today.

Huh... you be just another stupid white boy outta Cleveland...
I suggest you get together with your "significant other" and bump butt
with each other,

Because I hate White Boy Canucks who suck cock...

Best you shuffle down the alley! That's what your mama wanted!

Crazy Retarded Australian People?

"Even 2 cents is more than a totally worthless Canuck"

Funny how the US Govt. sent me over $50,000 last year

You can preDICK all you want, you fraudulent cock sucking,
pathologically lying old bastard boy!

Hey, dumbfuck Canuck, I was not asked to leave!

I went and bought ammo... I still gots it case them tard boys such as
edweena gets stirred up.

And 10,000 rounds isn't a lot.

It was Russian ammo. I don't like the Chinese stuff.

That's not Canuckian, boy!

Kiss my ass, pedant!

I'm LMFAO, Mr. Gay-Lick!

Obfuscate, you little prancer!

LMAO at the 'tard.

Thing is, you 'tards are pretty fixated upon one set of parameters.
That is after all why you are considered to be 'tards!

As always, your head is up your f00kin ass.

You fuckin' Liberal asswipes are always ready to give somebodys else's
goodies away...

And, hopefully, my dumbass cousin in Mill Valley will leave me her
Corvette.

Obviously, you leep your head up your f00kin ass all day long.

I don't 'fear' homos, oh faux one!

Liar, liar, pantalunes on fire! (2)

Apparently you are the 'bendover boy'....

Do you spit or swallow?

Oh, I certainly have, time after time.

At least I went farther than you!

Good lubricant for you and the boys?

It's what dxAce uses!

that's good enough for me!

One can never slide the BS by dxAce

Not as well as you, fudge pack.

Go for it, dumbass!

Oh come on... it's Fall forward and Spring back. Everyone knows that!

Hit the road, drug addled fool.

Hey, I love kickin' gay-lick ass!

Pretty much what I indicated to you a while back, you f00kin prancer.

The only thing you know about short wave is that that is what your
mother gave you when she sent your f00kin ass packin' outta Cleveland.

Screw the drug addled retards.

Nah, I only attack the messenger when he/she/it is
obviously drug addled.

So, beat the rush and get the hell off of RRS, you f00kin retard.

Well, in you, we have a drug addled retard in our midst.

Get over it, you fake Hispanic piece of excrement.

And when you do confront HD, you'll have Cocksucker Dave and
The Prancer Boys to thank for it.

Damn... I'm of mixed race ancestry myself, what ever should I do?

Next time we come over the pond once again to save your sorry ass's
we'll have to dismantle that stuff.

Heck, I bought 1000 shares of FSEAX the other day.

Don't do business with the Huntington Investment Company,
in particular a fellow named Joseph Klein.

Not at all, we are both Miami Indians. ya got a problem with that, boy?

Ya right, suck my dick...

Believe it, it's like a dream to be with you again...

Then hit the road, you drug addled retard.

Just like you wish that you worked for me, retard!

Proven time and time again, fudge pack.

Get it, retard?

Dey done unnerstannn that us nateev boyyys R real Mericans!

I sure he is.

Insert your Gay-Lick reply here, boy:

And yet another Liberal rant

Sorry, I'm not a racist like you, Edweenie...

Nah, he was fake little cock sucker like you!

Your pathological lying is an offense to me, and more than likely an offense to God as well.

No medications here, cock sucker boy..

Stuff a watermelon up it

But that stuff isn't what dxAce uses!

Come on now, you being a nice Liberal, Carbon Footprint, Al Gore, Cock Sucking kinda Canuck Bastard..

I won R plantation up nord, dat dem dum ass Canuckys be oween us, ya be 'standin me?

CanaDuh is stupidity!

Stupid little pussy faggot!

Liar, liar, pantalunes on fire! (3)

Mr. Edweenie, the forces of Good are gonna come visit your sorry fake Hispanic White Boy Ass if you keep it up!

Pay attention, cock sucker...

LMFAO as I sit and look at my royalty cheques...

You've done this before, cock sucker...

LMFAO at yet another dumb friggin Canuck..

I know it may be hard, but as you withdraw, it will shrink away..

Oh damn, I guess we pissed another wanker off, Cuz..

I get my ride be fixed, I be cruisin to be givin ya da shake, yu be knowin, eh?

Try again, shithead.....

Dem Canucky boyz are dumaz rasissts..

We gone be sen u to sumplac bad boy... u be so bad weben the reel Canuckys won wan u.

Fookin bustards! Like Edweenie!

Best you wake up soon... fookin retard leetle beetch..

Fookin 'retard.

It is then my patriotic friend, you must reach in the closet, place your hands upon the weapon, and blow the cock sucking, bean blower back into Mary's arms....

Indeed, I'm now at WAR with Canuckistan..

May the Great Spirit help the hapless bastards.

Actually VA facilities are quite good, but if you Canucky niggahs poke around one might find a lot of things wrong.

At any rate, I'd bet it beats the Canucky Third World state of care...

CanaDuh sucks...

Wanna go to war, shit head?

Think you might win? Think you got a chance?

If you don't... I'd keep my fookin Canucky mouth shut, boy...

Meanwhile, I plan for the Spring campaign, looking forward to the Blind River Massacre.

I collect stamps!

****

The link cited at the beginning of this thread is dead. Searching the Monitoring Times Shortwave Central Blog for "DRM", "HFCC" and "gospel" turns up nothing with the quoted passage. One might surmise that the item has been pulled and is left to speculate why. Maybe it was inaccurate.

HFCC is an ITU body - the High Frequency Coordinating Committee. Given the claims of broadcasting experience and professionalism, and especially expertise in the field of DRM on primedrm.com, I'm surprised you ask. DRM broadcast transmissions are scheduled on frequencies arranged through this body.

Tom

I ain't white, but unlike you, I dislike no one...

Hit the road, drug addled fool.

Be sure to tell the bitch to send me that letter, faggot!

get your bitch *daughter* to send me a letter

Have the bitch send me the letter!

Hey, have the bitch send me a letter

Have the bitch send me a f00kin letter!

I'll be waiting for that letter from your *daughter*, asshole!

I just asked you to have the cunt send me a letter, boy.

Hey, little pussy boy, we spell it "cunt" out here, just like I think

spelled it originally, boy.

If I don't get that letter, boy, then you and your *daughter*
must both be drunk, eh?

Finally shut you up, eh boy?

Have the bitch send me a letter on whatever letterhead
YOU might make up.

Ain't that just speshul! He's got to go find somewun to fake him a
lettter.

Have the bitch send me a letter on her firms letterhead, boy.

Great, then get your bitch *daughter* to send me a letter on her
firms letterhead within the next two weeks!

Guess that shut the little boy up!

Stuff it up your prancing ass, 'Tardo!

You dumb sand niggers (sorry, I categorize ya all this way) need to
understand that you need to get your collective shit together...

I'm LMFAO, since I've busted the f00kin faggot!

You are after all a drug addled 'tard boy who
obviously knows little about the SWL/DX hobby.

Go blow some IBO Cock, and leave the real radio hobbyists alone, OK?

Let the faggot boy prove it!

LMFAO at the f00kin faggot

Yes, I am witty, and I am wise!

Lying 'tard boy, much like the other debutante, malcontent,
faux boys who inhabit the lace we call RRS.

You, on the other hand are nothing more than a sorry little
homosexual 'tard

Liar, liar, pantalunes on fire! (1)

New history will be made when we crush CanaDuh!

Kan you just imagining that, you little faggot Cannucky boy?

Anybody, even Bozo, is worth more than some dumbass, faggot, Canuck!

Wonder why.... could it be that the Canucky Niggah is timid,
afraid...?

Get busy, boy!

I know you faggots have dreams

Blow it out your ass, you dumbass Canadian! You and the rest of your
dumbass countrymen, and women too!

You'd not be very happy if I returned, little bitch boy!

Go get some IBOCock, 'tard boy, and bring home a taste for yer mama.

If you'd like to call me, I'm here to help you until 0330 GMT at:
616 335-9762
dxAce
Michigan
USA

Go give your boyfriend a blow job!

Talk about misery, you're in f00kin CanaDuh, boy!

Something for your faux Hispanic cock sucking brain to think about,
eh?

Or better yet, go get yourself some IBO Cock!

Poor little cocksucker just had it handed to him

Damn, the Canucky Niggah didn't have a damn thing to say...

Eh? You sum dumass Canucuy bithyboy...

As long as it screws you Canucks, I'm a happy camper!

They are mere asswipes, suitable for flushing.

That's because you're a fucking liar!

Cry me a f00kin river.

Awwwww... the poor whiny dumbass Canuck is back at it again today.

Huh... you be just another stupid white boy outta Cleveland...
I suggest you get together with your "significant other" and bump
butt with each other,

Because I hate White Boy Canucks who suck cock...

Best you shuffle down the alley! That's what your mama wanted!

Crazy Retarded Australian People?

"Even 2 cents is more than a totally worthless Canuck"

Funny how the US Govt. sent me over $50,000 last year

You can preDICK all you want, you fraudulent cock sucking,
pathologically lying old bastard boy!

Hey, dumbfuck Canuck, I was not asked to leave!

I went and bought ammo... I still gots it case them tard boys
such as edweena gets stirred up.

And 10,000 rounds isn't a lot.

It was Russian ammo. I don't like the Chinese stuff.

That's not Canuckian, boy!

Kiss my ass, pedant!

I'm LMFAO, Mr. Gay-Lick!

Obfuscate, you little prancer!

LMAO at the 'tard.

Thing is, you 'tards are pretty fixated upon one set of parameters.
That is after all why you are considered to be 'tards!

As always, your head is up your f00kin ass.

You fuckin' Liberal asswipes are always ready to give somebodys
else's goodies away...

And, hopefully, my dumbass cousin in Mill Valley
will leave me her Corvette.

Obviously, you leep your head up your f00kin ass all day long.

I don't 'fear' homos, oh faux one!

Liar, liar, pantalunes on fire! (2)

Apparently you are the 'bendover boy'....

Do you spit or swallow?

Oh, I certainly have, time after time.

At least I went farther than you!

Good lubricant for you and the boys?

It's what dxAce uses!

that's good enough for me!

"One can never slide the BS by dxAce"

Not as well as you, fudge pack.

Go for it, dumbass!

Oh come on... it's Fall forward and Spring back. Everyone knows that!

Hit the road, drug addled fool.

Hey, I love kickin' gay-lick ass!

Pretty much what I indicated to you a while back, you f00kin prancer.

The only thing you know about short wave is that
that is what your mother gave you when she sent
your f00kin ass packin' outta Cleveland.

Screw the drug addled retards.

Nah, I only attack the messenger when he/she/it is
obviously drug addled.

So, beat the rush and get the hell off of RRS, you f00kin retard.

Well, in you, we have a drug addled retard in our midst.

Get over it, you fake Hispanic piece of excrement.

And when you do confront HD, you'll have Cocksucker Dave
and The Prancer Boys to thank for it.

Damn... I'm of mixed race ancestry myself, what ever should I do?

Next time we come over the pond once again to save your
sorry ass's we'll have to dismantle that stuff.

Heck, I bought 1000 shares of FSEAX the other day.

Don't do business with the Huntington Investment Company,
in particular a fellow named Joseph Klein.

Not at all, we are both Miami Indians.
ya got a problem with that, boy?

Ya right, suck my dick...

Believe it, it's like a dream to be with you again...

Then hit the road, you drug addled retard.

Just like you wish that you worked for me, retard!

Proven time and time again, fudge pack.

Get it, retard?

Dey done unnerstannn that us nateev boyyys R real Mericans!

I sure he is.

Insert your Gay-Lick reply here, boy:

And yet another Liberal rant

Sorry, I'm not a racist like you, Edweenie...

Nah, he was fake little cock sucker like you!

Your pathological lying is an offense to me,
and more than likely an offense to God as well.

No medications here, cock sucker boy..

Stuff a watermelon up it

But that stuff isn't what dxAce uses!

Come on now, you being a nice Liberal, Carbon Footprint,
Al Gore, Cock Sucking kinda Canuck Bastard..

I won R plantation up nord, dat dem dum ass Canuckys
be oween us, ya be 'standin me?

CanaDuh is stupidity!

Stupid little pussy faggot!

Liar, liar, pantalunes on fire! (3)

Mr. Edweenie, the forces of Good are gonna come visit
your sorry fake Hispanic White Boy Ass if you keep it up!

Pay attention, cock sucker...

LMFAO as I sit and look at my royalty cheques...

You've done this before, cock sucker...

LMFAO at yet another dumb friggin Canuck..

I know it may be hard, but as you withdraw, it will shrink away..

Oh damn, I guess we pissed another wanker off, Cuz..

I get my ride be fixed, I be cruisin to be givin ya da shake,
yu be knowin, eh?

Try again, shithead.....

Dem Canucky boyz are dumaz rasissts..

We gone be sen u to sumplac bad boy...
u be so bad weben the reel Canuckys won wan u.

Fookin bustards! Like Edweenie!

Best you wake up soon... fookin retard leetle beetch..

Fookin 'retard.

It is then my patriotic friend, you must reach in the closet,
place your hands upon the weapon, and blow the cock sucking,
bean blower back into Mary's arms....

Indeed, I'm now at WAR with Canuckistan..

May the Great Spirit help the hapless bastards.

Actually VA facilities are quite good, but if you Canucky niggahs
poke around one might find a lot of things wrong.

At any rate, I'd bet it beats the Canucky Third World
state of care...

CanaDuh sucks...

Wanna go to war, shit head?

Think you might win? Think you got a chance?

If you don't... I'd keep my fookin Canucky mouth shut, boy...

Meanwhile, I plan for the Spring campaign,
looking forward to the Blind River Massacre.

I collect stamps!

By going private, Univision, as with the rest of radio, is in a retreat strategy - most have lost 90% in stock value, CC 2/3 and up for sale which may be a bust, so it is only a matter of time.

I would never sink to the level of posting his home address. That would be as bad as him phoning past and present employers of this newsgroup's regulars and trying to get information on them.

Any song that bashes curling is fine with me. Curlers have been getting away with that abomination of a sport for WAY too long.

Gotta run...we have to go out and find a few bagpipers to mutilate.

Some would claim the definition of "perfect pitch" is the sound made
when bagpipes hit the bottom of a dumpster.

As for myself, there are occaisions when they are just plain
appropriate and their sound is appreciated.

Interesting question: do any SW broadcasters use bagpipes for their
interval music?

I don't know why you're doing this. Personally, I use it right after I catch the Acehole insulting yet another member of this fine group.

Indiscriminate usage tends to water down the effect. It causes an inflationary spiral, which lessens the import of the message. Please restrain yourself. If you find that impossible, at least construct your own little album of remembrances.

'Album' may be a bit too verbose. 'Snippets of scum' may be more appropriate when they're quotations from the dxDrunkard himself.

There's a reason why they were put at the front of an assault on the
enemy lines.

With the advent of the machine gun, the number of pipers climbed
proportionately.

Coincidence? I think not.

Same here. I manage a pile of laptops begged off IT running 98SE, as a
huge amount of critical equipment has software that still needs a
command prompt and direct control of serial ports.

I just noticed the RRS newsgroup in the list, there's probably a few
people there who know about Motorollover's MRSS woes if you have radios
more than 10 years old.

Dictated by Mark Twain [Samuel Clemens] in 1904 in advance of his death in 1910.

During his writing career, he had criticized perhaps every type of person or institution either living or dead. But this piece was just a little too hot for his family to tolerate. Since they believed the short narrative would be regarded as sacrilege, they urged him not to publish it. However, Sam was to have the last word, and even the word after that. Having directed it to be published after his death, he said,

"I have told the truth in that... and only dead men can tell the truth in this world."

- William H. Huff

THE WAR PRAYER

It was a time of great exulting and excitement. The country was up in arms, the war was on, in every breast burned the holy fire of patriotism; the drums were beating, the bands playing, the toy pistols popping, the bunched firecrackers hissing and sputtering; on every hand and far down the receding and fading spread of roofs and balconies a fluttering wilderness of flags flashed in the sun; daily the young volunteers marched down the wide avenue gay and fine in their new uniforms, the proud fathers and mothers and sisters and sweethearts cheering them with voices choked with happy emotion as they swung by; nightly the packed mass meetings listened, panting, to patriot oratory which stirred the deepest depths of their hearts, and which they interrupted at briefest intervals with cyclones of applause, the tears running down their cheeks the while; in the churches the pastors preached devotion to flag and country, and invoked the God of Battles, beseeching His aid in our good cause in outpourings of fervid eloquence which moved every listener. It was indeed a glad and gracious time, and the half dozen rash spirits that ventured to disapprove of the war and cast doubt upon its righteousness straight way got such a stern and angry warning that for their personal safety's sake they quickly shrank out of sight and offended no more in that way.

Sunday morning came - next day the battalions would leave for the front; the church was filled; the volunteers were there, their young faces alight with martial dreams - visions of the stern advance, the gathering momentum, the rushing charge, the flashing sabers, the flight of the foe, the tumult, the enveloping s

moke, the fierce pursuit, the surrender! - then home from the war, bronzed heroes, welcomed, adored, submerged in golden seas of glory! With the volunteers sat their dear ones, proud, happy, and envied by the neighbors and friends who had no sons and brothers to send forth to the field of honor, there to win for the flag, or failing, die the noblest of noble deaths. The service proceeded; a war chapter from the Old Testament was read; the first prayer was said; it was followed by an organ burst that shook the building, and with one impulse the house rose, with glowing eyes and beating hearts, and poured out that tremendous invocation:

"God the all-terrible! Thou who ordainest, Thunder thy clarion and lightning thy sword!"

Then came the "long" prayer. None could remember the like of it for passionate pleading and moving and beautiful language. The burden of its supplication was, that an ever-merciful and benignant Father of us all would watch over our noble young soldiers, and aid, comfort, and encourage them in their patriotic work; bless them, shield them in the day of battle and the hour of peril, bear them in His mighty hand, make them strong and confident, invincible in the bloody onset; help them to crush the foe, grant to them and to their flag and country imperishable honor and glory - An aged stranger entered and moved with slow and noiseless step up the main aisle, his eyes fixed upon the minister, his long body clothed in a robe that reached to his feet, his head bare, his white hair descending in a frothy cataract to his shoulders, his seamy face unnaturally pale, pale even to ghastliness. With all eyes following and wondering, he made his silent way; without pausing, he ascended to the preacher's side and stood there, waiting. With shut lids the preacher, unconscious of his presence, continued his moving prayer, and at last finished it with the words, uttered in fervent appeal, "Bless our arms, grant us victory, O Lord our God, Father and Protector of our land and flag!"

The stranger touched his arm, motioned him to step aside - which the startled minister did - and took his place. During some moments he surveyed the spellbound audience with solemn eyes, in which burned an uncanny light; then in a deep voice he said:

"I come from the Throne - bearing a message from Almighty God!" The words smote the house with a shock; if the stranger perceived it he gave no attention. "He has heard the prayer of His servant your shepherd, and will grant it if such be your desire after I, His messenger, shall have explained to you its import - that is to say, its full import. For it is like unto many of the prayers of men, in that it asks for more than he who utters it is aware of - except he pause and think.

"God's servant and yours has prayed his prayer. Has he paused and taken thought? Is it one prayer? No, it is two - one uttered, the other not. Both have reached the ear of Him Who heareth all supplications, the spoken and the unspoken. Ponder this - keep it in mind. If you would beseech a blessing upon yourself, beware! lest

without intent you invoke a curse upon a neighbor at the same time. If you pray for the blessing of rain upon your crop which needs it, by that act you are possibly praying for a curse upon some neighbor's crop which may not need rain and can be injured by it.

"You have heard your servant's prayer - the uttered part of it. I am commissioned of God to put into words the other part of it - that part which the pastor - and also you in your hearts - fervently prayed silently. And ignorantly and unthinkingly? God grant that it was so! You heard these words: 'Grant us victory, O Lord our God!' That is sufficient. The whole of the uttered prayer is compact into those pregnant words. Elaborations were not necessary. When you have prayed for victory you have prayed for many unmentioned results which follow victory - must follow it, cannot help but follow it. Upon the listening spirit of God the Father fell also the unspoken part of the prayer. He commandeth me to put it into words. Listen!

"O Lord our Father, our young patriots, idols of our hearts, go forth to battle - be Thou near them! With them - in spirit - we also go forth from the sweet peace of our beloved firesides to smite the foe. O Lord our God, help us to tear their soldiers to bloody shreds with our shells; help us to cover their smiling fields with the pale forms of their patriot dead; help us to drown the thunder of the guns with shrieks of their wounded, writhing in pain; help us to lay waste their humble homes with hurricanes of fire; help us to wring the hearts of their unoffending widows with unavailing grief; help us to turn them out roofless with their little children to wander unfriended the wastes of their desolated land in rags and hunger and thirst, sports of the sun flames of summer and the icy winds of winter, broken in spirit, worn with travail, imploring Thee for the refuge of the grave and denied it - for our sakes who adore Thee, Lord, blast their hopes, blight their lives, protract their bitter pilgrimage, make heavy their steps, water their way with tears, stain the white snow with the blood of their wounded feet! We ask it, in the spirit of love, of Him Who is the Source of Love, and Who is the ever-faithful refuge and friend of all that are sore beset and seek His aid with humble and contrite hearts. Amen."

[After a pause.] "Ye have prayed it; if ye still desire it, speak! The messenger of the Most High waits."

It was believed afterward that the man was a lunatic, because there was no sense in what he said.

That's an excellent indictment of the so-called patriots and Christians who claim to believe in Him yet back unjust atrocities.

I am not the only person questioning this article - I have been asked
by several people closely related to DRM to make this enquiry.

If you doubt the "claims" on www.primedrm.com, if you question our
broadcast expertise then why not contact us direct and we would be
only too pleased to put your mind at rest.

Thank you for your informed reply.

The link cited at the beginning of this thread is dead. Searching the
Monitoring Times Shortwave Central Blog for "DRM", "HFCC" and "gospel"
turns up nothing with the quoted passage. One might surmise that the
item has been pulled and is left to speculate why. Maybe it was
inaccurate.

I see as well that the original post, which came from HCDX, is also gone.
It's all third party for me, so I have no idea what happened to it.

So, just why is it that you queers always seem to **SIGH** a lot?

5233. SDR and "band TiVo"-like capabilities

Newsgroup: rec.radio.shortwave
Date: 2008-02-27 09:57:37 UTC
From: parabolicdish@gmail.com
Message-ID: <a696fde8-d735-46d2-a7b7-a3602317d14c@i29g2000prf.googlegroups.com>
Source record: 138150

It seems to me that fast cheap A/D, storage, processing power, and memory take us to the place where commercially mainstream hardware can implement a software defined radio where one or more whole bands or frequency segments can be recorded to storage media, much like a TiVo.

Of course, the ability to convert b - (b+K) Mhz to 0 ... K Mhz and sample at > 2K Mhz, has been technologically possible for quite some time now, but also quite expensive.

So my question is: how long before some high-end manufacturer of either scanner, SWL, or ham gear introduces the ability to record a band segment and "replay" the whole segment to let you tune into any signals in the band at will from the recording?

Has it been done yet? If not, I wonder how long it will be.

Hello,

Please check this website www.calculatoredge. com
This is an online engineering calculator for Engineers & Students
it solves complex equations and formula.

You can also subscribe engineering magazine free at this website.

If you like it pass the web link to your friends.

Regards,
Rick

- I don't know why you're doing this.

Mike - My Message is :
PLEASE DON'T WASTE OUR TIME AND BANDWIDTH
BY POSTING THE COMPLETE TEXT EACH TIME.

Because of It's Length a Reader 'might' scan-it or read-it
the first time -but- after that they will simpy ignore-it /
skip-over-it -so- it is really only a one-shot post.

NOTE - Your Rant is 16~17 "Page Views" [Page Down] Long.

You might List the 'latest' Three Things that DX Ace has Posted
to Get-You-Going and put the rest in the Up-dated Canned
Rant; and provide a Link. If the Reader likes the 'latest' Three
Things; then they may wish to : Open The Can To Read The Rant.

(OT) : [Mike's [M II] Canned Rant] The Wit and Wisdom of Steve Lare,
aka dxAce, Supreme Commander United Michigan Militias (S.C.U.M.M.)
http://groups.google.com/group/rec.radio.shortwave/msg/77a70abaa5848fec
= = = O p e n - T h e - C a n - T o - R e a d - T h e - R a n t = = =

BANDWIDTH - I don't Pay for the Bandwidth or by the length
of a Message that I Post or Read -but- Evidently some of the
Posters and Readers here do. = = = Think About Them. = = =

- Personally, I use it right after I catch the Acehole insulting
- yet another member of this fine group.
-
- Indiscriminate usage tends to water down the effect.
- It causes an inflationary spiral, which lessens the import
- of the message.

- Please restrain yourself.

I am simply Suggesting an 'Alternative' Way for You to
Communicate 'Your' Message -without Alienating the
'potential' Readers. *All I Ask is Please Consider It*

- If you find that impossible, at least construct your own
- little album of remembrances.
-
- 'Album' may be a bit too verbose.

- 'Snippets of scum' may be more appropriate when
- they're quotations from the dxDrunkard himself.
-

5243. RxWings: For Any User(s)

Newsgroup: rec.radio.shortwave
Date: 2008-02-27 12:47:34 UTC
From: Robert11 <rgsros@notme.com>
Message-ID: <joGdnZyoksx7xljanZ2dnUVZ_j6dnZ2d@comcast.com>
Source record: 138160

Hello,

Was wondering if there is someone who might be kind enough to guide me thru
the installation process for RxWings.
I guess off-line would be best.
I tried contacting the author, but haven't heard anything back.

I don't want to appear dumber than I probably am, but-

Am in my 70's now, and I guess this "stuff" is a bit more confusing to me
than it once was. Anyway, I'll use that for my excuse.

I have a JRC NRD 545, and am running XP.

I have downloaded and unzipped the 2A and 2B Folders from the RxWings site..

I have the unzipped files in the same folder on my desktop that the
downloaded files came in.
I have also deleted the Unzipped original folders 2A and 2B.

Now I'm lost.

The only icon with setup as a name, asks me to insert the Disk.
What disk ?

If someone could perhaps guide me thru, in excruciating detail, how to get
the program installed, and running, would be most appreciative.

BTW: I looked, but couldn't find any: is there a Forum or Group somewhere
devoted to RxWings ?

Thanks,
Bob

I liked XPSP2 for couple years. Every security patch has slowed it down however, and it is a ridiculous hardware hog. But, compared to Vista, XPSP2 is elegant in its simplicity. It does cost a lot of money to run Windows, and the performance on a given machine is terrible compared to XPSP2 or Linux.

I enjoy computing, not fighting hackers all day long.

Yes, the ability to record a segment of a band and play it back later has
been done.

The storage requirements are large.

Look at Perseus SDR.

I suggest you spend some time with google and look up SDR.

Needs an external power supply, 13.8 volts at 20-25 amps. Also, if it
uses the SSB filter for AM reception, the audio could be muffled. Not
sure if it has a separate filter for AM...

Dear Bob,

Setting up RxWINGS is a bit on the tricky side. It sounds to me that you have done something wrong and "messed it up." Re-read the instruction manual (the link to which is given in Dave's reply above), uninstall what you have, re-download the program, and re-install it. and don't delete anything until the program is running correctly. (By the way, the manual is dated November 2003; there have been some additions/updates after that which are on the web sire. But they are easy to install and are good additions to the program. I suggested some of them myself!) I'm quite surprised that Jan Arkesteijn has not gotten back to you; he always replied to me within one day. Perhaps he is temporarily away. Write him again and give him a day or two to reply. But I'm sure you'll find the answers to all your questions in the instruction manual. You may have to read it several times. Once you get the hang of it, you'll find that using the program is quite straightforward. (Ignore any mentioning of ILG - that program is no longer available.)

Without actually being with you, it would be very difficult for me or anyone else to walk you through the installation. Just take your time and be patient. I'm in my 60s and not as "with it" as younger people - but I got this program to work. If I can do it, so can you.

Best,

Joe

It was pretty bad when you were calling universities and pretended to be from homeland security in order to get information. You were trying to get people fired, you rectal aperture.

I'm sure there are wider band recording abilities out there, but these
are affordable by mere mortals:

==========
the receiver can also record an entire 20 kHz wide IF spectrum, making
it possible to thoroughly analyze the received signal, and "re-receive"
the same signal again and again with different IF filter bandwidths,
notch filter, noise blanking or demodulator settings, to arrive at the
best possible reception of weak or interference-prone transmissions.

http://www.winradio.com/home/g313e.htm
==========

80 Khz spectrum width recording:

==========
Once you have listened to and grasped the concept of taking whole
blocks of spectrum and being able to work with it, let your mind wander.
Take this block and send it elsewhere to be listened to. Have a Time
Machine in one of the remote ham stations around the world and put your
expertise in programming or Internet use to the task. Now have your Time
Machine unfolding up to 80 kHz of spectrum filled with weak signals loud
and clear on the other side of the world. Is it real, oh yes it's real
and its time is now. A solar flare is in full strength while you are at
the office. Was there a band opening? Go home and find out. Listen, I
mean really listen. What was that? It sounded like a really weak signal.
Rewind, run the audio through the DSP, now tune it again. Got it a
little better, rewind, tweak the DSP, watch it on the spectrum analyzer,
is it there? From just plain fun listening to technical analysis of
solar activity, the possibilities are endless. All you need is the
equipment and a little bit of "time".

- - Is that due to the increase in the number of illegals?

- (i)llegals don't participate in ratings as a rule.

d'Eduardo,

Illegals by-definition are Rule Breakers.

How would you know -if- you do not ask for any
Legal Documents and Proof of Status during
the Sampling process ?

Are you saying that with some Metros having
Spanish Speaking Population that is -50% Legal
and +50% Illegal : So you do not have a Sample
that Uniformly represents that Population Accurately.

You ever heard of Uilleann Pipes before? www.devilfinder.com
Uilleann Pipes

I love the sound of Bagpipes and UIlleann Pipes and not just because I am Scotch Irish either.The Bagpipes didn't originate from Scotland or Ireland, definately not England.

- Er, that's Midnight to 3 AM on the West Coast
- of North America.

MZ,

Those are some of my Shortwave Radio Listening Hours.

as i am just passing time . . . keying in a word or too
http://www.examiner.com/images/newsroom/31emsmediaCAMPAIGN.jpg
-and- listening to the radio laying back here
http://www.themoroders.com/radio/cosmic%20listener%20web.jpg
-while- i am working the night-shift in twain harte,ca
http://www.youtube.com/watch?v=4j0mjA06Y9M
watching the pine trees grow under the star light ~ RHF

- It's just as good, or better at a more sane hour.

I will have to see what I can hear in the other time slots:

Mornings : 6 AM ~ 9 AM PST West Coast Time.

Evenings : 6 PM ~ 9 PM PST West Coast Time.

> 1. The BBC 9740 comes in until 16:00, sunspots premitting. (Been real

Telamon - He He & Haw Haw - TYVM ! :o) ~ RHF

CONCERNING :
Radio Habana Cuba (RHC) in English on 9550 kHz @ 23:50 UTC
http://groups.google.com/group/rec.radio.shortwave/msg/60f38ca13625cafa
http://groups.google.com/group/shortwave-listener-qsl-reports/msg/c287e306e1da219e

=PS= Telamon I am sorry that you Think that my Posting
Shortwave Radio Reception Reports [SWR3] {QSL} to the
Rec.Radio.Shortwave Newsgroup is S P A M *
* Honestly I Don Think So . . . ~ RHF

Telamon Thank You Very Much For The Help
-ps- Keep-Up The Good Work ;-}

Telamon - You should have Check-Out most of my prior
Shortwave Radio Reception Report [SWR3] Postings on
Rec.Radio.Shortwave : You would have seen that many
were Single (1) Message Posts.

Maybe because many of the Readers here have Me Filtered
or simply to Ignore any post by me "RHF". :-{

THUS - My Posts are only present for One Message Cycle.

NOW -by- You "Telamon" Posting to my Shortwave Radio
Reception Report [SWR3]

My Shortwave Radio Reception Report [SWR3] now have
Your "Telamon" name on the Message so the Readers that
have not Filter You will now get a Chance to Read My Message.
- - - Once Again - Thank You Very Much :o) ~ RHF

Plus because You "Telamon" have Posted to my Shortwave
Radio Reception Report [SWR3] Postings : They will be
presented to the Readers for a Second Message Cycle.
- - - Again and Again - Thank You Very Much :o) ~ RHF

Plus Plus This Reply to You will about this Shortwave
Radio Reception Report [SWR3] Postings : Will be
presented to the Readers for a Third Message Cycle.
- - - A Three-Peat - Thank You Very Much :o) ~ RHF

telamon - thank you very much for the help ~ RHF
-ps- keep-up the good work ;-}
.
GOOD NEWS - Telamon - Google is now Reporting that
http://groups.google.com/
for the last 3~4 Weeks the "Views of Your Messages"
Numbers have Increased from around 2100 Views per
Seven (7) Days; to now around 2800 Views per Seven

(7) Days. Wow that is a Whooping 33% Increase in my
Message Viewers and mostly due to you 'Telamon" :o)

Telamon - again, and Again. and AGAIN !
Thank You Very Very Much for All Your Help :o) ~ RHF
.

Drifter - Good Re-Find. :o) ~ RHF

The "Glen Glenn Hauser World of Radio Reports"
GH WOR - http://www.worldofradio.com
are always -v e r y - l o n g- and detailed.
* DX Listening Digest Index for 2008
http://www.worldofradio.com/dxldmid.html

How to Find the : "The End of DRM ?" /
"HFCC Discussions on Future of DRM"
posted information :

1 - Do a "Control+F" : The [Ctrl] Key and the "F" Key Together.

2 - Enter in "Find" {Search} for either : 'drm' or 'hfcc'

3 - The DRM News is at the bottom of the Report - Look for :
* DIGITAL BROADCASTING DRM
* The end of DRM?
* HFCC discussions on future of DRM

- - Since you have this marvelous staff,
- - why do you need to visit swap meets
- - and hang out on the corner?

- To recruit actual listeners for quota-driven projects.

<1 - It takes all kinds of People to make-up a Radio Audience.

But not for a specific station.

<2 - Sampling Diversity within a Qualified Sample.

I have no idea what that is.

<3 - Go to where the Qualified Sample is . . .

Nope. You do not have to go everywhere. Just one area will do... just like a
blood sample taken from the arm is no different than on taken from the leg.

Only 7 to 8? Even one (1) is to many of course, but that figure seems a bit low.

Of about 12 million illegals, 7 to 8 million are Hispanic. The rest are from
Asia, Africa, the Middle East, Brazil, Haiti, etc. Oh, and Canada, for sure.

==========

The Wit and Wisdom of Steve Lare, aka dxAce,
Supreme Commander United Michigan Militias
(Updated regularly):

==========

I ain't white, but unlike you, I dislike no one.

You claim to be 'Cherokee'... I think you're just 'Wannabee'...

Wonder why.... could it be that the Canucky Niggah is timid, afraid...?

Why is it that you queers always seem to **SIGH** a lot? (1)

Now get your homo ass working on that documentation, boy!

Give it a shot queer boys, I dare ya!

Dumbass Canucks, sure ain't Rolex wearin' respectable folk...!

Cocksuckers such as your self.

Hit the road, 'tard.

Toss 'em all, especially the Canucks!

So, just why is it that you queers always seem to **SIGH** a lot? (2)

Now go suck on some sushi, you little miscreant.

I just asked you to have the cunt send me a letter, boy.

Damn, the Canucky Niggah didn't have a damn thing to say...

So, just why is it that you queers always seem to **SIGH** a lot? (3)

Yes, I am witty, and I am wise!

"I'm so obese I had to get the extra heavy duty plastic blow-up doll"

Let me sum up, you Canucks are assholes!

So, just why is it that you queers always seem to **SIGH** a lot? (4)

Hit the road, drug addled fool.

Shame on CanaDuh for killing thousands of people every day.

Be sure to tell the bitch to send me that letter, faggot!

get your bitch *daughter* to send me a letter

Have the bitch send me the letter!

Well, go tell your other cocksucking countrymen.

Hey, have the bitch send me a letter

Ain't gonna happen, ya got no air farce, ya got no ne vuy, va goy nuthitin?

Have the bitch send me a f00kin letter!

You folk really think ya got balls?

Now run along to wherever it is you little debutantes run off to...

I'll be waiting for that letter from your *daughter*, asshole!

Oh yeah, tell me baby...

Hey, little pussy boy, we spell it "cunt" out here, just like I think I spelled it originally, boy.

Never touched the skanky,,,

If I don't get that letter, boy, then you and your *daughter* must both be drunk, eh?

Finally shut you up, eh boy?

Have the bitch send me a letter on whatever letterhead YOU might make up.

Ain't that just speshul! He's got to go find somewun to fake him a lettter.

Have the bitch send me a letter on her firms letterhead, boy.

Great, then get your bitch *daughter* to send me a letter on her firms letterhead within the next two weeks!

Have your *daughter* draw up a contract, BOY!

Hey, 'Edurado', have your *daughter* get in touch with me, amigo

True, ain't it, little faux Hispanic BOY... (Heavy emphasis on the BOY!)

Guess that shut the little boy up!

Stuff it up your prancing ass, 'Tardo!

You dumb sand niggers (sorry, I categorize ya all this way) need to understand that you need to get your collective shit together...

I'm LMFAO, since I've busted the f00kin faggot!

You are after all a drug addled 'tard boy who
obviously knows little about the SWL/DX hobby.

Go blow some IBO Cock, and leave the real radio hobbyists alone, OK?

Let the faggot boy prove it!

LMFAO at the f00kin faggot

Yes, I learn more and more with each passing day!

LMFAO at the pathological liar!

Lying 'tard boy, much like the other debutante, malcontent, faux boys who inhabit the lace we call RRS.

You, on the other hand are nothing more than a sorry little
homosexual 'tard

Liar, liar, pantalunes on fire! (1)

New history will be made when we crush CanaDuh!

Kan you just imagining that, you little faggot Cannucky boy?

Anybody, even Bozo, is worth more than some dumbass, faggot, Canuck!

Get busy, boy!

But you can't prove it, retard boy!

I know you faggots have dreams

Blow it out your ass, you dumbass Canadian! You and the rest of your dumbass countrymen, and women too!

You'd not be very happy if I returned, little bitch boy!

Go get some IBOCock, 'tard boy, and bring home a taste for yer mama.

If you'd like to call me, I'm here to help you until 0330 GMT at:
616 335-9762
dxAce
Michigan
USA

Go give your boyfriend a blow job!

Talk about misery, you're in f00kin CanaDuh, boy!

Something for your faux Hispanic cock sucking brain to think about, eh?

Or better yet, go get yourself some IBO Cock!

Poor little cocksucker just had it handed to him

Eh? You sum dumass Canucuy bithyboy...

As long as it screws you Canucks, I'm a happy camper!

They are mere asswipes, suitable for flushing.

That's because you're a fucking liar!

Cry me a f00kin river.

Awwwww... the poor whiny dumbass Canuck is back at it again today.

Huh... you be just another stupid white boy outta Cleveland...
I suggest you get together with your "significant other" and bump butt
with each other,

Because I hate White Boy Canucks who suck cock...

Best you shuffle down the alley! That's what your mama wanted!

Crazy Retarded Australian People?

"Even 2 cents is more than a totally worthless Canuck"

Funny how the US Govt. sent me over $50,000 last year

You can preDICK all you want, you fraudulent cock sucking,
pathologically lying old bastard boy!

Hey, dumbfuck Canuck, I was not asked to leave!

I went and bought ammo... I still gots it case them tard boys such as
edweena gets stirred up.

And 10,000 rounds isn't a lot.

It was Russian ammo. I don't like the Chinese stuff.

Now where did I put that other case of ammo..

That's not Canuckian, boy!

Kiss my ass, pedant!

I'm LMFAO, Mr. Gay-Lick!

Obfuscate, you little prancer!

LMAO at the 'tard.

Thing is, you 'tards are pretty fixated upon one set of parameters.
That is after all why you are considered to be 'tards!

As always, your head is up your f00kin ass.

You fuckin' Liberal asswipes are always ready to give somebodys else's
goodies away...

And, hopefully, my dumbass cousin in Mill Valley will leave me her
Corvette.

Obviously, you leep your head up your f00kin ass all day long.

I don't 'fear' homos, oh faux one!

Liar, liar, pantalunes on fire! (2)

Apparently you are the 'bendover boy'....

Do you spit or swallow?

Oh, I certainly have, time after time.

At least I went farther than you!

Good lubricant for you and the boys?

It's what dxAce uses!

that's good enough for me!

One can never slide the BS by dxAce

Not as well as you, fudge pack.

Go for it, dumbass!

Oh come on... it's Fall forward and Spring back. Everyone knows that!

Hit the road, drug addled fool.

Hey, I love kickin' gay-lick ass!

Pretty much what I indicated to you a while back, you f00kin prancer.

The only thing you know about short wave is that that is what your
mother gave you when she sent your f00kin ass packin' outta Cleveland.

Screw the drug addled retards.

Nah, I only attack the messenger when he/she/it is
obviously drug addled.

So, beat the rush and get the hell off of RRS, you f00kin retard.

Well, in you, we have a drug addled retard in our midst.

Get over it, you fake Hispanic piece of excrement.

And when you do confront HD, you'll have Cocksucker Dave and
The Prancer Boys to thank for it.

Damn... I'm of mixed race ancestry myself, what ever should I do?

Next time we come over the pond once again to save your sorry ass's
we'll have to dismantle that stuff.

Heck, I bought 1000 shares of FSEAX the other day.

Don't do business with the Huntington Investment Company,
in particular a fellow named Joseph Klein.

Not at all, we are both Miami Indians. ya got a problem with that, boy?

Ya right, suck my dick...

Believe it, it's like a dream to be with you again...

Then hit the road, you drug addled retard.

Just like you wish that you worked for me, retard!

Proven time and time again, fudge pack.

Get it, retard?

Dey done unnerstannn that us nateev boyyys R real Mericans!

I sure he is.

Insert your Gay-Lick reply here, boy:

And yet another Liberal rant

Sorry, I'm not a racist like you, Edweenie...

Nah, he was fake little cock sucker like you!

Your pathological lying is an offense to me, and more than likely an
offense to God as well.

No medications here, cock sucker boy..

Stuff a watermelon up it

But that stuff isn't what dxAce uses!

Come on now, you being a nice Liberal, Carbon Footprint, Al Gore, Cock
Sucking kinda Canuck Bastard..

I won R plantation up nord, dat dem dum ass Canuckys be oween us, ya be
'standin me?

CanaDuh is stupidity!

Stupid little pussy faggot!

Liar, liar, pantalunes on fire! (3)

Mr. Edweenie, the forces of Good are gonna come visit your sorry fake Hispanic White Boy Ass if you keep it up!

Pay attention, cock sucker...

LMFAO as I sit and look at my royalty cheques...

You've done this before, cock sucker...

LMFAO at yet another dumb friggin Canuck..

I know it may be hard, but as you withdraw, it will shrink away..

Oh damn, I guess we pissed another wanker off, Cuz..

I get my ride be fixed, I be cruisin to be givin ya da shake, yu be knowin, eh?

Try again, shithead.....

Dem Canucky boyz are dumaz rasissts..

We gone be sen u to sumplac bad boy... u be so bad weben the reel Canuckys won wan u.

Fookin bustards! Like Edweenie!

Best you wake up soon... fookin retard leetle beetch..

Fookin 'retard.

It is then my patriotic friend, you must reach in the closet, place your hands upon the weapon, and blow the cock sucking, bean blower back into Mary's arms....

Indeed, I'm now at WAR with Canuckistan..

May the Great Spirit help the hapless bastards.

Actually VA facilities are quite good, but if you Canucky niggahs poke around one might find a lot of things wrong.

At any rate, I'd bet it beats the Canucky Third World state of care...

CanaDuh sucks...

Wanna go to war, shit head?

Think you might win? Think you got a chance?

If you don't... I'd keep my fookin Canucky mouth shut, boy...

Meanwhile, I plan for the Spring campaign, looking forward to the Blind River Massacre.

I collect stamps!

****

- So,

in the quest to keep my 5 year old PC alive with Windows XP
I took it down to the PC Guy,
who
backed up the hard drive onto a new hard drive
Put the new hard drive in the PC& gave me the old hard drive

& so it's good to go for another 3-5 years..

- All for $$ 160;

- Neat, eh!

- and (getting Technical) the new 160 GB Hard Drive runs at 7200 RPM,

- All the data is on the outer edges,,

- so I got a huge performance boost too..

loading programs, Booting up / shutting down all faster

The SDR-IQ at around $500 has been out for well over a year now, along with its higher priced brother- both from RF Space.
Both allow wideband spectrum recording. We used the IQ to record a 100KHz portion of a 1296 MHz EME contest 2 years ago and then play it back laeter digging out signals we did not even hear in the live contest.

Alternatively, devices like the Time Machine are stand alone inexpensive receivers that also allow this. The Time Machine has been on the market for at least 5 years, likely more.

By this weekend, I need to be able to explain what sound I am hearing to someone who isn't a broadcaster or associated with radio / audio in any way. How can I explain to someone what it sounds like when you are speaking into a mic -- hooked up to an audio board - and you pin the needle in the red. You know, you get that high pitched kind of flat sound ?? I don't know how to explain it to someone who has never heard what that sounds like?? Can someone suggest an explanation that would make sennse to non-radio people?? Thanks.

5333. Radio Shack AM/FM Table Radio

Newsgroup: rec.radio.shortwave
Date: 2008-02-28 03:33:37 UTC
From: J&D Schnoor <jimdianes@frontiernet.net>
Message-ID: <lYpxj.5104$7d1.2666@news01.roc.ny>
Source record: 138251

I was at a Radio Shack recently and they had an analog tuning AM/FM table radio for what I assume is a clearance price of $24.97 I think. Unfortunately I can't seem to see it or their webpage nor do I have a model number for it. It has a cube shape and I think there may have been an F connector for anexternal antenna. I was just hoping to read some reviews on this to see if it is even worth $25. Anyway, despite my best efforts at searching I still have not found the model number thus I haven't located any reviews yet. Does anyway here know the model number or how well it performs? I am interested in both sensitivity and selectivity.

I may be picking up one of these things tomorrow. Looking at the input bandpass filter schematic, I notice a T type of attenuator that consists of two 270 ohm series resistors, with a 330 ohm shunt resistor on the MW filter section.
Am I dreaming, or did Drake really dumb down the design with a full time attenuator on the MW band? If this is the case, it looks like I have yet another project.

Pete

This concept has been around for decades and has been done using
magnetic tape to record over the air telemetry from remote locations of
what you might call one time "events" of military interest.

I don't see that attenuator on the MW (0.5-1.5-Mhz) bandpass filter for
the R8'B'. The MW bandpass circuit on the 'B' looks like all the other
bands but with different component values of course.

ITU : WRC-2007 Approves DRM in the Tropical Bands

http://radiomagonline.com/eyeoniboc/itu-approves-drm-tropical-band/

-source- Radio Magazine On-Line - Nov 27, 2007

* The International Telecommunication Union (ITU),
the United Nations Organization for Coordination of
the Use of the Radio Spectrum.

* World Radiocommunicaton Conference (WRC) of
the ITU in Geneva, the conference officially approved
DRM in the "Tropical Band" Broadcast Spectrum
between 3.2 MHz and 5.9 MHz.

* For Domestic Radio Coverage in the "Tropical Zone"
Countries located roughly in Latitudes between
30 Degrees North and 30 Degrees South.

Telamon,

I am 'glad' that you Posted this Reply -because- It gives
me a chance to add to my previous comments concerning
the Par End-Fed Shortwave Listener (EF-SWL) Antenna :
http://groups.google.com/group/rec.radio.shortwave/msg/22eb2ae9ea9496eb

Now =WRT= My actually using the Par End-Fed Shortwave
Listener (EF-SWL) Antenna :

Q # 1 - Am I presently using a Par EF-SWL Antenna ? - No.

Q # 2 - Have I / Did I use the Par EF-SWL Antenna in the Past ? -
YES.

Q # 3 - Did I attempt to Answer the Newbies Question ? - YES.

Q # 4 - Did You attempt to answer the Newbies Question ? - No.
[Instead You Attacked Me and Poluted This Thread.]

OBTW - One of my next SWL Antenna Projects is to take
one of my Par EF-SWL Antennas {I own 3 of them}
-ps- That is why I recommend them.
-but- I like to 'tinker' with Antennas a lot : So one goes-up
and another comes-down in the Space Available.

MODIFYING - The Par End-Fed Shortwave Listener (EF-SWL)
Antenna with a Longer Wire Antenna.

REMOVE - The 45 Feet of FlexWeave Antenna Wire and replace
it with around 200 Feet of the same FlexWeave Antenna Wire.

FlexWeave Antenna Wire AWG 14 in 100 Foot lengths.
http://www.universal-radio.com/catalog/cable/4608.html
Note - Bare Copper Wire without Insulation.

More about FLEX-WEAVE Ultra-Flexible Antenna / Aerial Wire
FLEX-WEAVE => http://www.davisrf.com/flexweve.php

FWIW - FlexWeave Antenna Wire is not Litzendraht [LITZ] Wire
-but- for Shortwave Radio Listeners (SWLs) it comes 'close'
and is much Stronger and Weather resistant.
http://groups.google.com/group/rec.radio.shortwave/msg/ffc5cefd34d2dbe2

USE - The Par EF-SWL Antenna's Matching Transformer
with the longer Wire Antenna Element and see {Hear} how
it works. But I have to have the Cover's De-Limb and Top
a Dead ~65 Foot Tall Cedar Tree first. Figure I can get a
Rigging Point about 50 AGL from It. Have them Top it at
~6 Inch Diameter and mount a Pully with a Rope within
a Foot of the Top.

Note - The Cedar Tree is about 85 Feet from the House.

Run Buried Coax Cable from the House to the Cedar Tree.

Place an 8 Foot Ground Rod at the Base of the Cedar Tree.

Mount the Par Matching Transformer (MT) near/on the
Ground Rod.

Rig the Wire Antenna Element from the MT to the Top
of the Cedar Tree and across to a Pine Tree a little less
than 200 Feet away {Due West}

BUT - There is almost always a "But" ;-{ There is another
SWL Antenna 'project' in front of the The Long Par EF-SWL
Antenna Project. I simply involves swapping-out the RF
Junkie 9:1 Matching Transformer with a WinRadio Long
Wire Antenna Adapter to see how it works -cause- it is
'claimed' that this Dual-Ferrite Core MT is better across
the Bands from 100 kHz to 30 MHz then the more common

Single Ferrite Core MTs. The swap-out also requires that
the Coax Cable be changed and some Working-on-a-Ladder.
Maybe Weather permitting; I can get this project completed
in March and report on it here.
Note - The present 100 Foot Wire Antenna Element will
stay for this swap-out. It is an Inverted "L" with a 25 Foot
Vertical-Up-Leg and a 75 Foot Horizontal-Out-Arm; running
Due West about 25 Feet AGL down a Slope.
Note - The Wire Antenna Element is an Litz Wire made of
13 Strands of # 30 AWG with 24 Twists-per-Foot using
Polyurethane-Nylon Film {Coating} to Insulating the Individual
Strands; which requires that each of the Strands be Soldered
to 'connect' all the Strand together to effective use each
Strand in the Wire Antenna Element at the MT.
http://cgi.ebay.com/_W0QQitemZ370021288406
http://www.wiretron.com/litz.html
Note - The Far-End {in-free-air} of the Wire Antenna Element
has the 13 Strands Fanned-Out in 2 Inch Circle to Bleed Static
'off' the Element.

Telamon - Once Again TYVM for your Reply -because-
It gave me a chance to add to my previous comments
concerning the Par End-Fed Shortwave Listener
(EF-SWL) Antenna.

-ps- telamon - i may not know 'jack'
but i sure do know 'you' {telamon} ~ RHF
.

That sounds good.....the service manual I have is for the R8E, so they may have installed an attenuator on that model. I will give Drake a call this morning.

I get the same S meter readings on the R8, R8A and R8B. The attenuator can be kicked in on all three, difference being is that the pre-amp can be used in the A & B but not on the R8.

Hi Frank,

Finally got it to work, I think.
Looks correct now, but will play with it later and see.

Wow; what an install process !

Thanks for interest and help; appreciate it.

Any weird shaped radio eventually gets collectible.

I'm not familiar with it but Radio Shack sells a lot of moderately
priced radios that do a decent job. A trip back to the radio shack
store would be the best way to get the model number and information on
whether selectivity is adjustable (i doubt it). Indeed for $25.00
you should just buy it and give us a receiver review. If it turns out
to be a dog just return it for a refund.

Most inexpensive AM/FM tabletop radios will do reasonably well on
strong local stations and at night they can be counted on to catch
some of the stronger AM dx stations. Mostly they are designed for
decent sound and not as high performing dx machines.

The technique is called "mall intercept" but most of us in the business
expand the concept to busy pedestrian areas of any kind, depending on the
demographic we are recruiting.

Source record: 138296

No, it is using the same 1st mixer. In my service manual for the R8E, right after the input switching diode for the MW range, I see the attenuator. I just talked to Bill Frost, over at Drake, and he tells me that all of the front ends are the same. If this is the case, it shouldn't be too hard to remove it. They may have pulled a tricky one, the JRC did with the MW range on the
NRD-515.
On another note, I have built the first engineering prototype of the new Palstar active loop antenna. There was a bit of a delay receiving the ferrite rod stock, but that should be coming in, in the next few days or so.
I still need a few PCB footprint files.....after this, I will be able to do the board layout. It shouldn't take more than a few hours to do.

Don't forget the video recorders, at least the consumer models, have limited
S/N characteristics and dynamic range. They are also designed to work with
signals that have sync bars. There would be interruptions in the signal as

the heads switch.

OK - So - tell us your theory of why a Class "C" amp doesn't work on FM!

And if a class "C" won't work than what class does?

Or will only a class "D" work for some dummies!

Do you know what a class "D" amp is?

That's funny. True and funny.

We should start a list of things to help pass on this knowledge to the coming generations.

I propose adding:

On a better radio, the knob for tuning is larger than for the volume.

I'm sure there are hundreds more, if anyone else would care to add to the list before passing it on, I've made a perforated attachment below:

Please cut on the dotted line:
.....
a) Any weird shaped radio eventually gets collectible.
b) On a better radio, the knob for tuning is larger than for the volume.
.....

This part of the message will fall away after the cut unless the monitor is turned sideways first.

U bet you.....I've got it apart right
now.....cleaning the contacts on the regulator board got
the low end of the low band VCO working.....the high band VCO
only works up at MHz. I am thinking, that with the high S/N, it looks like
the owner of this radio sold the R7A face plate to somebody and installed an
R7 faceplate on this radio before he moved it out.
I played a little bit with the R8.....now I see why everybody likes it
so much. I think I will modify it so the preamp works on all ranges, that
is, after I remove that pesky MW attenuator. Nice receivers.

I just saw a message on the Drake reflector wondering about a possible change due to the serial number. Thought it must be an R7A vs. an R7.

Name Dan, by any chance?

They must all be the same *except* for the 'E' model. I can see why they might have wanted to attenuate the MW band in a receiver made for use in Europe where the MW signals can be very high at times. Have you actually confirmed that your model has the MW attenuator?

dxAcehole, pathological liar, racist and common drunk,
during his fifth annual Farewell Forever tour, said:

> They don't call me 'Ace' for nothing!

You are an arrogant, self titled non entity.

The Wit and Wisdom of Steve Lare, aka dxAce,
Supreme Commander United Michigan Militias
(Updated regularly):

==========

I ain't white, but unlike you, I dislike no one.

I said it before, and I say it again... Vicente Fox
is a stinking piece of Mexican shit.

Run along little Canucky dweeb.

Stuff a taco in it, Ramon!

Did I say it was, shit for brains?

I thank the Great Spirit every day for the fact that I'm not white like
you.

They don't call me 'Ace' for nothing!

All of my DX is better than your DX no matter what I do.

After eating the taco's wouldn't they be capable of gassing themelves?

You claim to be 'Cherokee'... I think you're just 'Wannabee'...

How many American lives were affected by the
slant eyed shit throughout the entire war?

Wonder why.... could it be that the Canucky Niggah is timid, afraid...?

Why is it that you queers always seem to **SIGH** a lot? (1)

LOLOLOLOLOLOL... what a damn dumb cunt you are!

Now get your homo ass working on that documentation, boy!

Give it a shot queer boys, I dare ya!

Dumbass Canucks, sure ain't Rolex wearin' respectable folk...!

Cocksuckers such as your self.

Hit the road, 'tard.

Toss 'em all, especially the Canucks!

So, just why is it that you queers always seem to **SIGH** a lot? (2)

Now go suck on some sushi, you little miscreant.

I just asked you to have the cunt send me a letter, boy.

Damn, the Canucky Niggah didn't have a damn thing to say...

So, just why is it that you queers always seem to **SIGH** a lot? (3)

Yes, I am witty, and I am wise!

"I'm so obese I had to get the extra heavy duty plastic blow-up doll"

Let me sum up, you Canucks are assholes!

So, just why is it that you queers always seem to **SIGH** a lot? (4)

Hit the road, drug addled fool.

Shame on CanaDuh for killing thousands of people every day.

Be sure to tell the bitch to send me that letter, faggot!

get your bitch *daughter* to send me a letter

Have the bitch send me the letter!

Well, go tell your other cocksucking countrymen.

Hey, have the bitch send me a letter

Ain't gonna happen, ya got no air farce, ya got no ne vuy, va goy nuthitin?

Have the bitch send me a f00kin letter!

You folk really think ya got balls?

Now run along to wherever it is you little debutantes run off to...

I'll be waiting for that letter from your *daughter*, asshole!

Oh yeah, tell me baby...

Hey, little pussy boy, we spell it "cunt" out here, just like I think I
spelled it originally, boy.

Never touched the skanky,,,

If I don't get that letter, boy, then you and your *daughter* must
both be drunk, eh?

Finally shut you up, eh boy?

Have the bitch send me a letter on whatever letterhead YOU might make up.

Ain't that just speshul! He's got to go find somewun to fake him a lettter.

Have the bitch send me a letter on her firms letterhead, boy.

Great, then get your bitch *daughter* to send me a letter on her firms letterhead within the next two weeks!

Have your *daughter* draw up a contract, BOY!

Hey, 'Edurado', have your *daughter* get in touch with me, amigo

True, ain't it, little faux Hispanic BOY... (Heavy emphasis on the BOY!)

Guess that shut the little boy up!

Stuff it up your prancing ass, 'Tardo!

You dumb sand niggers (sorry, I categorize ya all this way) need to understand that you need to get your collective shit together...

I'm LMFAO, since I've busted the f00kin faggot!

You are after all a drug addled 'tard boy who obviously knows little about the SWL/DX hobby.

Go blow some IBO Cock, and leave the real radio hobbyists alone, OK?

Let the faggot boy prove it!

LMFAO at the f00kin faggot

Yes, I learn more and more with each passing day!

LMFAO at the pathological liar!

Lying 'tard boy, much like the other debutante, malcontent, faux boys who inhabit the lace we call RRS.

You, on the other hand are nothing more than a sorry little homosexual 'tard

Liar, liar, pantalunes on fire! (1)

New history will be made when we crush CanaDuh!

Kan you just imagining that, you little faggot Cannucky boy?

Anybody, even Bozo, is worth more than some dumbass, faggot, Canuck!

Get busy, boy!

But you can't prove it, retard boy!

I know you faggots have dreams

Blow it out your ass, you dumbass Canadian! You and the rest of your dumbass countrymen, and women too!

You'd not be very happy if I returned, little bitch boy!

Go get some IBOCock, 'tard boy, and bring home a taste for yer mama.

If you'd like to call me, I'm here to help you until 0330 GMT at:
616 335-9762
dxAce
Michigan
USA

Go give your boyfriend a blow job!

Talk about misery, you're in f00kin CanaDuh, boy!

Something for your faux Hispanic cock sucking brain to think about, eh?

Or better yet, go get yourself some IBO Cock!

Poor little cocksucker just had it handed to him

Eh? You sum dumass Canucuy bithyboy...

As long as it screws you Canucks, I'm a happy camper!

They are mere asswipes, suitable for flushing.

That's because you're a fucking liar!

Cry me a f00kin river.

Awwwww... the poor whiny dumbass Canuck is back at it again today.

Huh... you be just another stupid white boy outta Cleveland...
I suggest you get together with your "significant other" and bump butt
with each other,

Because I hate White Boy Canucks who suck cock...

Best you shuffle down the alley! That's what your mama wanted!

Crazy Retarded Australian People?

"Even 2 cents is more than a totally worthless Canuck"

Funny how the US Govt. sent me over $50,000 last year

You can preDICK all you want, you fraudulent cock sucking,
pathologically lying old bastard boy!

Hey, dumbfuck Canuck, I was not asked to leave!

I don't use Chink stuff

I went and bought ammo... I still gots it case them tard boys such as
edweena gets stirred up.

And 10,000 rounds isn't a lot.

It was Russian ammo. I don't like the Chinese stuff.

Now where did I put that other case of ammo..

I don't use Chink ammo.

That's not Canuckian, boy!

Kiss my ass, pedant!

I'm LMFAO, Mr. Gay-Lick!

Obfuscate, you little prancer!

LMAO at the 'tard.

Thing is, you 'tards are pretty fixated upon one set of parameters.
That is after all why you are considered to be 'tards!

As always, your head is up your f00kin ass.

You fuckin' Liberal asswipes are always ready to give somebodys else's
goodies away...

And, hopefully, my dumbass cousin in Mill Valley will leave me her
Corvette.

Obviously, you leep your head up your f00kin ass all day long.

I don't 'fear' homos, oh faux one!

Liar, liar, pantalunes on fire! (2)

Apparently you are the 'bendover boy'....

Do you spit or swallow?

Oh, I certainly have, time after time.

At least I went farther than you!

Good lubricant for you and the boys?

It's what dxAce uses!

that's good enough for me!

One can never slide the BS by dxAce

Not as well as you, fudge pack.

Go for it, dumbass!

Oh come on... it's Fall forward and Spring back. Everyone knows that!

Hit the road, drug addled fool.

Hey, I love kickin' gay-lick ass!

Pretty much what I indicated to you a while back, you f00kin prancer.

The only thing you know about short wave is that that is what your
mother gave you when she sent your f00kin ass packin' outta Cleveland.

Screw the drug addled retards.

Nah, I only attack the messenger when he/she/it is
obviously drug addled.

So, beat the rush and get the hell off of RRS, you f00kin retard.

Well, in you, we have a drug addled retard in our midst.

Get over it, you fake Hispanic piece of excrement.

And when you do confront HD, you'll have Cocksucker Dave and
The Prancer Boys to thank for it.

Damn... I'm of mixed race ancestry myself, what ever should I do?

Next time we come over the pond once again to save your sorry ass's
we'll have to dismantle that stuff.

Heck, I bought 1000 shares of FSEAX the other day.

Don't do business with the Huntington Investment Company,
in particular a fellow named Joseph Klein.

Not at all, we are both Miami Indians. ya got a problem with that, boy?

Ya right, suck my dick...

Believe it, it's like a dream to be with you again...

Then hit the road, you drug addled retard.

Just like you wish that you worked for me, retard!

Proven time and time again, fudge pack.

Get it, retard?

Dey done unnerstannn that us nateev boyyys R real Mericans!

I sure he is.

Insert your Gay-Lick reply here, boy:

And yet another Liberal rant

Sorry, I'm not a racist like you, Edweenie...

Nah, he was fake little cock sucker like you!

Your pathological lying is an offense to me, and more than likely an
offense to God as well.

No medications here, cock sucker boy..

Stuff a watermelon up it

But that stuff isn't what dxAce uses!

Come on now, you being a nice Liberal, Carbon Footprint, Al Gore, Cock Sucking kinda Canuck Bastard..

I won R plantation up nord, dat dem dum ass Canuckys be oween us, ya be 'standin me?

CanaDuh is stupidity!

Stupid little pussy faggot!

Liar, liar, pantalunes on fire! (3)

Mr. Edweenie, the forces of Good are gonna come visit your sorry fake Hispanic White Boy Ass if you keep it up!

Pay attention, cock sucker...

LMFAO as I sit and look at my royalty cheques...

You've done this before, cock sucker...

LMFAO at yet another dumb friggin Canuck..

I know it may be hard, but as you withdraw, it will shrink away..

Oh damn, I guess we pissed another wanker off, Cuz..

I get my ride be fixed, I be cruisin to be givin ya da shake, yu be knowin, eh?

Try again, shithead.....

Dem Canucky boyz are dumaz rasissts..

We gone be sen u to sumplac bad boy... u be so bad weben the reel Canuckys won wan u.

Fookin bustards! Like Edweenie!

Best you wake up soon... fookin retard leetle beetch..

Fookin 'retard.

It is then my patriotic friend, you must reach in the closet,
place your hands upon the weapon, and blow the cock sucking,
bean blower back into Mary's arms....

Indeed, I'm now at WAR with Canuckistan..

May the Great Spirit help the hapless bastards.

Actually VA facilities are quite good, but if you Canucky niggahs poke around one might find a lot of things wrong.

At any rate, I'd bet it beats the Canucky Third World state of care...

CanaDuh sucks...

Wanna go to war, shit head?

Think you might win? Think you got a chance?

If you don't... I'd keep my fookin Canucky mouth shut, boy...

Meanwhile, I plan for the Spring campaign, looking forward to the
Blind River Massacre.

I collect stamps!

****

An airplane was about to crash; there were 5 passengers on board but only 4 parachutes.

The first passenger, said, "I'm Kobe Bryant, The best NBA basketball player, the Lakers need me, I can't afford to die." So, he took the first pack and left the plane.

The second passenger, Hillary Clinton, said, "I am the wife of the former President of the United States, and I am also a U.S. Senator." She got up took the second parachute and jumped out of the plane.

The third passenger, George W. Bush, said, "I'm President of the United States, and I have a great responsibility being the leader of the Free World.

In addition, I'm the cleverest President in American history, so America's people won't let me die". He put on the pack next to him and jumped out of the plane.

The fourth passenger, The Pope, says to the fifth passenger, a 10 year-old school boy, "I am old and frail and I don't have many years left, as a Christian, I will sacrifice my life and let you have the last parachute.

The boy said, "It's Ok, there's a parachute left for you. America's cleverest President jumped out with my School Bag ."

I found the location of the MW attenuator.....it appears
that I will have to change the 150pF shunt cap at the filter input to 220pF,
to make the filter symmetrical. This is for the R8.
As far as the R7, the 25V power supply line for the tune voltage was only
7V. This is the reason the receiver only locks on the low ranges. Unless the
power supply board has gone through some sort of revision, somebody replaced
the 78L24 regulator with an LM317Z. The 78L24 is a low current 24V positive
regulator, while the 317 is an adjustable regulator. Totally different
pin-out from the original, and it would never work in this circuit.
Basically, there is a multivibrator circuit that provides 35VAC. This
voltage is full-wave rectified with a bridge consisting of r 1N4148s,
filtered, and applied to the 24V regulator.
I should be able to get it running, once I get the correct part.

Pete

Hour of the Wolf radio listening. Sometimes I'm up then, too, but not
if I can help it.

VOA is also there on 9760 in the early hours. And Radio Netherlands does
their hour in English on 11675 , aimed at the east coast at 12:00 UTC.

>I will have to see what I can hear in the other time slots:
>
>Mornings : 6 AM ~ 9 AM PST West Coast Time.

>Evenings : 6 PM ~ 9 PM PST West Coast Time.

Ah, the dead zone. Maybe Cuba, maybe Russia, maybe New Zealand.
(And the usual crowd of US bible pushers). Australia is often faded
out on their 17 MHz frequencies. And it's too late for the BBC 15 MHz
stuff from Asia, and their Africa stuff isn't getting here this year.
And Radio Netherlands is either Spanish or Dutch until 9 PM. Wait for
Summer, or some more sunspots.

M II - You could have posted it to any of the Eduardo -v- DX Ace
Netgroup Ping-Pong Games without doing any harm.

M II - This just shows that you Hate DX Ace more than You Love
and Enjoy the Hobby of Shortwave Radio Listening (SWL).

M II - Get a 'sense' of Perspective and do your DX Ace Rant Thingee
when DX Ace has gone Over-the-Line with someone.

BUT - M II this was definately NOT one of those Times.

-ps- Please note that I did not Address you as "Mike"; because
in this Post you are simply acting like an 'M II'. :-{

Body handling: HTML body converted to readable text

I checked the sensitivity of the R8 at the MW band edges vs the adjacent ranges. No difference in sensitivity over the whole tuning range. 10uV RF input gives S6 meter reading, indicating that there is no MW attenuator in the non-European version. Good news.....not I don't have to tear into it until I figure out the preamp enable mod for the LW/MW ranges.

Pete

Stevie LardAss read your whine of last week. Haven't you the
integrity to stand by your own words? Is there a
connection between your incontinence problem and your dementia Mr.
"Hershey Squirts" ? Inquiring minds want to know!

From: - Sat Feb 16 00:52:22 2008

I really don't want to say this, my many shortwave friends, but
I find that I am giving up far to much of my increasingly valuable
time here on RRS trying to educate the faux, the debutantes, and
those who tote..

Therefore, I've simply decided to give up RRS.

Goodbye, I sincerely hope that you all find your niche in the
world of SW.

For One and All,

With Respect To This Shortwave Radio Reception Report :

Three Easy Shortwave Radio Broadcasters to Hear :
BBC-WS + RA-ABC + RNZI in English
http://groups.google.com/group/rec.radio.shortwave/msg/ebed7009e3cb2c0f

For My Good Friend "Teli" {Telamon :o},

Normally - My Posts are 'only' Presented for One Message Cycle.

NOW -by- You "Telamon" Posting again one-more-time
to my Shortwave Radio Reception Report [SWR3]

My Shortwave Radio Reception Report [SWR3] now have
Your "Telamon" name on the Message so the Readers that
have not Filter You will now get a Chance to Read My Message.
- - - Once Again - Thank You Very Much :o) ~ RHF

Plus because You "Telamon" have Posted to my Shortwave
Radio Reception Report [SWR3] Postings : They will be
presented to the Readers now for a Fourth Message Cycle.
- - - Again and Again - Thank You Very Much :o) ~ RHF

Plus Plus This Reply to You will about this Shortwave
Radio Reception Report [SWR3] Postings : Will be

presented to the Readers for yet a Fifth Message Cycle.
- - - A Three-Peat - Thank You Very Much :o) ~ RHF

telamon - thank you very much for the help ~ RHF

I'm told you LIKE the warm air going in your ear.

How's the bra you received from Cuhulin? Shrink much after the first wash? You DO wash your underwear don't you? With your ever increasingly valuable time being in such short supply I'm surprised you can wash anything.

==========
From: - Sat Feb 16 00:52:22 2008

I really don't want to say this, my many shortwave friends, but I find that I am giving up far to much of my increasingly valuable time here on RRS trying to educate the faux, the debutantes, and those who tote..

Therefore, I've simply decided to give up RRS.

Goodbye, I sincerely hope that you all find your niche in the world of SW.

Okay folks.....get ready for yet another round of the R75 vs R8
debate.

As to the blind test I would be more than happy to participate, I'll
bring an R75, 100 feet of wire and an ICE 182 along with some rope &
insulators etc to put up the test antenna. I'm sure there are many R8
owners who might wish to participate.....anyone out there with
the Icom 9500? Oh, and if the other participants cannot travel to a
mutual location just ship me your radios & I'll do the test
myself.....though it sure may take a long time to get conclusive
evidence 8-}

Do you feel the R75 is as good for utility listening as it's cracked up
to be? Any experience with the digital sound module for that set?

mike

Yes, I agree. Side by side there would probably be a few situations
where each of those receivers would excel by a small margin on HF.
The 9500 might be a bargain if measured by the price-per-button.

Picked up all sorts of stuff wit it . . Very sensitive / selective &
lotta tools . . .

I'd get the Kiwa Sound mods to open up the sound a bit.

Pete,

Does your R8 have an optical tuning encoder? I've been thinking about replacing the mechanical encoder on the 'B' model with an optical type, maybe a Bourns.

Thanks

Now, the problem becomes trying to guess if that's Cuhulin or the drunk racist from Holland MI. It appears as though neither of them accepts aging gracefully. Those drag queens are a sad lot.

Isn't that right, RHF?

Back around 1988, I was heading out of Alexandria,Louisiana, it was around 11:00 PM on a Saturday night.I was heading back to Jackson in my 1971 Chevrolet van.Near the Pineville,Louisiana area, a Deer was moving along that chain link fence on my left.I slowed wayyyyy down, I couldn't predict what that Deer was going to do and neither could anybody else.The Deer ran across the road to the chain link fence over there on the right.When I thought the Deer had gone away, (it was pitch dark out there, no traffic) I picked my speed up to about a fast walking speed.Suddenly, something hit the left corner of my van.When I checked it out, the left end of the rear bumper was slighly bent outward and there was a small dent near the bottom of the corner of my van.I figure that Deer had ran back accoss the highway again, unbeknowest to me, I didn't see that Deer at all that time.
Now, just watch what those Canadians will say about that!

What was I doing in Alexandria on a Saturday night? Checking out the cutie pie Cajun gals, that's what.

For utilities it's great. Mine was bought used with Kiwa mods and additional narrow filters for SSB, though in reality the filters are narrower than I've neede. Have considered pulling them and getting decent wide filters for AM, though in reality the amount of time I spend listening I'm not ready to spend the bucks. In many cases I'll do the ECSS thing and get sound quality a bit better than in AM or AM-Synch. I've never done an A-B test with an R8 so I can't comment on how they two would stack up, though knowing Drake I do believe anyone who says they find the Drake audio notably better. BY digital sound module do you mean the voice synthesisor (sp?) or the DSP? The DSP is okay - more effective the NIR-10 I used to use on my ham xceivers but it didn't knock my socks off. Overall a good radio in it's price class.

```

Linear amplifiers which are added after a transmitter are usually class AB which means they are biased below cutoff but will draw current when activated. The class AB amplifiers have good linearity at RF frequencies. When amplifying an AM or SSB signal a linear amplifier must be used or the audio will be distorted. When amplifying FM, CW, RTTY, or digitally modulated RF signals a class C amplifier can be used and will give the greatest efficiency. Thus many amplifiers sold to use on VHF FM radios are not linear and can not be used for SSB VHF transmission.

5455. Just Read That iBiquity Has Hired a New V.P. of Sales!

Newsgroup: rec.radio.shortwave
Date: 2008-02-29 06:03:50 UTC
From: Rfburns <jimwilhelm@labs.net>
Message-ID: <36b6a54f-1aff-4a6e-a5d7-b0066c790219@q33g2000hsh.googlegroups.com>
Source record: 138372

Took a trip to the local Best Buy to check on the status of HD radio sales. Same three units still there - imagine that. This stuff is hot - and a college town at that.

Just read that iBiquity has hired a new V.P. of sales - a Mr. Stocks from MyerEmco. Seems I've seen that guy on TV a few years back selling Ginsu knives or something like that. OK, maybe it was laundry detergent.

In making the announcement, Bernie Sapienza, iBiquity's Vice President of Retail Business Development, said, "We are happy to bring JR on board at this important time, when the growth in HD Radio products at retail is increasing. We will rely on him to work with our retail and manufacturing partners to build HD Radio technology's presence at retail."

Seems iBiquity might want to start with a little honesty about their current state of sales, or lack of. The dudes at iBiquity are spin-masters. At least Ginsu knives work.

Also read that iBiquity will not support any further development of AM HD beyond the current state. That should send a shiver to those boys currently transmitting AM HD.

These iBiquity dudes are techno-wizards. Even a school boy with a rudimentary understanding of amplitude modulation schemes knows there is no way to transition from an analog signal to a digital one without taking huge chunks of bandwidth. Unless you want if to sound like a cell phone.

Welcome aboard the Titanic JR.

> The 9500 might be a bargain if measured by the price-per-button.

The 9500 is a bargain if you have the money and want that extra
margin in the situations it excels at. If it makes the difference
between having every possible DXCC country in your log and not,
or getting that one extra contact for a contest, it's worth it.

Since this is an SWL group, let's face it, that extra margin is probably
of no concern to an SWL. In the real world a $200 portable with a $5
wire probably will "bag" you 95% of what is out there when it is there,
so the difference in price does not buy you much.

Did you know there is a ham out there with a 20m (14mHz) 10 element
beam antenna? I'm sure he could use one. :-) If you don't know the
math, my 11 element 2m beam antenna was 6 feet wide, by 12 feet long.
Multiply that by 10.

At least they made the thing look and feel like a radio, instead of
an expensive VoIP box.

Geoff.

Geoff makes a good point - whilst an R75 will get 99% of the catches,
after 40 years DXing I am now after that rare 1% - those tough MW
catches over 14,000 miles away from my QTH. That's when one of these
super priced full feature radio's come into their own and make the
investment worthwhile.

That's why I am upgrading to an Icom IC-7700 - something I am waiting
for with foetid breath, expected to arrive here in April.
BTW it's manual is 217 pages!!!

J&D Schnoor,

FIRST - Please go back to the RadioShack Store -so-
You can provide Us with more Details and Specifics
on this Radio :

Brand Name _____
- RadioShack - Realistic - Grundig - Eton - RCA - Coby
- Presidian - Jeep - Midland - GE - GPX - Phillips - Sima
- jWIN - Uniden - Accurian - Timex - iHome - Emerson
- Sony - Boston Acoustics - Teac . . . etc

Model Number _____

Is this Radio an
[ ] AM/FM Radio 'only' ?
-or- an
[ ] AM/FM "Clock" Radio ?

FWIW - 85 % of all the Radios Sold in the USA will have the
Model Number next to the (UL) [CE] and FCC Part 15 "Info"
Look the Radio All-Over including the Battery Compartment
and you should find that "Info" and the Model Number.

Until them check-out these Links :

5467. EMWG 10th anniversary contest - about to start

Newsgroup: rec.radio.shortwave
Date: 2008-02-29 11:10:08 UTC
From: Editor <transmitters@uk2.net>
Message-ID: <97d88c12-fc14-43b9-85ef-060d9ea37b4d@o10g2000hsf.googlegroups.com>
Source record: 138384

Dear all,

European & African Medium Wave Guide
==========

The EMWG 10th anniversary contest is about to start. This contest
celebrates 10 years of the European & African Medium Wave Guide, the
premier source of data on broadcast stations in this part of the
world.

On Friday 29 February around 1930utc the quiz will be published on
the
EMWG contest web site (www.emwg-contest.org) in the following ways:

* as an online form
* as a Word file (both .doc and .docx)
* as an OpenOffice.org file
* as a PDF file

The quiz will contain 20 radio related questions (some easy, some
hard)
and 1 elimination question.

You could be in line for one of a range of exciting prizes. Just check
out the contest.

>
- As to the blind test I would be more than happy to participate,
- I'll bring an R75, 100 feet of wire and an ICE 182 along with
- some rope & insulators etc to put up the test antenna.

GH - For a 'true' Side-by-Side using one Antenna you will
need some sort of an Antenna Splitter/Combiner :

The RF Systems SP-2 2-Way Antenna Splitter might help
so that you can use the same Antenna, MT and Feed-in-Line
and do an actual side-by-side for the two radios.
-or- RF Systems SP-1 Splitter/Combiner;
LF Engineering SPL-2/50L VLF-HF Two-Way Splitter/Combiner

The only other 'cheap-and-dirty' way is to simply use 100 Feet
of 300 Ohm Twin Lead -or- 450 Ohm Ladder-Line. +plus+
Use a a common 8-Foot Ground Rod for 'both' Receivers.
Use the Receiver's HI-Z Terminals for the Antenna Inputs.
* One of the Parallel Wires to One Receiver and the
* 'other' Parallel Wire to the 'other' Receiver.
=YES= I know it ain't perfect but it does work better than
a single Wire Antenna Element etc; and then Switching
back-and-forth between the two receivers.

~ RHF

Barry Seeber (ex-Radio Australia) R.I.P.
February 28th, 2008 - 12:20 UTC by Andy

About Barry Seeber

We are sorry to have to pass on this message from Mike Bird in Australia:
"I am writing because I have just heard that my good friend and former colleague at Radio Australia, Barry Seeber, passed away earlier today after a 4 year battle with cancer. He was 65 years old. I produced Barry in the mid 1980s when he was the presenter of RA's DX and communications programme "Talkback". He retired from RA in 1997.
"Barry was one of the best broadcasters I ever worked with. His professionalism and his beautiful voice were legendary. He was also one of the most considerate and caring people I have ever had the honour to meet and become friends with.

"I last met Barry in December 2007 when Sandy and I visited him in his home in Coffs Harbour in northern New South Wales. He was very sick but he was still able to give us a smile. I know there are many people around the world who will remember his name and his voice and will be saddened to hear this news."

Andy Sennitt adds: Media Network joins Mike in offering condolences to Barry's sister Glenda and his brother Ray, who both nursed and looked after him through his illness. Thanks to Dave Onley for fowarding the photo.

5478. PONG : [Off-Topic] -wrt- The Telamon -v- RHF Game of Newsgroup "Ping-Pong"

Newsgroup: rec.radio.shortwave

PONG : [Off-Topic] -wrt- The Telamon -v- RHF Game
of Newsgroup "Ping-Pong"

For all of you who have been Following -or- trying to Avoid
the present Game of Newsgroup Ping-Pong between
Telamon and Myself "RHF" here on Rec.Radio.Shortwave.

I will endeavor to put a PONG : at the Start of the Subject
Line in my Replies to Telamon.

PONG = Plain Old Newsgroup Garbage -aka- A Message
that is Posted in-Relpy to a Newsgroup "PING"

PING -aka- A Message Directed Specifically At a Member
of a Newsgroup : Which can be viewed as an Attack on
that Member; by that Member.

When You See the "PONG" at the Start of the Subject-Line
at least You will Know what the Real 'Context' of the Message
is and You can then "Choose" to Read It or simply Ignore It.
{ My Recommendation "Clue" Is To Ignore Them }

i tela-u-man - stay out the games of newsgroup 'ping-pong' ~ RHF
.

I don't know the details, but I read right here that it was being done.
The flyback and retrace would produce a "buzz" at 59.97 Hz and the
15.739 kHz dog whistle.

Looking at the schematic of the front end, the MW attenuator mystery has FINALLY been solved. There is indeed a MW attenuator that can be implemented, by moving at least one jumper on one of the headers at the input of the MW filter section.
According to the schematic, normal operation has the attenuator disabled. Good news for me!
I am still working on the preamp enable mod, but I haven't found anything yet. There is a way to enable the preamp by providing a jumper between the collector and emitter of Q106, but I wouldn't go that way myself, since the preamplifier would always be enabled. I am still looking for an inhibit line...........

It's quite capable for a $500 radio. I don't especially like the UT-106
DSP; it takes away noise at the expense of readability. If I was
trying to copy an ID, I'd turn it off. The "sync" doesn't work, but the
SSB works just like a sync, and can be made to sound pretty darn good
for program listening. The pure HF SSB is about as good an any radio
with RF Gain and AGC flexibility.

I'm not sure just what you're trying to do Pete, but the MW attenuator is
accessible on the R8 directly from the front panel. 10 dB I believe.

It does indeed have an optical encoder. In order two install an optical encoder, first of all, you would need to order a Quadrature optical encoder.....32 pulses per revolution is fine.
Next, you would need to remove the +5V pullup resistors from the encoder lines, since an optical encoder provides +5V pulses. Once you install the encoder, connect +5V, ground, and channel A and channel B outputs to the tuning lines that were originally connected to the mechanical encoder.
If your tuning is reversed, meaning that when you rotate the tuning knob clockwise the frequency decreases instead of increased, you only need to interchange the channel A and B outputs.
The encoder should run you about 30 to 40 dollars vs the 4 or 5 dollars of the mechanical encoder.
One thing I notice with my R8.....when tuning, I can hear some pulses in the speaker output. The remedy for this is to wrap the tuning lines in copper tape and ground the tape. Sometimes you have to be careful here, because the extra capacitance incurred because of the copper shield can cause too long of a time constant, rounding off the square wave pulses ot the encoder output. I ran into this problem with my DDS based synthesizer, and ended up using lower value pullup resistors at the uP inputs.....this supplied more current to the tune lines, thus, reducing the RC time constant. Worked like a champ!

Dave, not a R390, but a Hallies SX100, an Eddystone 940 and I had a
Racal RA-17 for a year. None of those radio's are a patch on a modern
DSP receiver like my Icom IC-756PROIII, which is simply superb.

Those old valve radio's were fine in the 60's when the bands were not
so crowded, but the MW band where I mainly DX has thousands and
thousands more stations crowding the bands today, making DXing much
more challenging than when I started in the hobby in 1966.

South 33 d 47 m 32 s, East 20 d 07 m 32 s
RX Icom IC-756 PRO III with MW mods
Drake SW8 & ERGO software
Sony 7600D, GE SRIII, Redsun RP2100
BW XCR 30, Sangean 803A.
Antenna's RF Systems DX 1 Pro Mk II, Datong AD-270
Kiwa MW Loop, PAORDT Roelof mini-whip

How would I know any more than you how Walter Ulloa is doing?

Walter, by the way, does not own Entravision. Thousands of shareholders do.
And he never "ran" KMEX... where at most he was local sales manager and
operations manager, but not GM.

Mall Intercepts intend to find people outside the home, with the result
being lower cost and greater quantities of people than in home recruiting
where lack of presence (away from home) or unlisted numbers or caller ID or
whatever may prevent access. This is particularly accentuated in reaching
young adults and upscale respondents.

I did see that one, but there is also an additional attenuator that can be implemented, but moving those jumpers that are at the input of the MW filter section. Similar to the implementation that is used in the Kenwood TS-570. Since the schematic shows normal operation with this thing disabled, I am thinking that this option is intended for European markets. The only spur that I see on the MW band in my location is a 3rd order product at 500kHz from WGN 720 mixing with WKRS 1220.
A preselector eliminates this spur. I see why some of the manufacturers chose 0 to1MHz for the LW range and 1 to 2MHz for the next range. Still, I like to see a low-pass filter at 500kHz for the LW band.
It definitely is a nice receiver.......using a Wavetek Model 2407 rf generator, sensitivity was flat across the whole tuning range.
They are using a Mini-Circuits SBL-3 as the 1st mixer. This mixer has an operating range of 40kHz to 200MHz, with an SSB conversion loss of only 4.75dB or so. Since later iterations of the R8 series receiver improved the IP3 from the original +5dBm to +20dBm, I am thinking that they must have switched to either an SRA-3H or and SRA-3MH. These mixers have an LO injection level of +20dBm and +13dBm respectively. Operation of these later iterations should be similar to the Drake R7.
I am glad that I picked this one up.

Oh, I forgot.....if Drake did choose a 1st mixer that
required a higher LO injection level, they would have also needed to
increast the RF output of the 1st injection oscillator to provide the
required level. This is not a drop-in replacement!

It would be interesting to determine if the 9500 could actually
deliver usable signals from stations where the other two could not.
And it would be equally interesting to see if the reverse were true.
I would like to read about or somehow quantify the as yet undefined
listening margin that a mega-buck reveiver like the 9500 is supposed
to deliver.

The 9500 has a graphic spectrum display, frequency coverage darkness
to daylight and numerous controls that the other receivers do not.
But basic signal grabbing performance on the HF bands is where the
receivers should be compared.

You may have noted that many of these spellings that are based on arcane usages or situations have now been accepted in both the "modern" (wrong) and traditional (right) forms because the mis-use exceeds the correct use.

"HD(tm) Radio and Satellites: Radio Interference"

HD(tm) Radio, beneficiary of an FCC-authorized monopoly, is broadcasting desperation by crying "monopoly" and "Lemme in!" on the proposed XM Radio -Sirius Radio satellite radio (SatRad) merger. What balls gall. To add insult to injury, huge Clear Channel Communications, long a target of media-consolidation foes, argues that a SatRad merger should include HD reception on SatRad radios, though the technologies and business models have nothing in common at all.

iBiquity corporation, monopoly license holder of the HD(tm) Radio franchise, and the HD(tm) Radio Alliance, lobby for manufacturers and others conned into implementing iBiquity's unproven technology, whine that any post-merger XM-Sirius radio receivers should receive HD(tm) Radio signals too. This is a desperate attempt to stall action by a completely different technology with a completely different business model merely because it has proven less of a failure than HD(tm) Radio. SatRadio is a service consumers actually want.

Consumers willing buy SatRad receivers and pay monthly subscriptions; they like the reception quality, broad choices, lack of commercials and "underwriter announcements," and the ability to hear the same programming on the same frequency anywhere in the continental U.S. without having to hunt for sydicated broadcasts on local earth stations every few miles when listening in their cars.

Consumers have shown themselves unwilling to buy first-generation HD(tm) Radio receivers that duplicate their regular FM recievers but add the HD(tm) Radio broadcasts -- at least in the 20 to 30 percent of the reception area of the host station's conventional FM signal area where they can be heard. HD(tm) Radio broadcasters even tell you to get your old rooftop TV antenna out of the basement to use with your brand-new HD(tm) Radio receiver. The HD Alliance spin machine attempts to fudge the numbers can't hide the fact.

In a car travelling across country, or even commuting between exurbs and central city, the HD(tm) Radio signals cut off; the SatRadio signals don't. HD(tm) Radio conned National Public Radio (NPR) into becoming an early adopter through license and equipment bargains and subsidies. What NPR and iBiuquity forgot: public radio listeners are older, better-educated and more skeptical. When they learn that the "HD" in HD(tm) Radio does not stand for "High Definition" but is a clever ploy to confuse a public coping with converting to digital television, they become livid.

The iBiuquity corporation even gets free government-mandated ads on regular FM -- the FCC forces FM radio stations with those weak HD(tm) Radio signals on their sidebands to use the designation "HD-1" after their call signs in station IDs on conventional FM broadcasts. And now HD(tm) Radio wants to horn in on a deal that has nothing to do with them, as if interfering with more successful competitors will make their failed product any more attractive.

HDTM Radio interference in the SatRad merger deal only draws attentition to the vast differences in quality and viability between the two modes. HDTM Radio is a loser; does it have to be a whiner, too?

Stop Japanese Whaling in Australian Antartica
Your comments please

Sea Shepherd Receives Message From the Australian Government

Captain Paul Watson received an email from the Australian government. The letter and Captain Watson's response are reprinted below:

From: Donne, Tony
Date: Wed, 27 Feb 2008 23:36
Subject: Message to Captain WATSON on behalf of the Australian Government [SEC=UNCLASSIFIED]

Dear Captain WATSON

I have been asked to transmit the following message on behalf of the Australian Government.

Following the transfer by the Oceanic Viking of two of your crew members from the Yushin Maru No. 2 to the Steve Irwin on 18 January 2008, you made the public statement that having delivered a letter of protest to the Japanese whaling fleet, you did not see an incident of this kind occurring again.

The Australian Government is concerned that your recent public statements indicate that you may be contemplating another boarding of a Japanese vessel in the Southern Ocean.

Weather and sea conditions in the Southern Ocean, and the very long distances involved, mean that the area is an inherently dangerous one in which to operate. For this reason, the Australian Government has continually called on all parties in the Southern Ocean to exercise restraint.

As the Australian Government has previously outlined, now that the monitoring mission of the Oceanic Viking has been completed, neither protest nor whaling vessels can in any way assume that the Australian Government will be in a position to respond immediately in the event of any serious incident.

You should also understand that it may not be possible for the Australian Government to intervene, in the event of another boarding incident, to facilitate the transfer of people from one vessel to another on the high seas.

Crew members of ships in the Southern Ocean should not attempt to board other vessels. All parties should understand that to do so may well be contrary to the law of the flag state of any such vessel.

For this reason, the Australian Government once again calls on you - as it does all parties - to exercise the utmost restraint in your activities in the Southern Ocean.

The Australian Government strongly discourages activity which could be illegal or unsafe activity which could lead to injury or loss of life at sea.

TONY DONNE
A/DUTY COORDINATOR
INTELLIGENCE

Reply from Captain Watson:

Dear Mr. Donne,

Thank-you for your message.

We did say to the media at the time that we saw no need to deliver a another message to the Japanese notifying them of the fact that there was an Australian Federal Court ruling that very day prohibiting Japanese whalers from killing whales in Australian territorial waters.

We never said that we would rule out boarding Japanese vessels as a tactic. If the non-violent boarding of an illegal whaler can shut down illegal whaling for days or weeks then we believe this is a valid tactic.

In fact at no time did any representative of the Australian government ever speak to me directly about tactics, plans or issues. I never spoke to a representative of the Australian government or the Federal police to the fact that we would not board a ship again if circumstances required us to.

We regard the Japanese whaling ships as poaching vessels. I believe that Australia has boarded poaching vessels many times in the past and rightfully so. The Sea Shepherd Conservation Society has been working in the Galapagos in partnership with the Galapagos National Park rangers and we have boarded shark poaching vessels on many occasions. We have also boarded shark poaching vessels in the waters of Cocos Island National Park off Costa Rica and in 2001 we seized the Ecuadorian long-liner San Jose in the Cocos Island National Park Marine Reserve.

The Japanese whaling fleet is presently hunting whales in the Australian Antarctic Territory despite an Australian Federal Court order specifically prohibiting the killing of whales in these specific waters.

Japan is targeting endangered whales (Fins) in violation of the Convention on the International Trade in Endangered Species (CITES). Japan is violating numerous regulations of the International Whaling Commission.

In your message you relayed it was stated "The Australian Government strongly discourages activity which could be illegal or unsafe activity which could lead to injury or loss of life at sea." Respectfully this must include illegal whaling and illegal whaling is causing the loss of life at sea - specifically thousands of whales.

What is Australia going to do to protect the lives of the whales presently threatened by illegal Japanese whaling activity?

When the Australian government calls for the exercising of "restraint" I would expect this to include the Federal Australian court order that used that exact same word in calling for the "restraint" of all Japanese whaling operations.

Last month it was the Japanese who requested that the Oceanic Viking remove two of my crew and return them to the Steve Irwin. I made no such request but I was willing to cooperate with both the Japanese Captain and the Captain of the Oceanic Viking to have the men transferred back to my ship.

I do not expect to and I will not request Australia to intervene in the event any of my crew are once again held hostage by the Japanese. I would find it interesting to see how Australia would react to having an Australian citizen seized in the territorial waters of Australia by illegal Japanese whalers and taken against their will to Japan.

The question must then be asked: Is the line on the nautical charts that indicates the EEZ for Australia 200 miles off the Australian Antarctic coast to be taken seriously? Is this or is this not a legitimate territorial claim? We have been operating under the assumption that these waters do belong to Australia as we have been assuming that an Australian Federal Court order must be worth more than the paper it is printed on. Is this Court Order just a joke to appease Australians who want to see something done about whaling? Is this all just posing and posturing or is Australia serious about ending illegal whaling?

This is my fourth season in these waters. I am well aware of how dangerous and remote this area of the world is. I have never asked nor have I ever expected Australia to come to our rescue in the event of an accident.

The Australian government can expect that the Sea Shepherd Conservation Society will adhere to our long-standing policy of not causing injury to the criminals we oppose. We will however take the required risk to oppose unlawful Japanese whaling operations and we do so within the definition of intervention in the United Nations World Charter for Nature that allows for non-governmental enforcement of international conservation laws and regulations.

I would like to report a crime. The Japanese have eight ships presently inside the Australian Antarctic Territorial waters and these ships are engaged in unlawful activities and they are doing so in blatant contempt of the Australian Federal Court ruling issued January

15th that prohibits the killing of whales in these waters. What is the Australian government going to do about this?

Sincerely,

Captain Paul Watson
Master of the Steve Irwin
Founder and President of the
Sea Shepherd Conservation Society

Subject: Google Finance Post
Date: Fri, 22 Feb 2008 18:46:45 +0000

"Hey, we are all entitled to our opinions. I would appreciate your
not having attacked me in your post on the google finance site.
Perhaps you would be kind enough to remove it if that is at all
possible. If I knew you or you knew me, or perhaps I had a done

something that deserved such a comment, that would be one thing. I am sure you have your opinions on IBOC, and are entitled to those. You are not entitled to an opinion of me when you do not know me."

Best Regards,
J. R. Stocks

http://finance.google.com/group/google.finance.998521/browse_thread/thread/700d60b116b3d77f/31fd9f1ef555c151?hl=en&lnk=st&q=myeremco%2C+stocks#31fd9f1ef555c151

I referred to Stocks as a loser on iNiquity's Google Finance site, because MyerEmco was a loser that went out of business. Yea, a real nice guy that should be considered a criminal, along with the rest of iNiquity's employees, for this monopoly to take over our airways through adjacent-channel interference! Maybe, he doen't realize that since he has been in the news, he is considered a public figure, and is legally open to criticism.

5519. Re: Drake R8 question

Newsgroup: rec.radio.shortwave
Date: 2008-02-29 20:05:27 UTC
From: Pete KE9OA <p.gianako@comcast.net>
Message-ID: <zZmdnbu-WJru-FXanZ2dnUVZ_gGdnZ2d@comcast.com>
Source record: 138487
Body handling: HTML body converted to readable text

That appears to be very true. I tried the R8 out with the RS passive loop, and if definitely needs a preamp in order to have good sensitivity. This is where the R8 A and B has an advantage since you can enable the preamp on all ranges.
With a long wire, or an active loop antenna, it is pretty good.

Pete

my name is larry a. will jr., you might also know me by my screen name cosmikdebris,i post over on the free radio network with that handle. i post things like this to try and hurt other people beacuse i'm such an angry old geezer. if you would like to actually get ahold of me feel free to, my home addresse is 28723 ridge rd.,mount airy,maryland, 21771.your welcome to come over and put some slugs in me if you'd like.considering what a cheap shot low life i'am by posting things like this i would completely understand and you'd be putting out of my misery by doing it.well i hope i've put some bad karma into the world today with my post above,you know the funny thing is that everyones got something in their backround or something to hide, it just makes

me feel so superior to everyone else if i can make some one look bad for things that happened over ten years ago. wow,acting like i'am i sure hope nothing bad happens to me.when you continue to harass people like this strange things could happen to me,as you can see i trying really hard to make that happen to myself.

sincerley, larry will jr.

5523. Re: Michael Gaukin III, convicted criminal from Cleveland, Ohio, can't avoid getting into trouble. What does poor Cindy think?

5528. The follow-up to the pulled MT blog. DRM Is Dead?

Newsgroup: rec.radio.shortwave
Date: 2008-02-29 20:54:28 UTC
From: Drifter <drifter@pgh.net>

DIGITAL BROADCASTING DRM: see also CONVENTIONS & CONFERENCES; ECUADOR;
++++++++++++++++++++ EUROPE; INDIA; TAIWAN

DRM IS DEAD?

I understand that programming time that is already contracted for will still have DRM, but does anyone know when we will start to see a DECREASE in programming time with DRM, particularly in the 49 meter band? It really racks up the band for at least +/- 20 kHz around the assigned frequency. I wonder if people will pay for programming in the upcoming transmission schedule cycle starting at the end of March given the announcement at the HFCC (unattributed quotation, DXplorer, via Ralph Brandi via Wolfgang Bï¿½schel, DXLD)

It wasn't an announcement; it was cocktail party chatter. It's not anything official, just the (rough) consensus opinion of the people who attend HFCC. I doubt that everyone who was there agrees, but the fact that such an opinion got out indicates that it's probably pretty widely held. Dan Ferguson can probably tell you how much power the people who attend HFCC have to affect serious decisions involving money and strategy. So in the short and medium term, I wouldn't expect any decrease in the amount of hours dedicated to DRM. The Peter Sengers of the world don't understand that DRM is dead yet (Ralph Brandi, ibid.) Ralph himself has also been DXing DRM with some good TA low-power catches (gh)

Funny- no one told be me that we had gone out of business. Check your facts, Myer-Emco is very much in business, and has been for 52 years. Rationalizing a personal attack of someone you do not know, simply because they are in the news, is pretty weak ground. I am not sure what your beef with J.R. is, but I would certainly vouch for his credibility and capabilities.
Signed- Jon Myer, Owner- Myer-Emco Audio/Video
How about you signing your name to your attack as well? Your comments are in the public domain, are they not?

MyerEmco got bought out - don't have a beef with him, except all iBiquity employees should be held responsible for supporting the highjacking of our airways. Let's see, what happens when Congress finishes its investigation of the FCC - hopefully, this scam called HD Radio will be brought to the publics' attention and those responsible are prosecuted.

House Subcommittee To Investigate FCC"

"WASHINGTON -- December 4, 2007: House Commerce Committee Chairman
John Dingell (D-MI) told FCC Chairman Kevin Martin in a letter Monday
that he's concerned about 'procedural breakdowns' at the FCC and that
the Commerce Committee's Subcommittee on Oversight and Investigation
will be conducting a probe into the agency."

http://www.radioink.com/HeadlineEntry.asp?hid=140298&pt=todaysnews

“HD Radio on the Offense”

“But after an investigation of HD Radio units, the stations playing HD, and the company that owns the technology; and some interviews with the wonks in DC, it looks like HD Radio is a high-level corporate scam, a huge carny shill.”

http://www.eastbayexpress.com/2007-03-07/music/hd-radio-on-the-offense

"Editorial on the recent approval of HD Radio (IBOC) in the USA"

"... the reason the big boys in the big markets are so pro IBOC is because they like the hash as it wipes out distant signals getting into their market. There is no way to stop skip, but if the IBOC hash wipes the signal out, then the locals will have to listen to their local station. Kind of like legal jamming. Considering that, then even if the public does not buy the radios, keeping the IBOC signal might be worth their while."

http://www.am-dx.com/amiboc.htm

"DEAD AIR: Radio's great leap forward stalling in the Valley"

"KMBH, the National Public Radio affiliate based in Harlingen, switched to HD this year, but the change did not boost its inconsistent analog signal in the upper Valley. Monsignor Pedro Briseño, the manager of the station and its television affiliate, did not return multiple calls and an e-mail requesting comment on the station’s shift. A fundraising campaign on the station asked local listeners to contribute to the upgrade earlier this year, touting the change as a service to listeners that would improve their experience. The station’s business manager said she could not reveal the cost of the upgrade, saying all media requests have to be routed to Briseño. A public information request faxed to the station Monday evening has not yet received a response. Organizations that receive government funding are subject to state and federal open records laws, but have seven business days to respond to information requests."

http://www.themonitor.com/news/radio_7098___article.html/digital_new.html

"HD Radio: Will More Awareness Translate To Sales?"

"Unfortunately, Ibiquity does not: Yes, they have gotten many radio stations to make the $100,000 or so investment required to add HD Radio broadcasting, but what the leave out of their PR spin is that MANY of these stations were Public Radio/NPR stations that had their equipment paid for by special funding from Congress. So tell me, senior executives from, say, Sony, Mitsubishi, Best Buy, etc.: How do you feel about Ibiquity''s lobbyists getting US taxpayers to pick up the tab for many of their transmitter sales? Wouldn''t it be great if your lobbyists could get Congress to mandate that US taxpayers be required to buy your products, too? Do you even slightly care? Ibiquity will take their money and run, and HD Radio will join a long list of failed formats, like Dolby FM radio, Elcassete, mini disk (in the US), etc."

http://tinyurl.com/37pe7t

"HD Radio: Fun with Math"

"I think it is fair to say that the audiophile community, those people who take their FM seriously, is dead set AGAINST HDRadio. Not only do most people never intend to buy a radio, unless as a plaything for early adopters and collectors, but are aghast at the FCC for even allowing IBOC to thrash up the FM bandwidth. Plus, people with enough technical savvy to read the specs are insulted by the false claims of 'CD sound quality' or even 'near-CD sound quality'. These are transparent marketing hype, beyond mean puffery. Sorry, but HDRadio has sworn enemies. This goes beyond just business but has political reprecussions for FCC and for Congress. This has the whiff of political scandal - and I'm a rock-ribbed Republican! The Corporation for Public Broadcasting is especially vulnerable. My advice for any businessman is to avoid any association with HDRadio."

Whoever you are, you had better be careful using threatening tones with posters. There is a big difference between that and First Amendment Free Speech Rights! And, good-luck if you think bringing the "big guns" out is going to discourage me from posting! Don't you have that "bought out" business to attend to? Being bought-out is a retreat strategy, so I wouldn't brag, if I were you!

I'm saddened to hear of the death of Barry Seeber. I just went through my QSL's and found the large Talkback QSL I received back in 1984 in commemoration of the 1st Talkback program. It has Barry's picture on it, along with many others, including Mike Bird.

Thanks for rekindling some good memories.

RIP Barry

Will the Failure of DRM : Seal the Death of International

Shortwave Radio Broadcasting !

First the majority of DRM Broadcasters are Governments.

Digital Radio Mondiale (DRM) is 'Digital' and All Things "Digital" still has some Political Value as a Buzz Word {Noise} for Bureaucrats within the Government to continue to 'sell' International Shortwave Broadcasting {Maintain their Budgets and Jobs} to Elected Politicians looking for something they themselves can Sell to the Voters.

Without "The New" DRM : old fashion Analog AM Shortwave Broadcasting -is simply- old analog technology trying to compete with All-Things-New-and-Digital as Means to Deliver and Distribute a Nations World-Wide News and Info.

IMHO - The So-Called "New Media" : Internet; PodCast; Direct Satellite Broadcasting; and and In-Counrty AM/FM Re-Broadcasting : Win-by-Default -if- International Shortwave Broadcasting does not show that it can be just as Efficient and Cost Effective as New Media in attracting a Larger and Younger Listening Audience.

Look at the pathetic number of hits on your website - in your case, being out-of-business, and being bought-out, might as well be one-in-the-same:

http://tinyurl.com/3agsc2

Another farce.

I don't know that we'll ever answer this question here on the ng.
Yes, it boils down to basic signal capture capability - however, if
one radio makes that easier via better DSP, filters, easy to use
controls vs embedded menus I bet it will more often be used to its
full potential.

On a separate note; this is one of the better threads - good focus on
on-topic material!

(Festus) Dont you seeeeee,,,,, Matthew???? Them there Brits have to keep their Prince Prissy Boy safe.Now, they can't have her (him) gettin hurt over there in that strange furrin country Afghanistan, now can they?

(Matthew) Festus, what are you doing here? I thought you was upstairs in the Long Branch with Miss Kitty.
(Festus) Golleeeee,,,, Matthew, I sat down in that chair and I took my boots off, Miss Kitty said, OK Festus, go to town!
So, I put my boots back on and I strapped my Gunbelt back on and I put my old hat back on and here I am.

- - I've wondered about people who write 'Baited'
- - instead of 'Bated'. I feel like asking them if
- - they've been eating worms.

That would be "Chicken Livers" in Catfish County
- - - and they are good eating too ;-}
-ps- Ain't Got No "Chicken Livers" . . . just say 'Cheese' :o()
- - p s - - then again so do tell that Raw {un-cooked} Shrimp
is loved by Catfish almost as much as by Us'uns.

- You may have noted that many of these spellings
- that are based on arcane usages or situations have
- now been accepted in both the "modern" (wrong)
- and traditional (right) forms because the mis-use
- exceeds the correct use.
